Re: Denman Village Design Charrette

Dear Mr. von Hausen;

On behalf of the Denman Island Local Trust Committee, I would like to express sincere appreciation for your contribution to the Denman Village Design Charrette held earlier this fall. This was a tremendous opportunity for Denman Island residents to participate in a visioning process for their “downtown” core and, equally, a valuable professional development opportunity for Vancouver Island University Master of Community Planning students.

The Local Trust Committee recently received a draft report from Vancouver Island University which identifies several tangible options to enhance the Denman Village area. We look forward to receiving the final report early in the New Year and having further discussions about the possibility of advancing these ideas toward implementation.

Thank you again for contributing your time and expertise to this important community planning initiative for Denman Island.

Sincerely,

Susan Morrison, Chair
Denman Island Local Trust Committee
