

# 2021 Census Profile

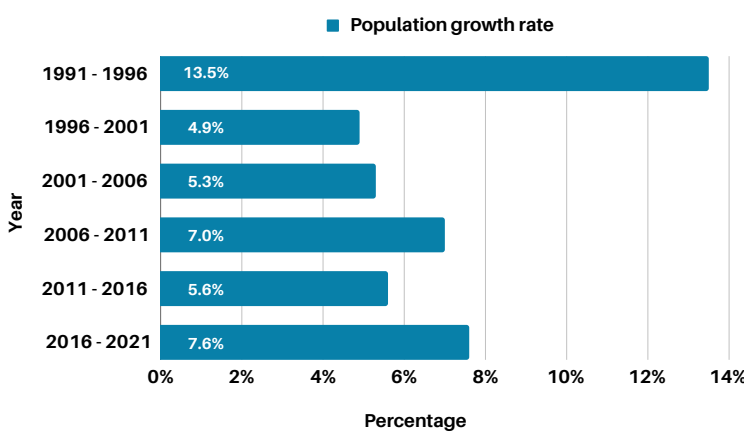

## British Columbia

### Total population

The total population of British Columbia was 5,000,875 in 2021, with a median age of 42.8.

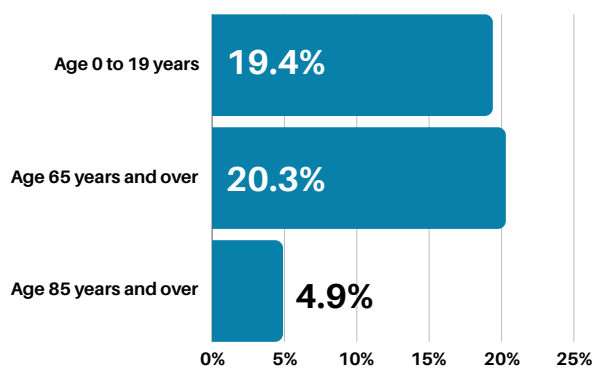

### Total population growth rate

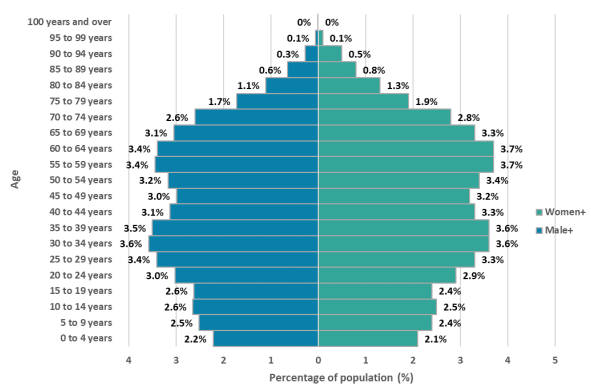

Between 1991 and 2021 the population of British Columbia grew by 52.4%.

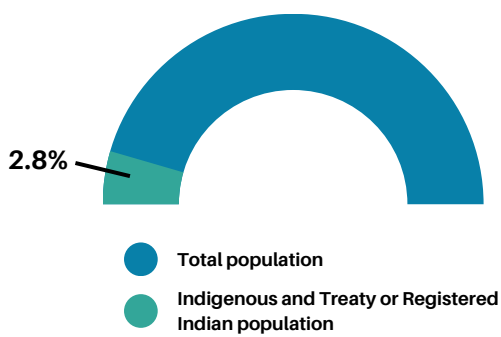

### Population of children versus seniors, 2021

### Total population by gender, 2021

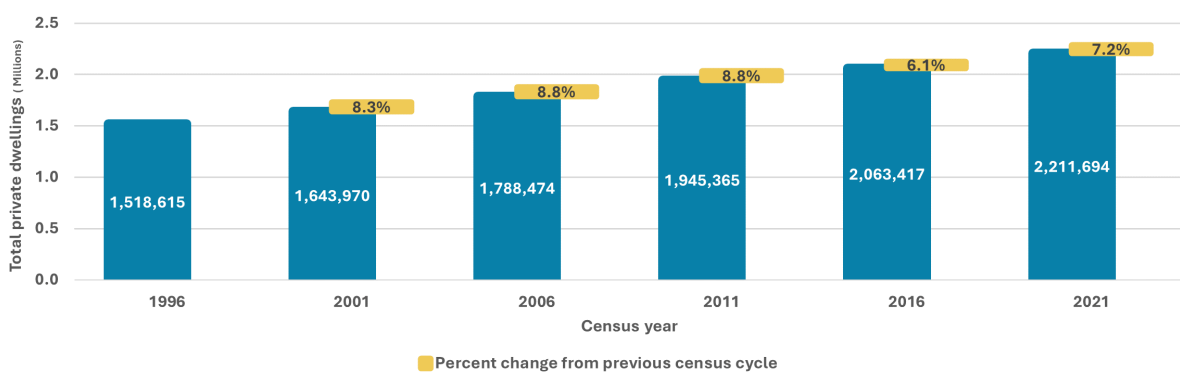

### Population by Indigenous and Registered or Treaty Indian status, 2021

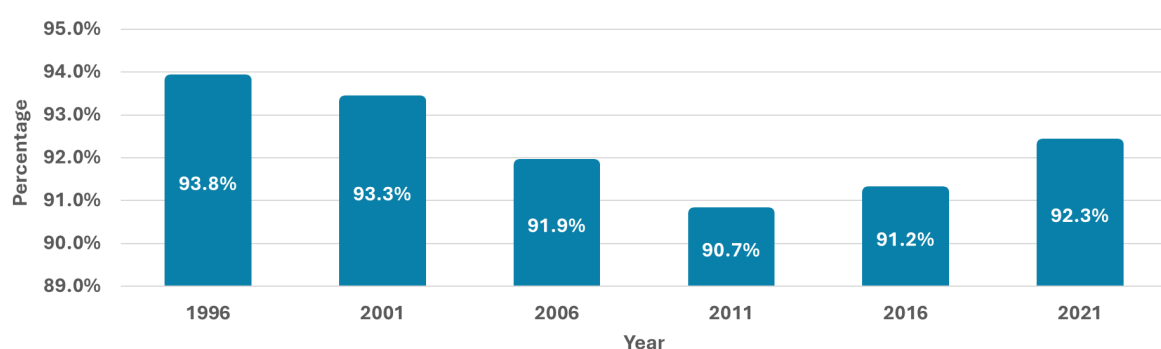

In 2021, 2.8% of the total population identified as Indigenous or Registered or Treaty Indian.

### Total number of private dwellings and percent change between 1996 and 2021

### Percentage of private dwellings occupied by usual resident between 1996 and 2021

**Note:**

To ensure confidentiality, the values, including totals, are randomly rounded either up or down to a multiple of '5' or '10'. To understand these data, you must be aware that each individual value is rounded. As a result, when these data are summed or grouped, the total value may not match the individual values since totals and sub-totals are independently rounded. Similarly, percentages, which are calculated on rounded data, may not necessarily add up to 100%.
