15. TOWN HALL 3:00 PM - 3:10 PM

16. CLOSED MEETING - none

17. ADJOURNMENT 3:10 PM - 3:10 PM

Gabriola Island Local Trust Committee
Minutes of Regular Meeting

Date:	**June 14, 2018**
Location:	**Gabriola Arts & Heritage Centre** **476 South Road, Gabriola Island, BC**
Members Present:	**Laura Busheikin, Chair** **Melanie Mamoser, Local Trustee** **Heather O'Sullivan, Local Trustee**
Staff Present:	**Ann Kjerulf, Regional Planning Manager** **Sonja Zupanec, Island Planner** **Nadine Mourao, Recorder**
Others Present:	**There were approximately 16 (sixteen) members of the public and one (1) member of the media in attendance**

1. CALL TO ORDER

"Please note, the order of agenda items may be modified during the meeting. Times are provided for convenience only and are subject to change."

Chair Busheikin called the meeting to order at 10:17 am. She acknowledged that the meeting was being held in territory of the Coast Salish First Nations, welcomed the public and introduced Trustees, staff and recorder.

2. APPROVAL OF AGENDA

The following additions to the agenda were presented for consideration:

- Move discussion of 12.1 Work Program Reports to after 13. New Business.

By general consent the agenda was approved as amended.

3. TOWN HALL AND QUESTIONS

Jim Ramsay spoke on behalf of the members of the Village Vision Planning Committee and noted the following:

- They have made a submission to the Executive Committee concerning the 1992 agreement with the Ministry of Transportation and Infrastructure (MoTI) regarding road standards within the Islands Trust being made more welcoming to pedestrians, cyclists and motorists and to create a mechanism within the Islands Trust, Local Trust Committee (LTC) and Regional District of Nanaimo (RDN), in consultation with citizen lead groups, to formulate infrastructure that will enhance safety for everyone in their communities.

Chair Busheikin responded with the following:

- The submission from the Village Vision Planning Committee was well received at the Executive Committee Meeting; and
- This is a large Trust wide project that needs to be added to the next strategic plan with the Executive Committee.

The Chair of the Gabriola Housing Society Board spoke and requested that the Trustees not remove the Housing Options Review Project from the Top Priorities List.

4. COMMUNITY INFORMATION MEETING - none

5. PUBLIC HEARING - none

6. MINUTES

6.1 Local Trust Committee Minutes dated May 3, 2018 – for Adoption

The following amendments to the minutes were presented for consideration:

- Page 3, first bullet, change spelling of Comox to K'ómoks First Nation
- Page 3, first bullet, remove the words "shared In-Camera with the LTC the details of the treaty, land selection and priorities and then"

By general consent the minutes were adopted as amended.

6.2 Section 26 Resolutions-Without-Meeting - none

6.3 Advisory Planning Commission Minutes - none

7. BUSINESS ARISING FROM MINUTES

7.1 Follow-up Action List dated June 7, 2018

Received for information.

8. DELEGATIONS - None

9. CORRESPONDENCE

(Correspondence received concerning current applications or projects is posted to the LTC webpage)

9.1 Letter dated April 29, 2018 from Gabriola Agricultural Co-Op Association regarding request for amendment to Bylaw No. 186

Received for information.

9.2 Letter from Gabriola Arts Council regarding request for amendment to Land Use Bylaw No. 186

Received for information.

10. APPLICATIONS AND REFERRALS

10.1 GB-RZ-2016.1 Potlatch Properties and Pilot Bay Holdings - Staff Report

Planner Zupanec reviewed the following:

- Finalized terms of instrument – Part 2 including Schedule 'A', 'B' and 'H' – in the Section 219 covenant to be registered on the subject property as a condition of rezoning;
- A copy of the draft covenant was available prior to the public hearing on Bylaw Nos. 289 and 290;
- The covenant has since been updated to reflect the change in ownership of lands, including a covenant area map and improved readability of several clauses; and
- Overview of enforcement of covenants and definition of first subdivision.

Discussions ensued and Chair and Trustees thanked Staff for all their hard work on this topic.

GB-2018-031
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee accept the final draft covenant under Section 219 of the *Land Title Act* from the registered owners of the South 1⁄2 of the North West 1⁄4 of Section 19, Gabriola Island, Nanaimo District Except Part in Plan EPP13396 (PID: 006-635-121); Lot 7, Section 20, Gabriola Island, Nanaimo District, Plan VIP86742 (PID: 027-939-804); Lot 6, Section 20, Gabriola Island, Nanaimo District, Plan VIP86742 (PID: 027-939-791); and Lot 1, Section 19, Gabriola Island, Nanaimo District, Plan 24354 (PID: 003-010-431), and designate the Chairperson and one other member of the Local Trust Committee to sign the executable version of the covenant GB-RZ-2016.1 (Potlatch Properties and Pilot Bay Holdings).

CARRIED

11. LOCAL TRUST COMMITTEE PROJECTS

11.1 Housing Options Review Project Bylaws 292 & 293 - Staff Report

Planner Zupanec summarized the recommendation that Proposed Bylaw No. 292 be adopted and Proposed Bylaw No. 293 be amended prior to adoption.

Chair and Trustees thanked the public and Staff for their hard work on this Project.

GB-2018-032
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee Bylaw No. 292 cited as "Gabriola Official Community Plan (Gabriola) Bylaw No. 166, 1997, Amendment No. 1, 2017", be adopted.

CARRIED

GB-2018-033
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee Bylaw No. 293, cited as "Gabriola Island Land Use Bylaw No. 177, 1999, Amendment No. 1, 2017", be amended as follows:

a) Item 2.7 - by inserting the words "where permitted in Part D of this Bylaw" before the words "are subject to the following requirements:"; and
b) Item 2.7 – B.6.6.1 – by deleting the words "in the Small Rural Residential (SRR), Large Rural Residential (LRR), Forestry (F), Resource (R), Resource Residential (RR1) and Agriculture (AG) zones on lots".

CARRIED

GB-2018-034
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee Bylaw No. 293, cited as "Gabriola Island Land Use Bylaw No. 177, 1999, Amendment No. 1, 2017", be adopted as amended.

CARRIED

Trustees requested the following amendments to the 'Secondary Suites on Gabriola Island – Frequently Asked Questions' document:

- Under the 'Where are secondary suites allowed on Gabriola?' add imperial acreage conversion in brackets after 2 hectares; and
- Under the 'Why is a Restrictive Covenant required?' remove "and be used for market rental housing."

GB-2018-035
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee request staff to post the June 2018 'Secondary Suites on Gabriola Island - Frequently Asked Questions' document to the 'Latest News' webpage as amended.

CARRIED

11.2 Housing Options Review Project - Follow-up Staff Report

Planner Zupanec provided an overview of the report regarding the completion of Phase 1 of the Housing Options Review Project and noted the following:

- Summarized the completion of Phase 1 and shifting deliverables to Phase 2 or other separate project;
- Requested that the LTC confirmed the activities for a subsequent Phase 2 Housing Options Review Project;
- Trustees consider amending the fees bylaw to include reduced development for application fees for affordable, rental or special needs housing projects; and
- Proposed removing the Housing Options Review Project from the Top Priorities list so as to not exceed the recommended number of items, once Phase 2 commenced, add item back onto Top Priorities List.

Discussion ensued and Trustees and noted the following key points:

- Requested that attainable housing be added to the Official Community Plan (OCP) policies and definitions;
- Adding community groups into 2. c);
- Addition of Land Use Bylaw (LUB) after OCP;
- Including seniors in no. 4 along with affordable, rental or special needs;
- Removing 'in the Village' core from g) and h) to keep options as open as possible; and
- Requested moving into Phase 2 rather than removing the project from the Top Priorities List.

GB-2018-036
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee confirm the following activities for Phase 2 of the Housing Options (Official Community Plan/Land Use Bylaw) Review Project on the Projects List:

a) Review Official Community Plan policies respecting affordable and attainable housing, rental housing, seniors housing and special needs housing, and policies relating to social needs, social well-being and social development;
b) Consider the definitions of 'affordable housing' and 'attainable housing' in the Official Community Plan;
c) Explore opportunities to foster affordable, rental, seniors and special needs housing and associated services on Gabriola Island in collaboration with the Regional District of Nanaimo, health and housing service providers and community groups;
d) Review provisions for secondary suites above existing farm buildings in the Agricultural Land Reserve;
e) Consider opportunities for secondary suites on lots smaller than 2 hectares;
f) Consider an Official Community Plan designation for multi-dwelling housing;
g) Consider Official Community Plan density provisions for multi-dwelling housing;
h) Consider opportunities for mixed use buildings.

CARRIED

GB-2018-037
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee add to the Projects List, "Water Resource Planning", with the Activity, "Official Community Plan and Land Use Bylaws amendments to address water resource protection including subdivision proof of water requirements."

CARRIED

GB-2018-038
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee request staff to draft an amendment to the Fees Bylaw to reduce the fee for applications involving Official Community Plan or Land Use Bylaw amendments to $1,000 where the application is for affordable, rental, seniors and special needs housing and the applicant is a registered charity or a non-profit society.

CARRIED

12. REPORTS

12.1 Work Program Reports

12.1.1 Top Priorities Report dated June 7, 2018

Regional Planning Manager Kjerulf provided a status update on the Mudge Island targeted review of OCP/LUB item on the Top Priorities Report and the following points were noted:

- A draft bylaw is under development and is currently with the Islands Trust solicitor for review as per project charter processes;

- Presentation of the draft bylaw to the LTC and consideration of the first reading, Community Information Meeting (CIM) and referrals to occur during the summer; and
- Targeted date for the report and community consultation is at the next LTC meeting.

Doug MacDonald and Susanne Jakobsen from the Mudge Island Advisory Planning Commission (APC) spoke and suggested the following:

- Schedule the CIM on this topic early in the agenda at the next regular LTC meeting;
- If there is a delay in reviewing the draft bylaws at the next LTC, please advise the Mudge Island APC as soon as this information is available;
- Encouraged the first reading of the draft bylaw at the next LTC meeting if the draft bylaws are available for review.

Discussion ensued and Trustees responded with the following:

- Enquired whether Staff could schedule a CIM on this topic at the next LTC meeting, understanding that there may be a second CIM if the draft bylaw is delayed for review;

GB-2018-043
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee request Staff to schedule a Community Information Meeting on the Mudge Island Targeted Review of Official Community Plan/Land Use Bylaw for the July 12th,2018 Gabriola Island Local Trust Committee meeting.

CARRIED

Chair Busheikin noted that there are currently four items on the Top Priorities Report, regular practice is to keep the report to three items in order to focus resources and have achievable items:

- Suggested moving the First Nations Relationship Building from the Top Priorities Report to the Projects List to seek opportunities to consult and build relationships with the Snuneymuxw First Nations, as this a constant priority for the LTC.

Trustees requested:

- Staff consider enquiring with Fiona MacRaild, Senior Intergovernmental Policy Advisor for input on this topic.

GB-2018-044
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee request Staff to draft a standing resolution with respect to First Nation Relationship Building.

CARRIED

GB-2018-045
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee replace Housing Options Review Project with Housing Options Review Project Phase 2 and update the activity accordingly.

CARRIED

12.1.2 Projects List Report dated June 7, 2018

Received for information.

12.2 Applications Report dated June 7, 2018

Received for information.

12.3 Trustee and Local Expense Report - none

12.4 Adopted Policies and Standing Resolutions

Received for information.

12.5 Local Trust Committee Webpage

No changes requested.

Regional Planning Manager Kjerulf joined the meeting at 11:38 am.

12.6 Chair's Report

Chair Busheikin reported the following:

- Attended the Executive Committee and noted the following:
  - Received a submission from Village Vision Planning Committee;
  - Large Trust Council package including Tsleil-Waututh First Nations, new Chair of the Agricultural Land Commission and CAO attending;
  - Looking at Committee changes and deeper level, do-able Act amendments;
  - Several requests on decisions from Trustees;
  - Will meet regarding targeted advocacy brought forward by Trustee George Grams supporting the B.C. government's approach on the Trans Mountain pipeline, re-iterating the Committee's opposition to the pipeline and their opposition to tanker traffic with putting ads in national and provincial newspapers;
  - Trust Fund Report name change and celebration at council;
- Attended the Baynes Sound Forum, an Islands Trust World Wildlife Fund cooperative event attended by representatives from Denman and Hornby Local Trust Committees, Provincial and Federal Ministries, three different First Nations, Shellfish Aquaculture and Herring Fisheries and community groups to discuss the topic of building trust and learning from each other for protection of bodies of water;
- Intergovernmental meeting with K'ómoks First Nation; and
- On Hornby Island the LTC have added to their top priorities list a comprehensive water planning project.

12.7 Trustee Reports

Trustee O'Sullivan reported the following:

- Attended Trust Programs Committee (TPC) meeting in Nanaimo on the topic of service integration and noted the following:
  - Steve Earle from Village Vision spoke regarding the MoTI road standards agreement;
  - TPC looking at service integration between various branches of government in wake of Salt Spring Incorporation vote;
  - Reviewing protocol agreements with various agencies and in the process of picking a few agreements to work on;
  - Starting outreach to other agencies to enhance partnerships across the federation;
  - Passed a motion regarding Trustees providing feedback to the LTC about engagement successes and issues;
- Ferry Advisory Committee (FAC) and terminal development meeting with presentations from Transportation Network members about making the terminal area safer and BC Ferries considering options regarding development;
  - Would like to thank John Hodgkins, the FAC Chair who is moving off Gabriola, for all his hard work and many hours on the FAC; and
- Munu Canoe Family Fundraiser and Cultural Demonstration at Gabriola Sands Provincial Park.

Trustee Mamoser reported the following:

- Attended the Local Planning Committee meeting where the Northern Housing Needs Assessment, a technical document for creating a housing strategy, has been completed and is being sent to Trust Council for approval next week.

By general consent the meeting was recessed at 12:01 pm and reconvened at 12:14 pm.

GB-2018-039
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee send a letter of appreciation to John Hodgkins for his work on the Gabriola Ferry Advisory Council.

CARRIED

12.8 Electoral Area Director's Report - none

12.9 Trust Fund Board Report dated May, 2018

Received for information.

13. NEW BUSINESS

13.1 Regulation of Cannabis Production and Retail Sales and Non-Medical Cannabis Retail License Application Fees - Staff Report

Regional Planning Manager Kjerulf summarized the report regarding the proposed *Cannabis Act* and described options for the regulation of non-medical cannabis retail sales and asked the LTC to consider the following:

- Adopting a standing resolution to process Liquor Control and Licensing Branch (LCLB) non-medical cannabis retail applications;
- Amending the LTC fees bylaw to include a specific fee for the processing of LCLB non-medical cannabis retail applications; and
- As an option, reviewing its land use regulations applicable to cannabis production and retail sales

Discussion ensued and the Trustees noted the following:

- Expanded notification area from 200 metres to 500 metre radius from the subject property;
- Requested Staff provide further analysis on fees bylaw recommendations;
- Asked that cannabis productions and retail sales be added to the Projects List; and
- Requested Staff to research and report to the LTC regarding Land Use Regulations on the Agricultural Land Reserve (ALR)

GB-2018-040
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee adopt the following standing resolution with respect to the processing of non-medical cannabis retail license applications:

- Proposed or amended licenses for non-medical cannabis retail establishments require an application to the Local Trust Committee;
- The application process shall comprise a public consultation component, which includes at least one notification to neighbours, one public meeting, posting of public notices and one advertisement in a local periodical;
- The public consultation process shall be determined by the Local Trust Committee after initial review of the proposal; and
- However, as a minimum, the Local Trust Committee will mail or otherwise deliver a notice to all owners and residents of properties within a 500 metre radius of the subject property where the establishment is proposed at least 10 days before adoption of a resolution providing comment on the application. The required notice shall include the following information:
    - Name of the applicant and a description of the proposal in general terms;
    - The location of the proposed establishment and the subject site;
    - The place where, and date and time when, both a public meeting will be held and a resolution of the local trust committee considered;
    - The name and contact information of the Islands Trust planning staff member who can provide copies of the proposed or amended license application; and
    - How public comments may be submitted to the Local Trust Committee.

CARRIED

GB-2018-041
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee request that staff prepare a draft bylaw to amend the fees bylaw for Liquor Control and Licensing Branch applications, and provide specific further analysis in terms of the appropriate fee to be charged.

CARRIED

GB-2018-042
It was MOVED and SECONDED
that Gabriola Island Local Trust committee add to the project list cannabis production and retail sales and request staff to provide a report on options regarding Land Use regulations on this topic.

CARRIED

14. UPCOMING MEETINGS

14.1 Next Regular Meeting Scheduled for Thursday, July 12, 2018 at 10:15 am (Location to be announced.)

Trustees confirmed the next regular meeting date and location.

15. TOWN HALL

A member of the public spoke regarding the following:

- The UN Declaration of the Rights of Indigenous Peoples is the minimum standard to ensure the survival, dignity and well-being of Indigenous people around the world. The Truth and Reconciliation Commission of Canada (TRC) called to action #43 asking municipal, provincial and federal governments to adopt and implement the UN Declaration;
- Health and Transportation will be having a meeting with the Minister for Transportation regarding the road safety issues surrounding the BC Ferry terminal and they hope to have the Trustees support on this important topic; and
- The Health and Transportation Committee is now part of the Health and Wellness Collaborative and asked the question whether the parks, trails and road in the Potlach development are being developed preceding subdivision

Chair Busheikin noted the following points:

- Asked the member of the public to telephone Staff regarding the Potlach development as the topic has not been finally adopted for post public hearing; and
- Encouraged writing an email to Trust Council to take seriously the road designation and the review of the Memorandum of Understanding with MoTI.

Derek from the Sounder asked for the following:

- A status report and clarification moving the definition of limited public market to the Projects List and enforcement of the Bylaw 186 Limited Public Market, subsection v6.2; and
- Procedure for a letter of support from the LTC regarding the skate park in Huxley Park.

16. CLOSED MEETING - None

17. ADJOURNMENT

By general consent the meeting was adjourned at 1:27pm.

STAFF REPORT

File No.: GB-DVP-2018.2 (Douglas)

DATE OF MEETING: July 12, 2018

TO: Gabriola Island Local Trust Committee

FROM: Teresa Rittemann, Planner 2
Northern Team

SUBJECT: RE: Requested variance to relax the setback to the exterior side lot line
Applicant: Jeff Wagner (for Carol Douglas)
Location: 1411 Westgyle Rd, Gabriola Island (PID 005-789-036)

RECOMMENDATION

1. **That the Gabriola Island Local Trust Committee approve issuance of Development Variance Permit GB-DVP-2018.2, with the following variance to the Gabriola Island Land Use Bylaw No. 177, 1999:**

    a. **To reduce the exterior side lot line setback from a minimum of 10.0 metres to 8.71 metres for the existing house as shown on Schedule A of the Permit.**

REPORT SUMMARY

The Gabriola Island Local Trust Committee (LTC) is asked to consider Development Variance Permit (DVP) application GB-DVP-2018.2, which requests a relaxation to the required setback to the exterior side lot line for a residential property in the Small Rural Residential (SRR) zone. Staff believe that this variance request is minor, and that given the orientation of the site and existing landscaping, issuing the variance as requested would likely have no negative impact on neighbouring property owners, nor would it be contrary to the Gabriola Official Community Plan (OCP).

BACKGROUND

The subject property is shown in the location map below:

The applicant has noted that this variance request is due to an error, as the Building Permit issued by the Regional District of Nanaimo permitted the building to be located +/- 30 feet (9.144 m) from the lot line facing North Road. The applicant notes that relocating the building to comply with the required 10.0 metre setback would have significant financial implications for his client, the owner.

This variance application is proceeding as a result of Bylaw Enforcement file GB-BE-2018.1, whereby Bylaw Enforcement became aware of a building that did not comply with the required lot line setbacks. This application seeks to address a violation of the exterior side lot line setback regulation for the existing house. A copy of the Public Notice and the Draft Permit are included as Attachments 2 & 3 respectively, and a copy of the survey dated June 25, 2018 is included as Attachment 4.

ANALYSIS

Policy/Regulatory

Attachment 1 addresses the site context in greater detail, including reference to Islands Trust policies; however, the following is a summary:

- Islands Trust Policy Statement (ITPS): The proposal is not contrary to or at variance with the ITPS.
- OCP: The property is designated Small Rural Residential (SRR), and not within a Development Permit Area; the development is consistent with OCP residential objectives and policies.
- Gabriola Island Land Use Bylaw (LUB): The property is within the Small Rural Residential (SRR) zone; buildings and structures are required to be setback a minimum of 10.0 metres from lot lines.
- Known archeological sites: The variance request is for an area of the property outside the known mapped location of an existing archaeology site. No further movement of building or development is proposed at this time.

Issues and Opportunities

There are a few other existing buildings/structures on-site, to be discussed:

- **Old "House"**: As shown in the survey dated June 25, 2018 (see Attachment 4), there is a second building labeled "house", which the applicant notes was used as a residence some time ago, but is not any longer, as it is currently only for storage purposes now that the new home has been constructed. This old "house" building is existing, and is in rather poor condition, as can be seen in the image in Attachment 1. This building would be considered to be a permitted accessory building; however, it is also not compliant with the 10.0 metre lot line setback. The applicant has requested that this building not be included in this variance application; Staff are also not recommending a variance be granted for this building, and would suggest instead that the building be removed in the future.

- **Shed**: This structure is in a similar state of condition. Although it would be considered to be accessory, it also does not meet required lot line setbacks. Staff are not recommending a variance be granted for this structure in this case, and would suggest instead that it also be removed in the future.

- **Septic field**: The LUB defines structure as: "anything constructed or erected that is fixed to, supported by or sunk into land or water, whether underwater or otherwise, **excluding** vehicles except for vehicles used as a restaurant where a restaurant is a permitted use, floating vessels, paving for vehicle parking, sidewalks, and **sewage absorption fields**; for clarity, swimming pools, dugouts, cisterns, above ground septic tanks and detached ground level decks are considered structures". Thus, septic fields are not considered structures and are therefore exempt from the lot line setback requirements for structures.

Consultation

A copy of the draft permit and notice were mailed to properties within 100 metres of the subject property. At the time of report writing no submissions had been received by planning staff.

Rationale for Recommendation

Staff believe that this variance request is minor, and that given the orientation of the site and existing landscaping, issuing the variance as requested would likely not have a negative impact on neighbouring property owners, nor would it be contrary to the OCP. Therefore, Staff are recommending that the variance be issued, as noted on page 1 of this report.

ALTERNATIVES

The LTC may consider the following alternatives to the staff recommendation:

1. **Request further information**

   The LTC may request further information prior to making a decision. If selecting this alternative, the LTC should describe the specific information needed and the rationale for this request. Recommended wording for the resolution is as follows:

   That the Gabriola Island Local Trust Committee request that the applicant submit to the Islands Trust [insert requested information] prior to further consideration of application GB-DVP-2018.2.

2. **Deny the application**

   The LTC may deny the application. If this alternative is selected, the LTC should state the reasons for denial. Recommended wording for the resolution is as follows:

   That the Gabriola Island Local Trust Committee deny application GB-DVP-2018.2 for the following reasons [insert reasons].

NEXT STEPS

Should the LTC decide to support Staff's recommendation, Staff would proceed to issue GB-DVP-2018.2.

NOTICE

GB-DVP-2018.2 (DOUGLAS)
GABRIOLA ISLAND LOCAL TRUST COMMITTEE

NOTICE is hereby given that the Gabriola Island Local Trust Committee will be considering a resolution allowing for the issuance of a Development Variance Permit, pursuant to Section 498 of the *Local Government Act*, varying subsections of the Gabriola Island Land Use Bylaw No. 177, 1999, as follows:

a) **PART D – ZONES**, Section **D.1 – RESIDENTIAL ZONES,** Subsection **D.1.1 Small Rural Residential (SRR),** Article **D.1.1.3 Regulations,** Clause **D.1.1.3.a Buildings and Structures Siting Requirements**, Item **D.1.1.3.a.ii**:
"On lots 1.0 hectare (2.47 acres) or larger, except for a sign, fence, or pump/utility house, the minimum setback of buildings or structures is:
- 10.0 metres (32.8 feet) from any lot line, except the minimum setback for greenhouses is 7.5 metres (24.6 feet) from any lot line";

- Is varied in order to reduce the setback from the exterior side lot line from 10 metres:
  - To a minimum of **8.71 metres for the existing dwelling**.

The property is legally described as:

PID 005-789-036
That Part of Lot 3, Section 5, Gabriola Island, Nanaimo District, Plan 6986 Lying to the South East of road dedicated by Plan 17829, except that part in Plan 26916

The general location of the subject area is shown in the following sketch:

Written submissions should be sent to:

Mail: Islands Trust
700 North Road
Gabriola Island, BC
V0R 1X3
Fax: 250-247-7514
Email: trittemann@islandstrust.bc.ca

A copy of the proposed Permit may be inspected at the Islands Trust Northern Office, 700 North Road, Gabriola Island, BC, V0R 1X3, between the hours of 8:30 am and 4:00 pm, Monday to Friday inclusive, excluding Statutory Holidays, commencing **June 29, 2018** and continuing up to and including **July 11, 2018**. Also, attached for your convenience, is a copy of the proposed Permit.

If you have any questions or comments regarding the proposed Permit, please contact Teresa Rittemann, Planner 2, at 250-247-2200; for Toll Free Access request a transfer via Enquiry BC, in Vancouver 604-660-2421 and elsewhere in BC at 1-800-663-7867.

Following the end of the notice period, the Gabriola Island Local Trust Committee may consider issuance of the proposed Permit at its Regular Business Meeting to be held at **1:00 pm, Thursday, July 12, 2018, at the Gabriola Arts & Heritage Centre, 476 South Road, Gabriola Island, BC**

All applications are available for review by the public. Written comments made in response to this notice will also be available for public review.

Becky McErlean
Deputy Secretary

PROPOSED

Islands Trust	**GABRIOLA ISLAND LOCAL TRUST COMMITTEE** **DEVELOPMENT VARIANCE PERMIT - GB-DVP-2018.2 (DOUGLAS)**

TO: Carol Douglas

1. This Development Variance Permit (the "Permit") applies to the land described below:

   PID 005-789-036
   That Part of Lot 3, Section 5, Gabriola Island, Nanaimo District, Plan 6986
   Lying to the South East of road dedicated by Plan 17829, except that part in Plan 26916

2. Pursuant to Section 498 of the *Local Government Act*, the *Gabriola Island Land Use Bylaw No. 177, 1999* is varied as follows:

   a) **PART D – ZONES**, Section **D.1 – RESIDENTIAL ZONES,** Subsection **D.1.1 Small Rural Residential (SRR),** Article **D.1.1.3 Regulations,** Clause **D.1.1.3.a Buildings and Structures Siting Requirements**, Item **D.1.1.3.a.ii**:
   "On lots 1.0 hectare (2.47 acres) or larger, except for a sign, fence, or pump/utility house, the minimum setback of buildings or structures is:
      - 10.0 metres (32.8 feet) from any lot line, except the minimum setback for greenhouses is 7.5 metres (24.6 feet) from any lot line";

   - Is varied in order to reduce the setback from the exterior side lot line from 10 metres:
      - To a minimum of **8.71 metres for the existing dwelling**.

   as shown in the attached site plan (Schedule "A"), which is attached to and forms part of this Permit.

3. All buildings and structures shall be consistent with Schedule "A" which is attached to and forms part of this Permit. This Permit is not a Building Permit, and does not remove any obligation on the part of the permittee to comply with all other requirements of the Gabriola Island Land Use Bylaw No. 177, 1999 including use and density, and to obtain other appropriate approvals necessary for completion of the development.

AUTHORIZING RESOLUTION PASSED BY THE GABRIOLA ISLAND LOCAL TRUST COMMITTEE THIS ___ DAY OF _____, 2018.

_____
Deputy Secretary, Islands Trust

_____
Date of Issuance

IF THE DEVELOPMENT DESCRIBED HEREIN IS NOT COMMENCED BY THE ____ DAY OF _____, 2020, THIS PERMIT AUTOMATICALLY LAPSES.

GABRIOLA ISLAND LOCAL TRUST COMMITTEE

RE: Variance Request PID 005-789-036 – Carol Douglas

Dear Local Island Trust Committee;

I am writing this letter in support of this variance as Paul's father for the following reasons:

Sec. 22(3)(a)

- [redacted]
- While we do not have an estimate of the cost to move the building, including the foundation and services, we anticipate that it would be out of reach given what has been already expended to-date.
- The side of the building that has created this situation is located on the North Road side of the property and is not adjacent to any neighbouring properties. What benefit would be gained by moving the home 1.29 meters away from North Road?

If you require further background information, please feel free to contact me at [redacted].

Thank you for your consideration,

Yours Truly,

Dave Douglas

To: Teresa Rittemann
Subject: Comment on a Variance at North Road and West Gyle

Hello,
Regarding: GB-DVP-2018.2(DOUGLAS)

As the primary neighbour that can see this new dwelling from my home I have no problem with the location being 1.29 meters closer to the property line than bylaws allow.

This is a neighbourhood built 60 years ago and many homes have been located closer than 10 meters to property lines. As such it tends to be in character with the existing neighbourhood.

Thanks,
Dave Teichroeb

STAFF REPORT

File No.: GB-RZ-2018.1 (Melville)

DATE OF MEETING: July 12, 2018

TO: Gabriola Island Local Trust Committee

FROM: Teresa Rittemann, Planner 2
Northern Team

SUBJECT: Rezoning Application for water lot District Lot 311, Nanaimo District
Applicant: Tim Melville
Location: District Lot 311- water lot (in proximity to upland parcel 1855 Maple Lane (PID 000-643-734), Degnen Bay, Gabriola Island)

RECOMMENDATION

1. **That the Gabriola Island Local Trust Committee deny rezoning application GB-RZ-2018.1 for the following reasons:**

   a. **The water lease area and 'Water General (WG)' Zone is intended to accommodate limited berth moorage/dockage for the personal use of a group or association of residents from Gabriola Island for non-commercial purposes;**

   b. **Use of the water lease area for commercial moorage (instead of non-commercial group moorage) is not consistent with the overall intent of the Gabriola Official Community Plan and Land Use Bylaw requirements, as well as with provincial standard residential lease terms historically and currently in effect for District Lot 311, which specifically prohibit commercial activity including the renting or selling of berths and electricity;**

   c. **Parking congestion along Degnen Bay Road may be partially attributed to improper use of the tenure area for commercial moorage and unauthorized expansion of the number of berths. Parking congestion and associated upland services (such as provision of a public toilet facility) typically attributed to a commercial marina facility are not addressed by the applicant's proposal for rezoning; and**

   d. **The water lease area is an important provincial resource with broad public, First Nations and government interests in an ecologically sensitive and archaeologically rich location of Gabriola's shoreline.**

2. **That the Gabriola Island Local Trust Committee request staff to advise the applicant that they may not re-apply to the Local Trust Committee with a similar proposal for at least one year from the date of this resolution, as per the Development Procedure Bylaw No. 114, 1992; and**

3. **That the Gabriola Island Local Trust Committee request staff to issue a refund to the applicant in the amount of $1,300 as per Development Fees Bylaw No. 245, 2007.**

REPORT SUMMARY

The purpose of this report is to provide a comprehensive overview of the application proposing to rezone a 0.5 hectare water lot from 'Water General' (WG) to a site-specific WC (Water Commercial) zone in order to legalize the current use of the marine lease area as a commercial marina.

This application is a result of Islands Trust Bylaw Enforcement as well as the provincial Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD) Enforcement and Compliance review. The current commercial use of the lease area as a marina for up to 23 berths is inconsistent with the Group Moorage Lease with FLNRORD, as well as the WG zoning prohibiting the commercial use of floats, wharf or docks. A current surveyed site plan is included as Attachment 2 to this report.

BACKGROUND

The adjacent upland lot (1855 Maple Lane), as well as the subject water lot (DL 311) and existing marina infrastructure is located in Degnen Bay, Gabriola Island as shown in Figure 1 below:

Figure 1

The previous landholder of the upland lot (1855 Maple Lane), acquired the water lease for District Lot 311 from the Province in 1983 for the purpose of "private moorage", and subsequently renewed the lease (Crown Lease 112998) on April 1, 2008 for another 20 years, for "marina" purposes.

The applicant subsequently purchased the upland lot and had Crown Lease 112998 for the water lot issued in his name. In June 2010, the Province and Mr. Melville agreed upon a "Modification Agreement" which corrected the tenure type of his lease from "marina" to "group boat moorage". This tenure type (group moorage) is specifically for non-commercial activities, often for the use of a group or association of residents from the surrounding community.

In 2012, Bylaw Enforcement file GB-BE-2012.5 was opened for violation of the Gabriola Island Land Use Bylaw (LUB), as a commercial use of the dock was occurring in the WG zone. The file was re-opened in 2017 for the same violation, plus a possible expansion to the overall siting and size of the dock.

As a result of recent Bylaw Enforcement action, the applicant has submitted a rezoning application to request an amendment to the LUB for site-specific marine zoning to permit the current commercial use marina in this location, and after the fact approval of the overall siting and size of the dock. The applicant wishes to have the historic and current commercial use of the water lot recognized through site-specific zoning provisions.

ANALYSIS

Policy/Regulatory

Attachment 1 includes a more detailed description of the site context, including a comprehensive policy/regulatory overview, and other influences of the site; however, the following is a summary.

Islands Trust Policy Statement:

Several Islands Trust Policy Statement (ITPS) policies were particularly useful in providing guidance of the analysis for this proposal (see Attachment 1). This proposal appears to be consistent with the ITPS, including with the policies regarding the sharing of dock/float facilities; protecting public access and accommodating marine recreation; minimizing impacts on sensitive coastal ecosystems; as well as finding appropriate locations for marinas and community and public docks.

Gabriola Island Official Community Plan:

The Gabriola Island Official Community Plan (OCP) does not acknowledge an existing, commercial/marina use of this water lot in Degnen Bay – the OCP only acknowledges three existing commercial marinas and a yacht club operation (all in Silva Bay). OCP Marine Resource Policy l) also mentions that for any application to establish a new marina or expand an existing marina, the proposal shall demonstrate that such a use can be carried out while minimizing conflict with other recreational uses and no damage will occur to nearby areas of ecological significance.

Further, as the applicant is seeking authorization for the commercial/marina use of this water lot, Marine Resource Objective #4 also applies, which seeks to provide opportunities for the commercial uses of the foreshore and coastal waters provided that such uses don't detract from the marine waters' environmental integrity. Thus, this proposed commercial (marina) use of the existing dock would need to ensure that conflict with other recreational uses is minimized and no ecological damage would occur nearby.

Therefore, it is unclear if/how this proposal to rezone from non-commercial group moorage to commercial marina would address the above OCP Policies; however, the proposal does appear to support the provision of shared dock infrastructure and does not impede access to the foreshore. Therefore, an amendment to the OCP would likely not be required by rezoning.

Rezoning to permit a commercial/marina use in this specific location may not be appropriate given the inability to provide adequate parking and upland facilities. Marinas should provide public washroom facilities, as per Marine Resource Advocacy Policy t) of the OCP, and parking as per the requirements within the Land Use Bylaw regulations; thus, the proposal does not appear to be consistent with the overall Policies of the OCP.

The subject property is not located within a designated Development Permit Area.

Gabriola Island Land Use Bylaw:

The Gabriola Island Land Use Bylaw (LUB) defines *marina* as: the **commercial use** of a water area for the accommodation of vessels and includes the installation of floats, wharves, piers, ramps and walkways and the provision of dockage services, but does not include yacht clubs or yacht club outstations.

The current use of the water lot for commercial group moorage (marina) is not permitted in the 'Water General' (WG) zone. Commercial use of the marine area is permitted in water commercial zones such as the adjacent Degnen Bay Government Dock, Silva Bay, and Page's Marina. Thus, the applicant is requesting a site-specific marine zone to accommodate approximately 480 sq.m. of floats and docks, for commercial moorage of up to 23 berths in this location.

The parking regulations of section B.5 of the LUB do not require on-site parking to be provided for the principal uses of the WG zone; however, provision of on-site parking would be required for marina use. As the water lot is adjacent to a road right-of-way (Degnen Bay Road), the applicant is also requesting to be exempt from parking requirements for marina use which requires 1 parking space for every 2 boats berthed on an annual basis, plus 1 parking space for each employee – to be provided either on the lot, or an adjacent lot in the same zone. Although the applicant does have an upland lot on Degnan Bay Road which could be considered part of the same site (see Figure 1 above), the applicant is not proposing to rezone this lot from 'Small Rural Residential' to a site-specific parking facility to support the existing marina use.

The WC1 zone permits a broad range of marine uses including marinas; marine fuel sales; water taxis; seaplane dockage; boat sales/rentals and up to 3 live-aboard vessels at any one time. The applicant has noted that there are currently no live-aboards, and permitting live-aboards is also not the applicant's intention for this proposed rezoning. Thus, should this rezoning proceed, a site-specific zone (e.g. WC1(a)) could be created specifically for this lot in order to include only relevant regulations.

Issues and Opportunities

Unauthorized Commercial Activities:

Staff at the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD) note that a group boat moorage facility means a multi-berth moorage similar to a private moorage facility but for the personal use of a group or association of residents from the surrounding community, and not intended for any commercial purposes or uses. Commercial activity is prohibited at group moorage sites, including the renting or selling of berths and hydro, but excluding any necessary membership fees to cover maintenance and administrative costs. FLNRORD is concerned that the inclusion of 30-amp metered electrical service and use of this facility by transient boaters constitutes a commercial use and scale. The intent of the WG zone for non-commercial group moorage or dockage is that it only be for the use of upland property owners on Gabriola, not transient visitors that would frequent a marina.

Unauthorized changes to the Management Plan and Legal Boundaries of District Lot 311:

Some of the dock structures are located outside the surveyed tenure boundaries of the lease. A rezoning process would need to work congruently with FLNRORD to address the potential expansion of the leased water lot area (i.e. water lot may require a new survey to reflect any such changes), and therefore the result of this Islands Trust rezoning application will also help guide the Ministry's next steps with the applicant.

Marine Habitat Protection:

This water lot is in a location of Degnen Bay which is often dry at low tide. FLNRORD staff note that vessels, floats, or any other structures that ground at low tide are not permitted according to Fisheries and Oceans Canada "Marine Guide to small Boat Moorage"[1] and are to be removed to prevent scouring of the foreshore and damaging marine habitat. Islands Trust mapping also indicated the known location of Eelgrass habitat within the water lot boundaries.

Traffic/Parking Congestion along Degnen Bay Road:

As mentioned, no parking spaces are required for the current zoning for non-commercial use, but parking would be required if rezoned to allow for marina use (unless specifically exempted within the site-specific zone). FLNRORD staff note that bringing this tenure into compliance with the terms of a group moorage lease rather than commercial marina use might address some of the traffic and parking concerns on Degnen Bay Road. FLNRORD staff also note that a letter of consent from the Ministry of Transportation and Infrastructure (MOTI) must be renewed every five years.

First Nations Consultation:

The Province has a legal "duty to consult" with First Nations, and expanding the lease boundaries could be significant, as there are known and potential archaeological sites in the vicinity. Consideration for LUB amendments which would impact such areas also places an obligation on the LTC to engage with local First Nations. Should the LTC decide to proceed with this rezoning application, Staff would recommend that the application be referred to local First Nations, as identified in the Province's Consultative Areas Database, and to the Archaeological Branch for review and comment.

Consultation

During pre-application correspondence with the applicant, Staff suggested that the applicant may wish to sponsor their own public consultation process by approaching neighbours and property owners who may be affected by this proposal in order to gather input or identify potential impacts as perceived by the general public. As far as Staff are aware, the applicants did not conduct an open house or other public meeting to engage with neighbours to discuss the proposal. Therefore, should the LTC decide to proceed with this rezoning application, Staff would recommend that the application be referred to the Gabriola Island Advisory Planning Commission for review and comment.

Rationale for Recommendation

Given the reasons outlined in the policy and regulatory analysis, along with the outstanding issues and opportunities discussed above, Staff are recommending that this rezoning application be denied. The recommended resolution along with a summary of the reasons can be found on page 1 of this report.

[1] See http://www.dfo-mpo.gc.ca/library/281614.pdf

ALTERNATIVES

The LTC may consider the following alternatives to the staff recommendation:

1. **Request further information**

   The LTC may request further information prior to making a decision, including information to address issues raised in this staff report. If selecting this alternative, the LTC should describe the specific information needed and the rationale for this request. Recommended wording for the resolution is as follows:

   That the Gabriola Island Local Trust Committee request that the applicant submit to the Islands Trust (insert details).

2. **Refer the application to the Advisory Planning Commission, Archaeology Branch and Local First Nations**

   The LTC may refer the application to the APC, Archaeology Branch, and Local First Nations for comment prior to further consideration of the application. Recommended resolutions are as follows:

   That the Gabriola Island Local Trust Committee refer application GB-RZ-2018.1 along with a copy of the staff report received by the LTC on July 12, 2018, to the Gabriola Island Advisory Planning Commission, Archaeology Branch, and Local First Nations for review and comment.

   That the Gabriola Island Local Trust Committee request staff and one trustee to attend the Advisory Planning Commission meeting to consider application GB-RZ-2018.1.

NEXT STEPS

Should the LTC proceed with the staff recommendation the applicant will be reimbursed $1300 for the public hearing portion of the application fee as per Section 3.6 of Gabriola's Development Fees Bylaw No. 245, 2007.

POLICY/REGULATORY

Islands Trust Policy Statement **Most relevant Directive Policies:**	**4.5 Coastal Areas and Marine Shorelands** 4.5.9 Local trust committees and island municipalities shall, in their official community plans and regulatory bylaws, address the compatibility of the location, size and nature of marinas with the ecosystems and character of their local planning areas. 4.5.10 Local trust committees and island municipalities shall, in their official community plans and regulatory bylaws, address the location of buildings and structures so as to protect public access to, from and along the marine shoreline and minimize impacts on sensitive coastal environments. 4.5.11 Local trust committees and island municipalities shall, in their official community plans and regulatory bylaws, address opportunities for the sharing of facilities such as docks, wharves, floats, jetties, boat houses, board walks and causeways. **5.5 Recreation** 5.5.4 Local trust committees and island municipalities shall, in their official community plans and regulatory bylaws, address: • the location and type of recreational facilities so as not to degrade environmentally sensitive areas, and • the designation of locations for marinas, boat launches, docks and anchorages so as not to degrade sensitive marine or coastal areas. 5.5.5 Local trust committees and island municipalities shall, in their official community plans and regulatory bylaws, address: • the identification of sites providing safe public access to beaches, • the identification and designation of areas of recreational significance, and • the designation of locations for community and public boat launches, docks and anchorages.
Gabriola Island Official Community Plan No. 166	This water lot is not within any Development Permit Areas. Marine (M) designation excerpts: **6.2 Marine Resources** Background: Marine shorelands and foreshore are highly vulnerable to the effects of development. The Islands Trust has the ability to adopt community plan objectives and policies and zone the surface of the water affecting the marine foreshore and water areas in the planning area. **Marine Resources Objectives** 4. To provide opportunities for the commercial uses of the foreshore and coastal waters provided that such uses do not detract from the marine waters' environmental integrity; 7. To encourage the sharing of docks and wharves. **Marine Resource Policies** a) **Except as specifically provided for**, the surface of the water in the Gabriola Planning Area shall be zoned Water General wherein the permitted uses shall include boat moorage and boat launching facilities (where suitable), associated with single-dwelling residential uses located on the adjacent upland, public parks, ecological reserves, marine navigational aids and publicly funded and operated boat launching facilities.

	b) The zoning bylaw shall include provision for zones for each of the following foreshore use categories: log storage; log dumping; aquaculture rearing and harvesting; **commercial marina operations**; and, marine transportation. f) **Existing marina operations in the Silva Bay area shall be zoned for marina commercial purposes.** "Commercial activities in the foreshore area include: log booming and storage areas primarily off the west central shore of Gabriola; BC ferry terminal facility at Descanso Bay; and **three commercial marinas and a yacht club out-station located in the Silva Bay area**." **l) Any future applications to establish a new marina or expand an existing marina shall be conditional on it being demonstrated that the use can be carried out while minimizing conflict with other recreational uses and no damage will occur to nearby areas of ecological significance.** **Marine Resources Advocacy Policies** t) Marinas shall be **requested** to install and maintain a public toilet.
Gabriola Island Land Use Bylaw No. 177, 1999	The water lot is currently zoned Water General (WG): **D.5.1.1 Permitted Uses** The uses permitted in Article B.1.1.1, plus the following uses and no others are permitted in the Water General (WG) zone: a. Permitted Principal Uses i. **boat and seaplane moorage, dockage, and boat launching facilities used for noncommercial purposes** and associated with upland residential uses on Gabriola Island ii. marine navigation aids iii. non-commercial boat launching facilities **D.5.1.2Structures** The structures permitted in Article B.1.1.2, plus the following structures and no others are permitted in the Water General (WG) zone: a. Permitted Structures i. Moorage buoys, floats, wharves, docks and other structures for the permitted uses set out in this zone. **D.5.1.3Regulations** The general regulations in Part B, plus the following regulations apply in the Water General (WG) zone: a. Structure Height Limitations i. The maximum height of: • floating structures is 3.0 metres (9.8 feet) above the water surface; and • **structures fixed to the bed of the sea is 5.0 metres (16.4 feet) above the high high water mark.** b. Structures Siting Requirements **i. The minimum setback for structures is 3.0 metres (9.8 feet) from any lot line, lease line or extension of an upland side lot line, with the exception of a lot line or**

	lease line that defines the boundary between the sea and the adjacent upland in which case there is no minimum setback. c. Prohibitions i. No buildings are permitted in this zone **ii. No float, wharf, dock, or other structure permitted in this zone may be used for a commercial or industrial use.**
Other Regulations	None identified.
Covenants	None. District Lot 311 is a lease (has no title), therefore no covenants registered on title.
Bylaw Enforcement	GB-BE-2012.5 – currently open file (commercial use of dock in WG zone) GB-BE-2014.11 – was regarding the associated upland lot. File closed.

SITE INFLUENCES

Islands Trust Conservancy	This proposal does not require a referral to the Islands Trust Conservancy.
Islands Trust Conservancy Regional Conservation Plan (2018-2027)	The proposal is not contrary to or at variance with the ITC RCP. The RCP does note that the Gabriola Island Local Trust Area (LTA) has eelgrass beds along approximately 20.8% of its foreshore, and conservation of the Gabriola LTA is a high priority within the context of the RCP.
Species/Ecosystems at Risk	None mapped.
Sensitive Ecosystems	See shoreline data below.
Hazard Areas	Steep slope mapping indicates low to moderate sloping on the foreshore.
Archaeological Sites	Remote Access to Archaeological Data (RAAD) mapping indicates both potential and known archaeological sites on the adjacent upland lot within 100 metres of the water lot. Notwithstanding the foregoing, and by copy of this report, the owners and applicant should be aware that there is a chance that the lot may contain previously unrecorded archaeological material that is protected under the Heritage Conservation Act. If such material is encountered during development, all work should cease and Archaeology Branch should be contacted immediately as a Heritage Conservation Act permit may be needed before further development is undertaken. This may involve the need to hire a qualified archaeologist to monitor the work.
Climate Change Adaptation and Mitigation	No anticipated impacts for this proposed rezoning
Shoreline Classification	Sediment Shoreline - Boulder/Cobble
Shoreline Data in TAPIS	Eelgrass (fringing, continuous) mapped Protected Area: Gabriola Passage Rockfish Conservation Area (restricts fishing)

STAFF REPORT

File No.: GB-6500-20 (Housing Options Review Project Phase 2)

DATE OF MEETING: July 12, 2018

TO: Gabriola Island Local Trust Committee

FROM: Sonja Zupanec, Island Planner
Northern Team

SUBJECT: Housing Options Review Project Phase 2 Draft Project Charter

RECOMMENDATION

1. **That the Gabriola Island Local Trust Committee endorse the Housing Options Review Project Charter - Phase 2, dated July 2018.**

2. **That the Gabriola Island Local Trust Committee request staff to prepare a work plan and budget for the Housing Options Review Project – Phase 2, and request funding confirmation from the Director of Administrative Services for the 2018/19 fiscal year.**

3. **That the Gabriola Island Local Trust Committee refer the July 2018 Staff Report regarding the Housing Options Review Project – Phase 2 to the Gabriola Island Advisory Planning Commission (APC) for input regarding a communications and engagement strategy to guide the project, and that staff and one trustee attend the meeting.**

REPORT SUMMARY

The purpose of this report is to: present a draft Project Charter based on the Gabriola Island Local Trust Committee (LTC) confirmed activities for a Phase 2 Housing Options Review Project (the project) for endorsement; and recommend that the LTC solicit Advisory Planning Commission (APC) input on a communications and engagement strategy.

BACKGROUND

At the June 14, 2018 regular business meeting the LTC passed the following resolutions:

GB-2018-036 It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee confirm the following activities for Phase 2 of the Housing Options (Official Community Plan/Land Use Bylaw) Review Project on the Projects List:

a) Review Official Community Plan policies respecting affordable and attainable housing, rental housing, seniors housing and special needs housing, and policies relating to social needs, social well-being and social development;
b) Consider the definitions of 'affordable housing' and 'attainable housing' in the Official Community Plan;
c) Explore opportunities to foster affordable, rental, seniors and special needs housing and associated services on Gabriola Island in collaboration with the Regional District of Nanaimo, health and housing service providers and community groups;
d) Review provisions for secondary suites above existing farm buildings in the Agricultural Land Reserve;
e) Consider opportunities for secondary suites on lots smaller than 2 hectares;
f) Consider an Official Community Plan designation for multi-dwelling housing;
g) Consider Official Community Plan density provisions for multi-dwelling housing;
h) Consider opportunities for mixed use buildings.

CARRIED

GB-2018-045
It was MOVED and SECONDED
that the Gabriola Island Local Trust Committee replace Housing Options Review Project with Housing Options Review Project Phase 2 and update the activity accordingly.

CARRIED

ANALYSIS

Draft Project Charter

In order to initiate the project, staff has prepared a draft project charter (Attachment 1) for LTC endorsement. The draft project charter incorporates LTC direction and prioritizes intergovernmental collaboration with Snuneymuxw First Nation and groundwater water conservation as overarching considerations for the project.

Budget Work Plan

In order to initiate work on the project, the project charter must be endorsed by the LTC and a budget for 2018/2019 must be approved by the Director of Administrative Services. For the current fiscal 2018/2019 budget, the development of a comprehensive communications and engagement strategy is the primary deliverable to guide the multi-year project. Additional budget approvals will be required as the project advances.

Advisory Planning Commission Referral

The APC can assist the LTC by providing recommendations on specific elements of a communications and engagement strategy for the project. This may include:

- engagement objectives;
- stakeholder identification;
- engagement phases; and
- Communications and consultation methods.

Staff can incorporate APC recommendations into a draft communications and engagement strategy for LTC consideration in fall 2018.

NEXT STEPS

Upon LTC endorsement of the Project Charter, staff can prepare a budget work plan for Director's approval. Once the 2018/2019 budget is approved staff can prepare a referral to the APC to solicit input on considerations for the communications/engagement strategy. Recommendations can be forwarded to the LTC in September 2018.

Submitted By:	Sonja Zupanec, RPP, MCIP Island Planner	June 25, 2018

ATTACHMENTS

1. Draft Project Charter - Housing Options Review Project Charter Phase 2 – July 2018

Housing Options Review Project - PHASE 2 Charter *DRAFT* v 1.0

Gabriola Island Local Trust Committee Date: July 2018

Purpose To increase housing options on Gabriola Island through Official Community Plan (OCP) policies and Land Use Bylaw (LUB) regulations, in a manner which supports the Object of the Islands Trust, strengthens relations with Snuneymuxw First Nation and builds on the findings of the 2018 Northern Region Housing Needs Assessment.

Background This project builds on the Housing Options Review Project PHASE 1 completed in June 2018, which focused on secondary suites on lots 2 hectares or larger. Phase 2 will consider a broader range of housing issues, and the potential for increased density on the island to accommodate increased housing options. Support for the Islands Trust's "preserve and protect mandate, including a focus on indigenous housing needs and protecting the island's groundwater supply/water conservation, is an overarching consideration.

Objectives

- Develop an Engagement and Communication Strategy to prioritize consultation methodology and topics.
- Strengthen relations with Snuneymuxw First Nation and incorporate First Nation perspectives into policy/regulatory options.
- Explore opportunities to foster affordable, rental, special needs and seniors housing and associated services on Gabriola Island in collaboration with Snuneymuxw First Nation, the RDN, health and housing service providers and community groups.
- Develop a strategy to address housing continuum gaps identified in the 2018 Northern Region Housing Needs Assessment Report.
- Ensure proposed policy/ regulatory changes are consistent with the Object of the Islands Trust and Islands Trust Policy Statement, with focus on water protection/conservation.

In Scope

First Nations Relations and Perspectives

- Establish opportunities to incorporate First Nations perspectives on indigenous housing needs and intergovernmental collaboration for effective decision making.

Development Permit Areas:

- Consider new Development Permit areas for water conservation; form and character; and protection of biodiversity.

Affordable/Seniors/Special Needs Housing:

- Review definition of "affordable housing".
- Review OCP policies respecting affordable, rental, seniors, special needs housing, social needs, social well-being and social development; develop a new 'housing first' policy.
- Review amenity zoning and housing agreements; density bank policies; opportunities for rental zoning.

Secondary Suites:

- Review provisions for secondary suites above existing farm buildings in the ALR.
- Consider secondary suites on lots smaller than 2 hectares.

Multi-dwelling and Mixed Use:

- Consider OCP designations, density provisions, LUB regulations, and Development Permit guidelines for multi-dwelling housing and mixed use buildings.

Out of Scope

- Review of minimum lot sizes for subdivisions.
- Secondary suite provisions for lots 2 hectares or larger outside the ALR (*completed during Phase 1 Project*).
- Review of home occupation regulations.
- Review of marina/live-aboard regulations.
- Review of DP Areas 1 (Tunnel), 2 (Lock Bay Area), 3 (Riparian Areas), 5 (Gabriola Pass Area), 6 (Escarpment Areas), 9 (Light Industrial Use).

Workplan Overview

Deliverable/Milestone	Date
LTC endorses project charter; referral to APC for comment on communication/engagement strategy considerations.	July –September 2018
Develop Engagement and Communication Strategy for LTC endorsement.	2018/2019
Initiate consultation and engagement on review topics.	2019
Draft bylaw(s) presented to LTC for review.	2020
Community consultation and early referrals of draft bylaw(s)	2020-2021
Legislative process for proposed bylaw(s)	2021
Adoption of proposed bylaw(s) and communications materials	Spring/Summer 2022

POLICIES AND STANDING RESOLUTIONS

Updated: June 14, 2018

No	Meeting Date	Resolution No.	Issue	Policy and Description
1.	January 29, 2010	GB-025-2010	Communication Towers and Antennae	It was MOVED and SECONDED that the Gabriola Island Local Trust Committee adopt the following standing resolution: • Proposals for any new or expanded communication towers and antennae require an application to the Gabriola Islands Local Trust Committee. • The application process shall comprise a public consultation component, which includes at least one notification to neighbours, one public meeting and one advertisement in both local newspapers. • The public consultation process shall be determined by the Local Trust Committee after initial review of the proposal; however, as a minimum, the proponent shall give written notice to Islands Trust Northern Office staff and the Snunéymuxw First Nation, all owners and residents of properties within a 2 kilometre radius of the subject property where the facility is proposed. The required notice shall include the following information: o the proposed location of the tower on the subject site o a description of the predicted power density level of the antenna/tower o methods to mitigate any aesthetic or visual impact o description of the natural environment, any sensitive ecosystems or other important habitat areas within 120 metres of the subject property and mitigation of impacts to such areas o physical details and example illustrations of the tower including its height, colour, type and design o the time and location of a public meeting and advertising o the name and contact information of the contact person employed by the proponent o the name and all contact information of the Islands Trust planning staff available for public comments and questions regarding the proposal; and o the proponent may be required to enter into a cost recovery agreement with the Islands Trust, in order to offset application processing costs incurred.
2.	June 14, 2018	GB-2018-040	Processing non-medical cannabis retail license applications	**It was MOVED and SECONDED** that the Gabriola Island Local Trust Committee adopt the following standing resolution with respect to the processing of non-medical cannabis retail license applications: • Proposed or amended licenses for non-medical cannabis retail establishments require an application to the Local Trust Committee;

				• The application process shall comprise a public consultation component, which includes at least one notification to neighbours, one public meeting, posting of public notices and one advertisement in a local periodical; • The public consultation process shall be determined by the Local Trust Committee after initial review of the proposal; and • However, as a minimum, the Local Trust Committee will mail or otherwise deliver a notice to all owners and residents of properties within a 500 metre radius of the subject property where the establishment is proposed at least 10 days before adoption of a resolution providing comment on the application. The required notice shall include the following information: ○ Name of the applicant and a description of the proposal in general terms; ○ The location of the proposed establishment and the subject site; ○ The place where, and date and time when, both a public meeting will be held and a resolution of the local trust committee considered; ○ The name and contact information of the Islands Trust planning staff member who can provide copies of the proposed or amended license application; and ○ How public comments may be submitted to the Local Trust Committee.

Housing Needs Assessments

DATE OF MEETING:	July 12, 2018
TO:	Gabriola Island Local Trust Committee
FROM:	David Marlor, Director Local Planning Services
SUBJECT:	Housing Needs Assessment Report

RECOMMENDATION

1. That the Gabriola Island Local Trust Committee receive the "Housing Needs Assessment, Northern Region of Islands Trust" report prepared by Dillon Consulting dated June 21, 2018; and

2. That the Gabriola Island Local Trust Committee request Staff to publish the "Housing Needs Assessment, Northern Region of Islands Trust" report prepared by Dillon Consulting dated June 21, 2018 on the Islands Trust website.

REPORT SUMMARY

The purpose of this report is to provide a Housing Needs Report to the Gabriola Island Local Trust Committee and to meet the requirements of the new legislation on Housing Needs Reports.

BACKGROUND

In the 2017/18 Fiscal Year budget, Trust Council approved $40,000 to undertake Housing Needs Assessments for Gabriola, Denman, Gambier, Hornby, Lasqueti, and Thetis islands using similar methodology undertaken on a previous Salt Spring housing needs assessment. This work was undertaken by the Local Planning Committee and the final report was submitted to Trust Council in June 2018.

The Northern Region Housing Needs Assessment (HNA) looks at the population, current housing stock, and present and future housing needs of Gabriola, Hornby, Denman, Thetis, Lasqueti and Gambier and Keats Islands. It is attached as Appendix 1. The report has a general finding that local trust areas in the Northern Region have a short supply of rental housing: "The key housing need for all of the islands was the need for safe, secure, year round affordable accessible appropriate rental accommodation."

The report quantifies the number of affordable housing units identified as needed by the population projections estimated for each island. Note that in this context, a housing unit could refer to a secondary suite, single family dwelling, cottage, or other. It does not necessarily demand creating new lots or increases in density over that provided by existing zoning. Further analysis is required to understand how each island's settlement pattern could accommodate the projected need within the current zoning and policy framework of the Official Community Plans.

The HNA provides statistical analysis of the demographic profile and housing stock on the islands. Qualitative research methods were used to supplement the quantitative data. Interviews with key stakeholders and community surveys offer additional information to assist with interpreting the census data. The limitations of the methodology should be noted. As is often the case with small populations, the census data on some islands is unreliable or has been suppressed by Statistics Canada. A key recommendation of the report is to conduct a separate census for the Islands Trust Area.

RESULTS:

The following themes can be generalized for the entire Northern region; the report provides data and statistical analysis for each island:

- Islands are characterized by an older demographic; there is a higher percentage of seniors living on the islands than regional and provincial averages.
- Islanders are lower income than their regional counterparts; the median incomes are much lower than those of BC and adjacent communities in the region.
- There is disparity between the cost of housing and people's income levels. Median housing costs are much greater than the median incomes overall.
- Renters are vulnerable: A high percentage of renters pay more than 30% of their gross annual income on shelter; many renters therefore do not have housing they can afford.[1]
- Vacation homes: The islands have a high percentage of non-resident property owners – much of the housing is not occupied by "usual residents."
- Unhealthy conditions – a proportion of the housing stock, especially rental units, are subject to mould, inadequate heat, and lack potable water and adequate septic services.
- Insecure tenure – many renters are subject to seasonal evictions as non-resident property owners may rent their homes out, but only to residents for part of the year.
- Lack of housing options – the islands are characterized by low density, rural settlement patterns - the dominant housing form is the single family dwelling. Most rental units on the islands are found in full houses, portions of houses, suites, and cottages. Many people also live in mobile home, travel trailers, and accessory buildings.

Islands Trust Community Housing Strategy

Improving the availability of affordable, accessible, and appropriate housing has been a strategic priority for Islands Trust Council over the 2014-2018 political term. Over the course of the term, this has been largely pursued through the work of Local Planning Committee:

1. June 2013, Local Planning Committee hosted a community housing forum with over 70 participants from across the region. The forum showcased examples of affordable/community housing throughout the Trust Area.
2. Completed a baseline inventory of housing policies and regulations for each LTA across the Trust Area
3. Completed the final report: Community Housing in the Islands Trust Area and advanced through Trust Council 15 recommendations for action.

[1] Canada Mortgage and Housing Corporation (CMHC) and BC Housing define affordable housing as that which does not cost more than 30% of a household's gross annual income.

4. Completed Housing Needs Assessment for the Northern and Southern regions. Islands Trust now has a complete data set identifying housing needs in each region.
5. Established the administrative capacity for the administration of housing agreements by Islands Trust:
    - A housing agreement guide for planners
    - A housing agreement reference list
    - An application guide for affordable housing proponents
    - A roles and responsibilities checklist
    - Housing Agreement Templates
    - Information Brochure (on-going)
    - Monitoring Procedure (for Leg. Clerks or potential new Project Coordinator job)
    - Annual Monitoring Letter Template
    - Monitoring and Enforcing Guide

Trust council has directed staff to update the Community Housing report and consider creating a Trust wide community housing strategy designed to meet the needs identified in the Housing Needs Assessments. Such a strategy could include recommendations for Local Trust Committee land use planning processes, Trust Council advocacy, and communications to be pursued by Trust Council in the 2018-2022 political term.

Provincial Housing Needs Reports Legislation

In Spring 2018 the Provincial Government gave Royal Assent to Bill 18, 2018, amendments to the Local Government Act that requires that local governments, including local trust committees, adopt housing needs reports, update those reports every five years, and consider those reports when undertaking Official Community Plan text or mapping amendments that relate to housing.

Bill 18, 2018 comes into effect on adoption of regulation by the Lieutenant Governor-in-council, which is expected sometime in 2018.

The transitional section of the Bill 18, 2018 states that adoption of a housing needs housing needs report under Section 585.31(3)(a) of the legislation does not apply if a local government, on or after January 2, 2018 and before this section comes into force, receives, by resolution, an interim housing needs report, and publishes the interim housing needs report. Under the transitional section of Bill 18, 2018, this interim housing needs report is deemed to be the first housing needs report.

ALTERNATIVES

1. **Not Receive or Publish the Housing Needs Assessment**

    Not received or publish the "Housing Needs Assessment, Northern Region of Islands Trust" report prepared by Dillon Consulting dated June 21, 2018. In this case, the information will not be available to the public who may wish to engage in developing affordable housing on the island. The Local Trust Committee would have to undertake a housing needs report within three years of the enactment of Bill 18, 2018 (which is expected by regulation this year).

NEXT STEPS

Staff will publish the report to the Islands Trust website, and update staff reports to ensure that consideration of the Housing Needs Assessment is undertaken for Official Community Plan text and mapping amendments that affect housing.

Local Trust Committees can consider making housing a top priority and engaging a community process that considers how land use bylaws and official community plans can be amended to respond to the needs identified in the reports.

Executive Summary

This Housing Needs Assessment was commissioned by the Islands Trust to better understand the current housing issues, and to provide support for organizations and not-for-profit groups who may wish to pursue the development of affordable housing.

While each island is unique, they share many of the same housing and population characteristics.

Denman Island

Based on the population projections, there could be a need for potentially 165 new residential units in the next 25 years. Based on the fact that 48% of the residents are in Housing Core Needs category, Denman will require up to 80 affordable housing units. This translates into three to four units per year. There are two non-profit community groups on Denman Island working on creating multi-unit affordable housing projects for seniors and working people. Employees are in critical need for affordable secure rental accommodations. One of the indicators is that Encom has provided a parcel of land on their maintenance yard for ferry workers to move recreational vehicles on-site for semi-permanent accommodation.

Gabriola Island

Should the population of Gabriola grow in relation to the region to 5,295 by 2041, it will require an increase in residential units of 686 units or 28 units per year, and with 42.6% of these units needing to be “affordable”. Gabriola would require 12 affordable housing units per year for each of the 25 years.

Supporting this data is the fact that there are over 130 vulnerable people who access the food bank and utilize the social services provided through People for a Healthy Community. In survey identified many illegal and inappropriate housing units on Gabriola, including garden sheds, mobile homes, recreational vehicles, and summer cottages that have no heat, are improperly insulated, and have no running water or potable water.

Gambier and Keats Islands

The available population information for Gambier and Keats Islands is statistically insignificant; the full-time population is scattered among small communities not connected to each other by roads.

Hornby Island

Based on the population projections, there could be a need for potentially 158 residential units in the next 25 years. Based on the 2016 Census, 41% of the total population falls within the no, low and low-moderate income levels. The 2008 Housing Needs on Hornby and Denman Island identified a total housing need of 97 units for renters and seniors. Based on the population growth projected for 158 units and 41% need for affordable rental, Hornby now requires between 65 and 97 affordable housing units. This would require between three and four affordable rental housing units to be constructed each year. The Hornby Island Elder Housing Society currently has 24 people on the waiting list for a senior's residence.

Lasqueti Island

Because the population is so small, the census data is not reliable. Therefore, this study depended on anecdotal and qualitative evidence. It appears that there is a need for more affordable housing. With currently one affordable unit constructed, the community would like to develop more affordable housing. The estimate of affordable housing units required is between four and six for seniors. The other area of housing in demand is larger lots for family and small farm operations. There are limited parcels of land (and limited agricultural land) on the island. Some form of cooperative housing would facilitate young families to live and work on Lasqueti Island. Through the private ferry firm, employee housing is provided for ferry workers in a purchased house at the ferry terminal. Anecdotal information at the stakeholder meeting identified a minimum of 10 people that were currently living in inappropriate accommodations but could not find anything else.

Thetis Island

The population projections for Thetis range from 420 to 477 in the next 25 years. This is could translate into the need for 15 new affordable housing units over the next 25 years. During the stakeholder meetings, the Ferry Captain indicated that there is a shortage of accommodation for ferry workers. As with Lasqueti Island, the population is so small that some of the Census data is unreliable; however, anecdotally, there is a need for affordable housing on Thetis.

All islands face, in addition to the adequacy criteria, the issue of houses in poor repair, improper insulation and heating systems, lack of potable water, and issues of mould. Many homes on the islands were originally constructed as summer cottages and may not have been upgraded sufficiently for year round living. Rental vacancies are absorbed immediately.

Additionally, this report accepts that home ownership is not feasible for everyone even if the house itself seems to be affordable. The new mortgage regulations require a down payment of between 5 and 25% with a risk assessment of the interest rate to ensure the buyer can afford an interest rate 2% higher than their approved rate. Service industry employees working minimum wage or even more would find it very difficult to save the down payment while renting. Furthermore, some people do not aspire to home ownership due to maintenance and ongoing cost issues.

The key housing need for all of the islands was the need for safe, secure,year round affordable accessible appropriate rental accommodation. This is critical for all of the communities.

While this housing needs assessment was not specifically identified as an affordable housing needs assessment, it is clear that affordable, appropriate, accessible housing is required on each island in varying numbers. The provision of affordable housing can be accomplished by a number of actions:

- Local not-for-profit organizations can acquire land through donation and apply for funding to construct affordable housing;
- The Local Trust Committee can strengthen their affordable housing policies and direction in the Official Community Plan (OCP) to support various forms of affordable housing;
- Zoning Bylaws could contain more flexibility for affordable housing; and
- The Local Trust Committee could consider entering into Housing Agreements with individual owners of housing and not-for-profit organizations to ensure affordable housing stays affordable in the long-term.

1.0 Introduction

Housing is a basic need. With the rising costs of living, affordable housing is becoming a significant issue in virtually every community. The Islands Trust has acknowledged that there are housing needs on the northern Gulf Islands and through a Request for Proposals, have selected a consultant to complete this study to quantify the housing needs for each of the northern islands.

Several Local Trustees have identified the lack of affordable rental housing as a concern on their islands. Several islands have housing groups that are trying to fill the housing gaps. Recent changes in mortgage qualification have put home ownership out of reach for many people.

This Housing Needs Assessment was not specifically identified as an affordable housing study, but it became evident very quickly that the issue is not home purchase, but affordable, secure, year round rental accommodation for all demographics and household types.

This study looks at Gabriola, Hornby, Denman, Thetis, Lasqueti and Gambier and Keats Islands in terms of their population, current housing stock, and present and future housing needs.

One of the directions provided by the Islands Trust to the consultants was that this report should mirror the analysis provided in the 2015 Salt Spring Island housing needs analysis, to allow the Islands Trust and housing providers to compare between islands. The Salt Spring Island Affordable Housing Needs Assessment (December 2015) had two purposes:

- To update affordable housing needs data; and
- To be a resource for community and stakeholder engagement.

The scope of work for the Housing Needs Assessment for the Islands Trust Northern Region was to:

- Complete a housing needs assessment for the Northern Region of the Islands Trust;
- Establish baseline information to enable long-term planning needs;
- Provide documentation to support applications for funding; and
- Provide data to guide planning and Bylaw development.

The 2016 Community Housing in the Trust Area Report provided seven recommendations:

1. That Trust Council review the Islands Trust Policy Statement to ensure that it:
    a. Includes clear and well-thought out definition of affordability;
    b. Includes clearly articulated vision, goal and objectives for affordable housing;

c. Gives affordable housing a greater profile for its role in sustainable communities; and
d. Includes a reference to affordable housing in its policy direction to Local Trust Committees and municipalities.

2. That Trust Council consider a coordination role for housing needs assessments between the various local Trust Areas to achieve efficiencies, compatibility and allow for consolidation;
3. That Trust Council establish a budget for housing needs assessments to be conducted at the regional level and to be updated with each census;
4. That Trust Council request the Local Planning Committee to commission one or more regional housing needs assessment(s) that follow consistent methodologies and can be updated with each census;
5. That Trust Council allocate a budget to have in-house staff design and implement a program to hold and administer housing agreements on behalf of Local Trust Committees;
6. That Trust Council explore the potential for expanding their advocacy role to senior levels of government for increased funding for affordable housing; and
7. That Trust Council direct staff to explore and report back on the potential for the creation of an affordable housing Land Trust.

The recommendations provided in **Section 10** provide some direction for future housing needs assessments strategies.

1.1 Defining Affordability

In Canada, the majority of the housing stock is provided by the private sector. However, not all members of society have the financial means to participate in the private housing market, nor is the marketplace necessarily able to meet distinct housing needs of some groups; such as, persons with disabilities. In instances when households whose needs cannot be met by the marketplace, local governments, community organizations, non-profit and cooperative groups, and the private sector work together to provide affordable housing solutions.

Generally, affordable housing refers to housing units that are affordable by that section of society whose income is below the median household income. The definition of affordable housing varies; however, Canada Mortgage and Housing Corporation (CMHC) and British Columbia define affordable housing as housing that does not cost more than 30% of a household's annual income, which includes utilities. But this considers only the cost of the housing. Other factors involved in the provision of housing for low and middle income families are physical accessibility and appropriateness. Statistics Canada, in collaboration with the CMHC, has produced the core housing need indicator for the 2016

Census. This defined as household in core housing need as one who's dwelling is considered unsuitable, inadequate or unaffordable, and whose income levels are such that they could not afford alternative suitable and adequate housing in their community.

For the purpose of this Housing Needs Assessment, we have used the traditional definition for affordable, but considered the elements of accessibility and appropriateness.

Accessibility is a challenge for the islands where there are steep slopes and driveways, gravel roads and driveways, no sidewalks, no street lights, and often raised bungalows. This causes issues for people who may be infirm or have physical handicaps.

Appropriateness incorporates the type of housing for the residents. A family of five may require three bedrooms. This would also consider the accommodation and the elements of heating system, full kitchen, potable water, sanitary sewer system, and lack of mould and mildew.

The Housing Continuum is a progression of housing from homelessness and emergency shelters to full private market housing.

Affordable housing is provided through not-for-profit organizations, government subsidies and landlords who rent for below market rates. This Housing Needs Assessment provides an indication of what the need for affordable housing is on the Northern Region Islands, but does not provide an action plan to implement the delivery of the housing needed. The biggest concerns of the residents and Trustees are the increased density that generally comes with affordable housing and the means to ensure that the housing remains affordable. To ensure affordable housing stays affordable, the Local Trust Committees could work with the proponents and develop a housing agreement, and could provide more proactive

policies in the Official Community Plan (OCP) to support affordable housing, increased density, appropriate zoning districts, and direction for "partnerships" with the not-for-profit organizations.

1.2 Approach and Assumptions

This assessment has used a combination of primary data (surveys), secondary data (census and past reports) and stakeholder interviews. It is felt that the combination has provided a balanced view of each island and their housing needs.

Census data was gathered at the Designated Place (DPL) geographic level for Denman, Gambier and Keats, Hornby, Lasqueti, and Thetis Islands- a broader census subdivision (CSD) level would have captured too large an area for each of these islands. Gabriola Island census data was gathered at the CSD geographic level, as the area was appropriate for the island, and a greater amount of information was available at this level.

There are some limitations to the study:

- Data limitations: due to the small population of some of the islands being assessed, Statistics Canada data was too unreliable to be published or was supressed due to small numbers;
- Lack of comprehensive: rental market data at an appropriate geographic level for this study; and
- Lack of homelessness: counts and individual island census.
- There is some concern that the census does not capture many of the vulnerable or "cash only" residents and that there is a "ghost" population on each island. These are the people that live on the island, may work jobs for cash, may not complete an income tax application and may reside in illegal residences.

For the purpose of this report, some assumptions have been made:

- The population projections for the islands have been calculated using two methods: the first is a linear projection based on historical population; and the second is a calculation based on a consistent proportion of the BC Stats' Population Extrapolation for Organizational Planning with Less Error (P.E.O.P.L.E.) Sub-provincial population projections for the local health area of each island.
- The census data may not account for people living in informal housing situations that may have been missed during the census count.
- Bylaw enforcement has a list of open flies for illegal suites. Because Bylaw enforcement is conducted on a complaint basis only, while not corroborated by any available data, we have assumed that this reflects 10 to 20% of the actual number of illegal suites.

- The 2016 Federal Census data is available but is not always broken down for the small islands, making it difficult to get the same data for each island.
- Self-reported home value is assumed to be related to the market assessment provided for the purposes of property taxes.

1.2.1 Rounding

Note that, throughout this report, there may be slight variations in totals between tables, as Statistics Canada rounds to a base of 5 for many counts, potentially resulting in variations between totals, depending on the variable.

1.2.2 Residential Units

Throughout this report the reference is made to residential units. A residential unit is defined as a habitable dwelling, which can take the form of: a single detached house, secondary unit, carriage house, apartment unit, or cottage. This does not refer to lots or parcels of land. When the study identifies future need for residential units, often these units can and will be accommodated on existing undeveloped lots that currently exist on every island. This does not automatically require subdivision or rezoning unless the development proposed is to include a multi family housing project.

1.3 Methodology

The Islands Trust Northern Region Housing Needs Assessment follows, where possible, the same methodology used in the Salt Spring Island Housing Needs Assessment (JG Consulting Services Ltd, 2015). This will allow for compatible baseline data across Islands Trust areas. As described in **Section 1.2** above, there were some limitations in the availability of census and other quantitative data for those islands with small populations. This made direct comparison with Salt Spring Island, which has a larger population, difficult. Quantitative data, primarily from the Statistics Canada census and national household survey was supplemented by qualitative interview and focus group data, as well as a community survey.

The methods used in the creation of this report are as follows:

1. **Background review** of existing reports and studies, and demographic analysis for each island using 2016 census data.
2. **Stakeholder consultations** with each island, including people involved in not-for-profit housing organizations, developers, and community groups. The primary concerns and issues from each meeting are summarized in the individual island sections of this report.

3. **Online Survey** was prepared and posted on the Islands Trust website. This was open to the larger community and was used to gather broader community perspectives and anecdotal information.
4. **Data analysis and reporting** based on information gathered through stages 1 and 2, in addition to supplementary data from other sources as available, including Multiple Listing Source (MLS) listings and BC Stats. This analysis describes the 'ideal' housing supply based on current demographics in the Islands Trust Northern Region, the current supply, and identifies gaps in this supply to assist the Island Trust and housing system stakeholders to begin to address needs.

1.3.1 Community Survey

The community survey was used to supplement stakeholder meetings and gain a broader community perspective. The survey was distributed online and paper copies of the survey were also distributed at various locations throughout the Islands. A sample survey with questions used can be found in **Appendix B**. **Table 1** below provides response rates and totals for each island.

Table 1: Community Survey Responses

Island	Number of Responses	% Island Population Responses
Denman Island	102	8.7%
Gabriola Island	404	10.0%
Gambier and Keats Islands	38	15.4%
Hornby Island	37	3.6%
Lasqueti Island	64	16.0%
Thetis Island	81	20.8%
Other	16	n/a
Total	742	10.2%

The response to the survey was significant (with the exception of Hornby Island which only had a 3.6% return). This is calculated as a percentage of the total population. The response rate is higher if we compare it to the adult population only.

1.4 Report Outline

This report looks at each island individually, and then provides a summary and recommendations. The Housing Needs Assessment for each island starts with the 2016 Federal Census data. This is the most current census data available. For some of the data, it is not broken down in the same level of detail for Gambier and Keats, and Lasqueti. In addition, there is little local data to support the census such as a local census or a homelessness count.

The next source of data was the online survey completed by over 750 residents of the Northern Region. Other sources included information provided by stakeholders at island meetings, research local groups have undertaken (such as the employee survey conducted by the Gabriola Chamber of Commerce) and information from groups making applications for funding. This provides an analysis of the housing needs with the key factors being demographics (including household characteristics) and income. Growth projections were prepared for each island, and a summary and recommendations have been provided.

2.0 Population Projections

This section provides the population projections for each island. The projections have been calculated in two ways to provide a range of population for each island.

The first method is a straight line projection based on population figures from the 2006, 2011 and 2016 censuses. This calculates an average of the population of each island over the three federal census years and projects the growth based on the last 10 years. This projection is based on historical population.

The second method for population projections is based on BC Stats' P.E.O.P.L.E. resource (BC Stats 2017). BC Stats does not publish population projections at the individual island levels so the rate of population increase was developed using the local health area (LHA; **Table 2.1**). The second method uses a projection based on the percentage of the health region within which the island is located. This provides a projection based on potential demand. BC Stats' P.E.O.P.L.E. also provides projections for households and tables for each Island were created using the same methodology outlined above.

Table 2.1: Islands Trust Northern Region Local Health Areas

Island	Local Health Area
Denman Island	Courtenay Local Health Area
Gabriola Island	Nanaimo Local Health Area
Gambier and Keats Islands	Sunshine Coast Local Health Area
Hornby Island	Courtenay Local Health Area
Lasqueti Island	Qualicum Local Health Area
Thetis Island	Ladysmith Local Health Area

As projections, these numbers may not represent the actual change in population on the island, due to unforeseen economic circumstances, land use planning policies, and other government policies and regulation. Regardless, the projections provide an indication of regional population pressures on the 25 year horizon. It is noted that based on the limited growth options on each island due to, lack of piped water and sanitary sewer systems, and environmental limitations, the higher growth projections are unlikely to be achieved. However, it provides a high projection that could be achieved if other obstacles were met.

Figure 2.1 illustrates the percentage population change for each island for comparison. More detail on population projections for each island can be found in the following subsections.

It is also noted that outside or off-island market forces influence population changes. For example, if the American dollar is strong compared to the Canadian dollar, the islands may see significant American purchases. Also, the cost of housing in the lower mainland has driven many young families to seek other more affordable locations to live and work. Another market force is homeowners in the lower mainland selling their homes and purchasing less expensive homes on Vancouver Island or the Gulf Islands. These forces are beyond the control of the individual island and the Islands Trust.

Figure 2.1: Population Change 2006 - 2016

The following sections project the population for each island. There are many ways to calculate population projections. As noted above and to be consistent we have used two methods: historical Straight Line and the BC Stats' P.E.O.P.L.E. projections. These projections will vary; thereby, providing a range of growth potential for each island. The Straight Line projection uses historical data with no assumptions, but projects the historic trend of population. The P.E.O.P.L.E projection makes assumptions based on the larger health region growth and development that may not reflect the unique circumstances of the Gulf Islands in the Northern Region of the Islands Trust.

2.1 Denman Island Population Projections

Based on the straight line historical projection, Denman Island's population could grow to 1,300 people in the 25 year time frame.

Figure 2.2: Denman Island Population Projection (Straight Line Projection) (Statistics Canada 2017a)

Denman Island's 2016 population of 1,170 individuals was 1.8% of the Courtenay LHA population of 64,847. For the purposes of this projection, it is assumed that the Denman Island's portion of the total Courtenay LHA will remain constant throughout the projection period.

Table 2.2: Denman Island Population Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	1,170				
2021	1,239	69	5.9%	69	5.9%
2026	1,309	70	5.6%	139	11.5%
2031	1,376	67	5.1%	206	16.7%
2036	1,426	50	3.7%	256	20.3%
2041	1,496	69	4.9%	326	25.2%

Based on the P.E.O.P.L.E. projection, over the next 25 years, Denman Island's population could grow by 326 people (a cumulative 25.2% increase). At the island's current average household size of 2.0 (based on the Statistics Canada stats), this would require approximately 163 new housing units over the next 25 years.

In 2016, Denman Island's 590 households represented 2.0% of households in the Courtenay LHA. This household projection finds that there could be an additional 150 households over the next 25 years on Denman Island.

Table 2.3: Denman Island Household Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	590				
2021	625	35	5.9%	35	5.9%
2026	654	29	4.7%	64	10.6%
2031	682	28	4.3%	92	14.8%
2036	711	29	4.2%	121	19.1%
2041	740	30	4.2%	150	23.2%

2.2 Gabriola Island Population Projections

Based on the straight line historical population, Gabriola's population could decrease from 4,050 in 2016 to approximately 3,990 in 2041 or an increase to 5,312 in 25 years based on the P.E.O.P.L.E. projection.

Figure 2.3: Gabriola Island Population Projection (Straight Line Projection) (Statistics Canada 2017b)

Gabriola Island's 2016 population of 4,033 individuals was 3.6% of the Nanaimo LHA population of 111,462. For the purposes of this projection, it is assumed that Gabriola's portion of the total Nanaimo LHA will remain constant throughout the projection period.

Table 2.4: Gabriola Island Population Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	4,033				
2021	4,304	271	6.7%	271	6.7%
2026	4,574	270	6.3%	541	13.0%
2031	4,831	257	5.6%	798	18.6%
2036	5,023	192	4.0%	990	22.6%
2041	5,295	272	5.4%	1,262	28.0%

Based on this method, over the next 25 years, Gabriola Island's population could grow by 1,262 people (a cumulative 28% increase). At the island's current average household size of 1.9 (Statistics Canada 2017b), this would require approximately 664 new housing units over the next 25 years.

In 2016, Gabriola Island's 2,140 households represented 4.4% of households in the Nanaimo LHA. This household projection finds that there could be an additional 735 households over the next 25 years on Gabriola Island.

Table 2.5: Gabriola Island Household Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	2,140				
2021	2,282	142	6.6%	142	6.6%
2026	2,422	140	6.1%	282	12.8%
2031	2,572	150	6.2%	432	19.0%
2036	2,726	154	6.0%	586	25.0%
2041	2,875	149	5.5%	735	30.4%

2.3 Gambier and Keats Islands Population Projections

Gambier and Keats Islands' 2016 population of 247 was 0.8% of the Sunshine Coast LHA population of 29,243. For the purposes of this projection, it is assumed that the Gambier and Keats Islands' portion of the total Sunshine Coast LHA will remain constant throughout the projection period. It should be noted that projections for Gambier and Keats, and any dissemination of Federal Census information is not possible. Due to the small size, Statistics Canada will not provide detailed information due to privacy issues.

Figure 2.4: Gambier and Keats Islands Population Projection (Straight Line Projection) (Statistics Canada 2017c)

Table 2.6: Gambier and Keats Islands Population Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	247				
2021	262	15	6.0%	15	6.0%
2026	276	14	5.5%	29	11.5%
2031	290	14	5.0%	43	16.5%
2036	301	11	3.6%	54	20.2%
2041	315	14	4.7%	68	24.9%

Over the next 25 years, Gambier and Keats Island's population could grow by 68 people (a cumulative 24.9% increase). At the Gambier and Keats Island's current average household size of 1.7, this would require approximately 40 new housing units over the next 25 years.

In 2016, Gambier and Keats Island's 145 households represented 1.1% of households in the Sunshine Coast LHA. This household projection finds that there could be an additional 27 households over the next 25 years on Gambier and Keats Islands.

Table 2.7: Gambier and Keats Islands Household Projection (BC Stats 2017)

Year	Population	Increase	% increase	Cumulative # Increase	Cumulative % Increase
2016	145				
2021	154	9	6.5%	9	6.5%
2026	160	5	3.5%	15	10.0%
2031	164	4	2.5%	19	12.6%
2036	168	4	2.5%	23	15.1%
2041	172	4	2.6%	27	17.6%

Therefore the population range for Gambier and Keats is 190 to 315 people.

2.4 Hornby Island Population Projections

The historical straight line projection for Hornby Island demonstrates a population reduction over the next 25 years from 1,016 to 850.

Figure 2.5: Hornby Island Population Projection (Straight Line Projection) (Statistics Canada 2017d)

Hornby Island's 2016 population of 1,016 was 1.6% of the Courtenay LHA population of 64,847. For the purposes of this projection, it is assumed that the Hornby Island's proportion of the total Courtenay LHA will remain constant throughout the projection period.

Table 2.8: Hornby Island Population Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	1,016				
2021	1,076	60	5.9%	60	5.9%
2026	1,136	60	5.6%	120	11.5%
2031	1,195	58	5.1%	179	16.7%
2036	1,238	44	3.7%	222	20.3%
2041	1,299	60	4.9%	283	25.2%

Over the next 25 years, Hornby Island's population could grow by 283 people (a cumulative 25.2% increase). At Hornby Island's current average household size of 1.8, this would require approximately 157 new housing units over the next 25 years. Therefore the population projection range for Hornby Island is between 850 and 1,300 people in the 25 year time frame.

In 2016, Hornby Island's 560 households represented 1.9% of households in the Courtenay LHA. This household projection finds that there could be an additional 143 households over the next 25 years on Hornby Island. This is a significant potential increase, and as with other projections for the islands, will be based on legislation, servicing, water availability and demand.

Table 2.9: Hornby Island Household Projection (BC Stats 2017)

Year	Population	Increase	% increase	Cumulative # Increase	Cumulative % Increase
2016	560				
2021	593	33	5.9%	33	5.9%
2026	621	28	4.7%	61	10.6%
2031	647	27	4.3%	87	14.8%
2036	675	27	4.2%	115	19.1%
2041	703	28	4.2%	143	23.2%

2.5 Lasqueti Island Population Projections

Lasqueti stands to support the largest population growth based on the straight line historical population projection. The projection sees a population increase from 399 to approximately 515 people.

Figure 2.6: Lasqueti Island Population Projection (Straight Line Projection) (Statistics Canada 2017e)

Lasqueti Island's 2016 population of 399 was 0.9% of the Qualicum LHA population of 46,513. For the purposes of this projection, it is assumed that the Lasqueti Island's portion of the total Qualicum LHA will remain constant throughout the projection period.

Table 2.10: Lasqueti Island Population Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	399				
2021	421	22	5.6%	22	5.6%
2026	442	20	4.8%	43	10.4%
2031	459	17	4.0%	60	14.3%
2036	471	12	2.6%	72	16.9%
2041	486	15	3.1%	87	20.0%

Based on the PEOPLE projection, over the next 25 years, Lasqueti Island's population could grow by 87 people (a cumulative 20.0% increase). At Lasqueti Island's current average household size of 1.7, this would require approximately 51.8 new housing units over the next 25 years.

In 2016, Lasqueti Island's 240 households represented 1.1% of households in the Qualicum LHA. This household projection finds that there could be an additional 46 households over the next 25 years on Lasqueti Island.

These various projection models provide a range of growth from 445 to 515 for Lasqueti Island.

Table 2.11: Lasqueti Island Household Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	240				
2021	253	13	5.3%	13	5.3%
2026	261	9	3.4%	21	8.8%
2031	270	8	3.2%	30	11.9%
2036	278	8	3.2%	38	15.1%
2041	286	8	2.9%	46	17.9%

2.6 Thetis Island Population Projections

The straight line historical population projection indicates a potential growth from 389 to approximately 420.

Figure 2.7: Thetis Island Population Projection (Straight Line Projection) (Statistics Canada 2017f)

Thetis Island's 2016 population of 389 was 2.1% of the Ladysmith LHA population of 18,618. For the purposes of this projection, it is assumed that the Thetis Island portion of the total Ladysmith LHA will remain constant throughout the projection period.

Table 2.12: Thetis Island Population Projection (BC Stats 2017)

Year	Population	Increase	% Increase	Cumulative # Increase	Cumulative % Increase
2016	389				
2021	411	22	5.7%	22	5.7%
2026	431	20	4.9%	42	10.6%
2031	449	18	4.1%	60	14.8%
2036	462	12	2.8%	73	17.5%
2041	477	15	3.3%	88	20.8%

Over the next 25 years, Thetis Island's population could grow by 88 people (a cumulative 20.8% increase). At the Thetis Island's current average household size of 2.0, this would require approximately 44 new housing units over the next 25 years.

In 2016, Thetis Island's 180 households represented 2.2% of households in the Ladysmith LHA. This household projection finds that there could be an additional 48 households over the next 25 years on Thetis Island.

Therefore the population projection range for Thetis Island is between 420 and 477 people.

Table 2.13: Thetis Island Household Projection (BC Stats 2017)

Year	Population	Increase	% increase	Cumulative # Increase	Cumulative % Increase
2016	180				
2021	192	12	6.4%	12	6.4%
2026	201	10	5.1%	21	11.5%
2031	211	9	4.7%	31	16.2%
2036	220	9	4.3%	40	20.6%
2041	228	8	3.5%	48	24.0%

3.0 Denman Island Housing Needs

Denman Island has a current full-time population of 1,170. It is a single ferry ride from Vancouver Island (Buckley Bay) that runs virtually hourly from 7:00 am to 9:30 pm daily. There are few businesses on island with BC Ferries and the Denman Island Grocery Store being the larger employers. Denman Island has experienced a growth rate of just over one percent per year since 2006. This may reflect new buyers or previously seasonal residents retiring and moving to the island full-time.

Some of the indicator demographics for housing needs include the fact that almost 20% of the population are seniors in the low income brackets and 13% of the population are single parent families. Additionally, over 66% of the renters are paying more than 30% of their gross income on shelter, meeting the definition of unaffordable. If 12.9% of households are currently identified in the Core Housing Needs category, the average household size is 1.9 people and there are a total of 590 households, this would imply that 76 households are in need of more appropriate housing, affecting 144 people on Denman Island.

3.1 Demographics and Population

3.1.1 Population 2016

Demographics and Age

The 2016 Census indicates that the population of Denman Island is 1,170. The population is generally older than the Comox Valley Regional District (CVRD) and the population of BC, with notably higher rates of those between 55 and 74 years than the CVRD or BC, at 49.5% in this age group for Denman, 32.6% for CVRD, and 25.1% for BC. The median age for Denman Island is 61.3, compared to 50.8 for CVRD and 43.0 for BC.

Table 3.1: Denman Island Age Categories, 2016 (Statistics Canada 2017a)

Ages - 2016	Denman	% Total	CVRD	% Total	BC	% Total
0 to 4 years	30	2.6%	2,800	4.2%	220,625	4.7%
5 to 14 years	60	5.1%	6,390	9.6%	470,760	10.1%
15 to 19 years	40	3.4%	3,395	5.1%	258,980	5.6%
20 to 24 years	25	2.1%	2,840	4.3%	287,560	6.2%
25 to 44 years	155	13.2%	13,195	19.8%	1,205,385	25.9%
45 to 54 years	125	10.7%	9,165	13.8%	676,740	14.6%
55 to 64 years	290	24.8%	11,670	17.5%	679,020	14.6%
65 to 74 years	295	25.2%	9,995	15.0%	489,305	10.5%

Ages - 2016	Denman	% Total	CVRD	% Total	BC	% Total
75 to 84 years	115	9.8%	5,060	7.6%	250,480	5.4%
Over 85	35	3.0%	2,000	3.0%	109,190	2.3%
Totals	**1,170**	**100.0%**	**66,510**	**100.0%**	**4,648,045**	**100.0%**
Median Age	**61.3**		**50.8**		**43.0**	

Figure 3.1: 2016 Denman Island Population Pyramid (Statistics Canada 2017a)

Seniors and Retirees

A more detailed breakdown of the population aged 55 and up indicates a current potential need for seniors housing that will be exacerbated as these cohorts continue to age. While Denman Island has proportionally fewer residents aged 55 to 59 years compared to the CVRD and BC, it has a higher proportion of those in the 60 to 74 year age range.

Although Denman has an overall greater proportion of residents aged 55 and above compared to CVRD and BC, there are proportionally fewer Denman residents aged 85 and above. This could indicate that seniors may be 'aging out' of the island due to a lack of suitable housing. For example, while Denman

Island's proportion of residents aged 55 and above is 62.8%, compared to CVRD's 42.1% and BC's 32.8%, in the 80 to 84 year age group, Denman has a 5.4% proportion, compared to 7.7% for CVRD and 6.9% for BC. This difference is even more evident in the over 85 age group.

Table 3.2: Denman Island Seniors Ages, 2016 (Statistics Canada 2017a)

Seniors Ages	Denman	% Total	CVRD	% Total	BC	% Total
55 to 59 years	120	16.3%	5,755	19.9%	354,925	23.2%
60 to 64 years	170	23.1%	5,915	19.9%	324,095	21.2%
65 to 69 years	180	24.5%	5,725	20.5%	287,520	18.8%
70 to 74 years	115	15.6%	4,270	15.5%	201,785	13.2%
75 to 79 years	75	10.2%	2,925	10.7%	145,225	9.5%
80 to 84 years	40	5.4%	2,135	7.7%	105,255	6.9%
Over 85	35	4.8%	2,000	5.8%	109,190	7.1%
Totals	**735**	**100.0%**	**28,725**	**100.0%**	**1,527,995**	**100.0%**
% Total Population		**62.8%**		**42.1%**		**32.8%**

3.1.2 Household Characteristics

Household Composition

Denman Island has a lower proportion of families with children (20.3%) than the CVRD (29.5%) and BC (35.5%). The proportion of lone parent families on Denman Island (8.5%) is close to that of the CVRD (9.6%) and BC (10.5%).

Table 3.3: Denman Island Household Composition, 2016 (Statistics Canada 2017a)

Household Composition	Denman	% Total	CVRD	% Total	BC	% Total
Families with children	120	20.3%	8,710	29.5%	668,035	35.5%
Lone parent families	50	8.5%	2,835	9.6%	197,940	10.5%
Families without children	245	41.5%	10,580	35.8%	527,700	28.0%
One person households	200	33.9%	8,730	29.5%	541,915	28.8%
Multiple census family households	10	1.7%	375	1.3%	55,620	3.0%
Two or more person non-census family households	15	2.5%	1,170	4.0%	88,705	4.7%
Total Households	**590**	**100%**	**29,565**	**100%**	**1,881,975**	**100%**

Over the last 10 years, there has been an increase of 70 households on Denman Island (a 13.5% change). At the same time, average household size has been reduced from 2.1 to 1.9, a -9.5% change.

Table 3.4 shows trends in household composition on Denman Island. From 2006 to 2016, there has been an increase in the proportions families with children (33.3%) as well as families without children (32.4%).

There has been no change in the number of lone parent families over the same time period. Meanwhile, the proportion of one person households has increased by 5.3%.

Census data shows a 400% increase in "other family households" in the 2006 to 2016 period; although, this increase could be due to changes in how this category has been defined in each census year. The number of households in this category remains relatively low at 25.

Table 3.4: Denman Island Household Composition, 2006-2016 (Statistics Canada 2006, 2012a, 2017a)

Household Composition	2006	2011	2016	5 Year Change	% Change	10 Year Change	% Change

Tenure - Rental and Ownership

Over a 10 year period, the proportion of rented homes on Denman Island has been relatively stable, with an increase of 0.8% of the total households renting their home on the island. As is typical of many rural communities, there are proportionally fewer households that rent than own, with 16% of households on Denman Island renting, compared to 23.6% in the CVRD and 31.9% for BC (Statistics Canada 2017a).

There has been a total increase of 70 (11.8%) households on Denman Island in the 2006 to 2016 period. Rental households have increased by 15 (2.5%) over this period, while owned households have increased by 55 (9.2% (Statistics Canada 2017a).

There was a large drop in the number of reported households reported as rented in the 2011 National Household Survey (**Table 3.6**). This may be due to the unreliability of the data from this voluntary survey, as compared to the mandatory 2006 and 2016 household surveys, as 45% of Denman Island residents approached did not return a survey.

Table 3.5: Denman Island Household Tenure, 2016 (Statistics Canada 2017a)

Household Sizes

Reflective of the household composition on Denman Island described above, the island has a higher proportion of one person and two person households, at 33.9% and 46.6% respectively, than the CVRD (29.5% and 42.5%) or BC (28.8% and 35.3%). One and two person households account for an 80.5% proportion of all households on Denman Island. The average number of persons per household on Denman Island (2.0) is lower than that of the CVRD (2.2) and BC (2.4).

Table 3.8: Denman Island Household Sizes, 2016 (Statistics Canada 2017a)

3.2 Income 2015

3.2.1 Taxable Income Distribution- Individuals

The 2016 Census provides information on the incomes of respondents for the previous year (2015). Average tax-filer income on Denman Island in 2015 was $62,025, which is 23.6% lower than the CVRD average income and 43.6% lower than BC. The median income for Denman Island is also lower, at $44,629, 30.4% lower than the CVRD median income, and 45.7% lower than BC.

Table 3.9: Denman Island Total Taxable Income, 2015 (Statistics Canada 2017a)

Total Income 2015	Denman	% Total	CVRD	% Total	BC	% Total

3.2.2 Household Income

Household income is used as an indicator of housing affordability, as it includes every person in a dwelling who may be contributing to housing costs. Denman Island has a lower household income than both the CVRD and BC in all economic family compositions.

The disparity between median household incomes on Denman with those in the CVRD and BC is particularly pronounced for families. The median income of lone parent families on Denman Island is 56.6% lower than the CVRD and 79.3% lower than BC as a whole. A similar, although less pronounced, disparity exists between Denman, the CVRD and BC as a whole for couple families with children. Smaller disparities exist for families without children and those not in an economic family.

Table 3.10: Denman Island Median Household Income, 2015 (Statistics Canada 2017a)

Economic Family Composition	Denman	% Total	CVRD	% Total	BC	% Total
Couple families with children	$71,552	11.6%	$103,797	19.1%	$111,736	24.4%
Lone parent families	$28,480	7.8%	$44,587	8.6%	$51,056	9.0%
Families without children	$58,432	38.8%	$74,775	33.3%	$80,788	26.3%
Not in an economic family	$22,208	41.1%	$30,084	39.1%	$31,255	40.2%
All Households	**$44,629**	**100%**	**$63,397**	**100%**	**$69,995**	**100%**

Median household incomes for lone parent families on Denman Island saw a -25.6% change between 2011 and 2016, a -5.1% change per year. During the same period, couple families with children have seen a 25.5% increase in median household incomes. Median household incomes for families without children, and those not in an economic family, have also increased during this time period.

Table 3.11: Denman Island Changes 2011-2016 Median Household Income, 2015 (Statistics Canada 2017a)

Economic Family Composition	2011	2016	Change $	Change %	Avg. %/yr

All Households	**$40,445**	**$44,629**	**$4,185**	**10.3%**	**2.1%**

Household Income Distribution

Household income distribution can be used to determine an approximate numbers of affordable housing options for different income groups. While the median income of Denman Island is $44,629, there is also a significant proportion (15.3%) of high income households, with $100,000 in income and higher. This proportion of high income households is lower than the CVRD (25.2%) and BC (32.3%).

Table 3.12: Denman Island Household Income Distribution, 2015 (Statistics Canada 2017a)

Total Income 2015	Denman	% Total	CVRD	% Total	BC	% Total

Average Income	**$62,025.00**		**$76,711.00**		**$90,354.00**	

The most significant changes in Denman Island's household income group distribution have been in the very lowest categories of income earners, with a 73.3% decrease of those in this income range, and the very highest income earners (157.1% increase). This could indicate that the Denman Island is becoming unaffordable for the island's lowest income earners and they are moving off island.

Table 3.13: Denman Household Income Distribution, 2005-2015 (Statistics Canada 2017a)

Household Income Groups and Household Income Disparity

For ease of comparison with the 2015 Salt Spring Island Housing Needs Assessment (SS HNA), this report uses the same income group definition categories. **Table 3.14** provides the income range for each category, as defined in relation to Denman Island's median income of $44,629. **Table 3.15** provides a comparison of the proportion of these household income groups between Denman, the CVRD and BC as a whole.

Table 3.14: Denman Island Household Income Groups, 2015 (Statistics Canada 2017a)

Income Groups	Definition	Income Range	Denman	% Total
Little to no income	under $15,000	under $15,000	60	10.2%
Low income	$15,000 to 50% median	$15,000 to $24,999	85	14.4%
Low to moderate income	50% - 80% median	$25,000 to $34,999	80	13.6%
Moderate	80% - 100% median	$35,000 to $44,999	75	12.7%
Moderate to above moderate	100% - 120% median	$45,000 to $59,999	85	14.4%
Above moderate to high	120% - 150% median	$60,000 to $69,999	35	5.9%
High income	150% median +	$70,000 and over	170	28.8%
All Households	**$44,629**			**100%**

Denman Island has a similar proportion of high income earners to the CVRD and BC. There is a greater proportion of little to no income households on Denman Island, at 10.2%, compared to the CVRD (5.5%) and BC (6.7%).

3.3 Current Housing Supply

3.3.1 Existing Housing Stock

Structure Type

Table 3.16 illustrates the distribution of occupied dwellings by structure type on Denman Island. The housing supply on Denman Island is almost exclusively single-detached dwellings, which form 96.6% of the total housing supply. This compares to the CVRD proportion of single-detached homes at 68.4% and BC at 44.1%. This lack of diversity in housing supply could be a contributor to a lack of affordable rental and ownership options for a full range of income groups.

Denman Island's 2016 total of 590 private occupied dwellings represents a 13.9% increase over the 518 reported in the 2011 Census.

Table 3.16: Denman Island Housing by Structure Type, 2016 (Statistics Canada 2017a)

Structure Type	Denman	% Total	CVRD	% Total	BC	% Total

Housing Indicators and Tenure

Data for housing indicators was not available at the DPL geographic level for this report.

Age of Housing Stock

Denman Island's housing stock is generally similar in age to that of the CVRD and BC, with the greatest difference being those homes built in the 1981 to 1990 period, which forms 26.9% of occupied housing on the island being built in that period. Denman Island also has a greater proportion of dwellings built in the 2011 to 2016 period than the CVRD or BC.

Table 3.17: Denman Island Dwelling Age (Statistics Canada 2017a)

Construction Period	Denman	% Total	CVRD	% Total	BC	% Total
1960 or before	55	9.2%	3,660	12.4%	267,560	14.2%
1961 to 1980	145	24.4%	8,070	27.3%	559,485	29.7%
1981 to 1990	160	26.9%	4,900	16.6%	289,565	15.4%

Non-Resident Ownership

Data for the rate of dwellings occupied by usual residents for 2006 was not available at the DPL geographic level for this report.

At 71.2%, Denman Island's rate of dwellings occupied by usual residents is lower than that of the CVRD (92.2%) and BC (91.2%). The percentage of dwellings occupied by the usual residents on Denman Island has decreased by 4% since 2011.

Table 3.18: Denman Island Dwellings Occupied by Usual Residents 2011-2016 (Statistics Canada 2017a, 2012a)

% Change 2011-2016		**-4.0%**		**-0.3%**		**0.5%**

3.3.2 Rental Availability and Affordability

Private Market Listings

The CMHC does not conduct rental market surveys for Denman Island and there is no formal inventory of rental properties conducted on the island. The rental housing market is extremely limited on Denman Island. As of January 2018, there were no long-term homes available for rent in public listings on Craigslist, Padmapper or Kijiji. A search on AirBnB found four vacation rental properties available.

Figure 3.2: What is your monthly rent?

While this information is far from a complete picture of the rental market on Denman Island, it paints a picture of a severe lack of affordable housing rental options.

While many respondents to a survey Housing Needs Survey conducted for this assessment reported that their rents were in the affordable ranges, provided in **Section 3.4.1**, there appears to be an overall lack of available units in these price ranges.

The 2016 Census identified the median monthly rental shelter cost for Denman Island as $684. This generally matches with the survey results that indicated that, while 7% pay under $400 per month, 50% of the respondents pay between $400 and $750 with 42% paying over $750 per month.

Social Housing

Denman currently does not have any social housing. In 2008, the OCP review lead to amendments which reflected the need for affordable housing through the creation of a density bank for affordable housing purposes. Also in 2008, the Denman Island Women's Outreach Society (DIWOS) undertook a needs assessment which comprised anecdotal evidence of single mothers and elder women in immediate need of affordable housing. Since then, two community non-profit societies, the Denman Community Land Trust Association and the Denman Housing Association were formed and are working on creating affordable housing projects.

3.3.3 Homeowner Options

Current Listings

Table 3.19 provides MLS listings as of January 29, 2018 to provide an understanding of housing currently available for purchase on Denman Island. The table also includes the income required for ownership, based on an assumption that no more than 30% of income is used for shelter costs, $200/month in costs of ownership, 75% loan, 25 year amortization period and 4% interest.

There were a total of 10 listings on this date, with an average price of $735,300 and median price of $693,500. There is presented as a somewhat limited range of home price categories available on the island, primarily in the mid to high range, with no homes available for moderate income earners and below. All homes listed for purchase on this date were single family homes.

Table 3.19: Denman Island MLS Listings, January 2018

Price Range	# Listed	Average Cost	Income Required
$0 - $149,999	-		
$150,000 - $199,999	-		
$200,000 - $299,999	-

Census Reported Dwelling Values

Data for median value of dwellings by structure type is not available at the geographic level provided data for Denman Island specifically.

3.4 Housing Affordability

3.4.1 Affordability Targets

Household Type

Housing affordability is defined in **Section 1.1** of this report. Housing is generally considered affordable if it meets suitability and adequacy standards, and does not cost more than 30% of total household income. Based on these assumptions, **Table 3.20** provides affordability for different household groups, based on median incomes of each group as provided in the 2016 Census. The percentage of the total population for each group is also provided, to indicate the ideal percentage of total available housing units available for each household type and income level.

Table 3.20: Denman Island Household Affordability Targets

Household Affordability Targets	Denman	% Population	Median Income	Affordable Rent	Affordable Purchase
Couple families with children	40	11.6%	$71,552	$1,789	$402,000
Lone parent families	10	7.8%	$28,480	$712	$130,000
Families without children	0	38.8%	$58,432	$1,461	$319,000
Not in an economic family	265	41.1%	$22,208	$555	$90,000
All Households (2015)	**590**	**100%**	**$44,629**	**$1,116**	**$232,000**

Income Groups and Ideal Affordable Housing Supply

Table 3.21 provides a detailed breakdown of the ideal number of housing units available for each of the income groups identified in **Table 3.14** above, based on the percentage of the total households each group comprises. Affordable rent and purchase prices have been calculated using the same assumptions and benchmarks as previously identified in this report.

As an illustration of how this table can be used, it indicates that 48.3% of households (all households below moderate income of $40,000) need rental housing $938/month or less. As another example, 10.2% of households can afford a home with a purchase price of $581,000.

Table 3.21: Denman Island Ideal Housing Supply - Rental and Purchase Prices

Income Groups	Income Range	Number	% Households	Average Income	Affordable Rent	Affordable Purchase
Little to no income	Under $5,000	10	1.7%	$5,000	$125	n/a
	$5,000 to $9,999	10	1.7%	$7,500	$188	n/a
	$10,000 to $14,999	40	6.8%	$12,500	$313	$29,000
Low income	$15,000 to $19,999	45	7.6%	$17,500	$438	$60,000
	$20,000 to $24,999	45	7.6%	$22,500	$563	$92,000
Low to moderate income	$25,000 to $29,999	50	8.5%	$27,500	$688	$124,000
	$30,000 to $34,999	45	7.6%	$32,500	$813	$155,000
	$35,000 to $39,999	40	6.8%	$37,500	$938	$187,000

	$100,000 +	60	10.2%	$100,000	$2,500	$581,000
Median Income		**590**	**100%**	**$44,629**	**$1,116**	**$232,000**

3.5 Community Perspectives

For a description of methods, please see **Section 1.2 - Approach and Methods**.

3.5.1 Stakeholder/Key Informants Meetings

Key informant interviews were conducted with the following stakeholders:

- Bill Engleson, Chair, Hornby Denman Community Health Care Society;

- Steve Carballeira;
- Paige Friesen, Friesen Family Construction Ltd.;
- Alan Friesen, Friesen Family Construction Ltd.;
- Riane DaSilva, Denman Works;
- Anne Davis, Comox Valley Transition Society;
- Miles Drew, Islands Trust Bylaw Enforcement;
- Harlene Holm, Denman Community Land Trust Association;
- David Critchley, Denman Island Local Trustee; and
- Tomas Hajek, Co-Housing Group.

3.5.2 Online Survey

The Denman Island Housing Needs Survey received a total of 102 responses (8.7% of the total population).

Figure 3.3: What is your monthly rent?

Survey responses showed that rental shelter costs are similar to those reported in the 2016 Census, which identified a median monthly rental shelter cost of $684 for Denman Island. Survey results indicated that 7% pay under $400 per month, 50% of respondents paying between $400 and $750, and 43% paying over $750 per month.

Figure 3.4: What housing supply gaps exist on your Island?

The survey asked people what the housing gaps were on Denman Island, and what groups on their island were unable or had difficulty accessing appropriate housing. The four gaps most often identified were affordable rental, family rental, seniors housing and affordable home ownership. Three of these identified gaps overlap and highlight the primary need for rental accommodation.

Figure 3.5: What groups are not able to access housing on your island?

When asked what groups could not access housing on Denman Island, respondents indicated a full range of demographic groups: young adults, families, seniors, singles and employees. As with the question above, there is overlap between some of these groups.

Figure 3.6: Where do the people that need affordable housing currently live on your island?

Figure 3.7: Are you aware of people living in illegal and inappropriate housing on your island?

Eighty-three percent of respondents indicated that they are aware of people living in illegal and inappropriate housing on Denman Island. In addition, respondents indicated that those in need of affordable housing are using a range of means to meet housing needs, including rental housing, cottages, shared housing, illegal dwelling units, and trailers or mobile homes. The reliance on illegal suites and cottages indicates the inability of residents to find legal, healthy, affordable housing units.

Figure 3.8: Please select the top three housing challenges faced by your island

The top three housing challenges identified by respondents were “Unaffordable relative to income”, “Insecure tenure” and “Lack of available housing options”. “Unhealthy conditions” was also selected by a large number of respondents.

Additional comments on the surveys identified that the ferry workers have placed mobile homes on the Emcon Services yard because they cannot find temporary housing. Some are forced to share housing, which may not be appropriate depending on the situation. Comments also indicated that many illegal suites and cottages are substandard, do not meet building code, and have issues of inadequate heat, lack of potable water, inadequate sanitary sewer service and mould. Participants at the meeting indicated that the unhealthy living conditions may contribute to other social and health issues; such as, illness and absenteeism from work.

3.6 Affordable Housing Gaps

It is clear that the no, low and even moderate income households have difficulty accessing the housing market. This represents the young adults, seniors and families. While they may be able to rent, there is little secure appropriate rental accommodation available.

The 2016 Census demonstrates that 25.4% of the population, or 150 people, have no or low income. These people are considered vulnerable.

3.7 Conclusion and Recommendations

Based on the population projections, there could be a need for potentially 165 residential units in the next 25 years. The average income is $20,000 below the regional average. Based on the census, 25.4% of the total population falls within the no and low income category, and 38% falls within the no, low and low-moderate income levels. The 2008 Housing Needs on Hornby and Denman Island (Hornby Island Economic Enhancement Corporation, December 2008) identified a total housing need of 68 units for renters and seniors. Based on the population growth projected for 165 units and 48% need for affordable rental, Denman Island now requires up to 80 affordable housing units. This translates into three to four units per year.

4.0 Gabriola Island Housing Needs

Gabriola is the largest and most populated island of the Northern Region Islands Trust Region. Accessed by a vehicle ferry from downtown Nanaimo, there is potential for viable off island employment. This, along with the commercial development on the island and various institutional uses (school, library, etc.), provides significant employment on the island. Gabriola has the highest percentage of permanent residents of the islands of the Northern Region and the largest number of permanently occupied dwellings (71.7%). In addition, there are many people who live on Vancouver Island and come to Gabriola to work, including homecare workers, school teachers, restaurant workers and contractors for example. Many of these people have indicated a desire to live on Gabriola Island and be closer to their jobs but are unable to find appropriate housing on Gabriola Island.

4.1 Demographics and Population

The following information provides a summary of the current population and demographic breakdown as well as the projections for the future.

4.1.1 Population 2016

Demographics and Age

The 2016 Census indicates that the population of Gabriola Island is 4,035. The population is generally older than the Regional District of Nanaimo and the population of BC, with notably higher rates of those between 55 and 74 years than the Nanaimo Regional District (RDN) or BC, at 52.4% in this age group for Gabriola, 32.9% for RDN, and 25.1% for BC. The median age for Gabriola Island is 61.3, compared to 51.1 for RDN and 43.0 for BC.

While overall percentages are low, the numbers of school age children support an elementary and middle school, a fact that may attract young families moving to and staying on Gabriola, provided they can find housing. Enrollment between 165 and 170 students has been consistent over the past 10 years[1].

[1]Gabriola Elementary School Administration

Table 4.1: Gabriola Island Age Categories, 2016 (Statistics Canada 2017b)

Ages - 2016	Gabriola	% Total	RDN	% Total	BC	% Total
0 to 4 years	75	1.9%	6,240	4.0%	220,625	4.7%

Median Age	**61.3**		**51.1**		**43.0**	

Figure 4.1: Gabriola Island Population Pyramid

Seniors and Retirees

A more detailed breakdown of the population aged 55 and up indicates a current potential need for seniors housing that will be exacerbated as these cohorts continue to age. While Gabriola Island has proportionally fewer residents aged 55 to 59 years compared to the RDN and BC, it has a higher proportion of those in the 60 to 69 year age range.

Although Gabriola has an overall greater proportion of residents aged 55 and above compared to RDN and BC, there are proportionally fewer Gabriola residents aged 80 and above. This could indicate that seniors may be 'aging out' of the island due to a lack of suitable housing. For example, while Gabriola Island's proportion of residents aged 55 and above is 64.4%, compared to RDN's 44.4% and BC's 32.9%, in the 80 to 84 year age group, Gabriola has a 5.4% proportion, compared to 7.5% for RDN and 6.9% for BC. This difference is even more evident in the over 85 age group. This could reflect the desire to be closer to medical services and other services such as Handy Dart.

Table 4.2: Gabriola Island Seniors Ages (Statistics Canada 2017b)

Seniors Ages	Gabriola	% Total	RDN	% Total	BC	% Total
55 to 59 years	440	16.9%	12,950	18.8%	354,925	23.2%
60 to 64 years	645	24.8%	14,030	20.3%	324,095	21.2%
65 to 69 years	615	23.7%	13,845	20.0%	287,520	18.8%

4.1.2 Household Characteristics

Household Composition

This report uses the statistics for households as they better represent residential dwelling units rather than individuals. Gabriola Island has a much lower proportion of families with children (15.2%) than the RDN (28.2%) and BC (35.5%). In the case of lone parent families, this difference is magnified, with Gabriola Island having close to half of the proportion of lone parent families (5.1%) than RDN (9.8%) or BC (10.5%) do. **Table 4.4** shows trends in household composition on Gabriola Island. While there has been a 10 year overall increase in families with children, the last five years have seen a decrease of 7.1%. Additionally, since the 2006 Census, there has been a 29% decrease in lone parent families on the island. This could be an indication that housing is becoming unaffordable for lower income families on

the island, particularly for more vulnerable household groups such as lone parent families. As a corollary to the recent decrease in families on the island, there has been a subsequent increase in families without children and one person households.

Table 4.3: Gabriola Island Household Composition (Statistics Canada 2017b)

Household Composition	Gabriola	% Total	RDN	% Total	BC	% Total
Families with children	325	15.2%	19,445	28.2%	668,035	35.5%
Lone parent families	110	5.1%	6,785	9.8%	197,940	10.5%
Families without children	955	44.6%	25,190	36.6%	527,700	28.0%
One person households	780	36.4%	20,185	29.3%	541,915	28.8%
Multiple census family households	20	0.9%	1,000	1.5%	55,620	3.0%
Two or more person non-census family households	60	2.8%	3,085	4.5%	88,705	4.7%
Total Households	**2,140**	**100%**	**68,905**	**100%**	**1,881,975**	**100%**

Over the last 10 years, there has been an increase of 145 households on Gabriola Island (a 7.3% change). At the same time, average household size has been reduced from 2.0 to 1.9, a 5.0% change.

Finally, there has been a significant decrease (63.6%) in the number of "other households" (multi-family and two or more person non-census family households) on the island over a 10 year period. This could indicate a reduction in housing affordable to those not defined as census families, but living in the same household (roommates), as well as families sharing homes.

Table 4.4: Gabriola Island Household Composition (2006, 2011, 2016 Census)

Household Composition	2006	2011	2016	5 Year Change	% Change	10 Year Change	% Change
Families with children	245	350	325	-25	-7.1%	80	32.7%

Average Household Size	**2.0**	**1.9**	**1.9**	**-**	**0.0%**	**-0.1**	**-5.0%**

Tenure - Rental and Ownership

Over a 10 year period, the proportion of rented homes on Gabriola has been relatively stable, with an increase of 2.4% of the total households renting their home on the island. As is typical of many rural communities, there are proportionally fewer households that rent than own, with 17% of households on

Gabriola Island renting, compared to 26.0% in the RDN and 31.9% for BC. There has been a similar net increase in both rental (3.5%) and owned (3.7%) households on Gabriola Island since 2006.

There was a large drop in the number of reported households reported as rented in the 2011 National Household Survey (**Table 4.6**). This may be due to the unreliability of the data from this voluntary survey, as compared to the mandatory 2006 and 2016 household surveys.

Table 4.5: Gabriola Island Household Tenure (Statistics Canada 2017b)

Household Tenure	Gabriola	% Total	RDN	% Total	BC	% Total
Rented	365	17.0%	17,900	26.0%	599,360	31.9%

Household Sizes

Reflective of the household composition on Gabriola Island described above, the island has a higher proportion of one person and two person households, at 36.4% and 49.1% respectively, than the RDN (29.3% and 43.4%) or BC (28.8% and 35.3%). One and two person households account for a 85.5% proportion of all households on Gabriola Island. The average number of persons per household on Gabriola Island (1.9) is lower than that of the RDN (2.2) and BC (2.4).

Table 4.8: Gabriola Island Household Sizes (Statistics Canada 2017b)

Household Size	Gabriola	% Total	RDN	% Total	BC	% Total

4.2 Income 2015

The 2016 Census captures income from the previous year, in this case 2015.

4.2.1 Taxable Income Distribution

Average tax-filer income on Gabriola Island is $62,927, which is 23% lower than the RDN average income and 43.6% lower than BC. The median income for Gabriola Island is also lower, at $47,795, 30.4% lower than the RDN median income, and 46.4% lower than BC.

Table 4.9: Total Taxable Income (Statistics Canada 2017b)

Total Income 2015	Gabriola	% Total	RDN	% Total	BC	% Total
Without income	90	2.4%	3,795	2.9%	142,970	3.7%
Under $10,000 (including loss)	555	15.3%	16,560	12.9%	573,315	15.4%

4.2.2 Household Income

Household income is used as an indicator of housing affordability, as it includes every person in a dwelling who may be contributing to paying for the housing costs. Gabriola Island has a lower household income than both the RDN and BC in all economic family compositions. The disparity between median

household incomes on Gabriola with those in the RDN and BC is particularly pronounced for families. The median income of lone parent families on Gabriola Island is 30% less than the RDN, and 47.2% less than BC as a whole. A similar disparity between Gabriola, the RDN and the province as a whole exists for couple families with children. Smaller disparities exist for families without children and those not in an economic family.

Table 4.10: Gabriola Island Median Household Income, 2015 (Statistics Canada 2017b)

Economic Family Composition	Gabriola	% Total	RDN	% Total	BC	% Total
Couple families with children	$75,520	10.0%	$104,867	17.6%	$111,736	24.4%
Lone parent families	$34,688	4.8%	$45,102	8.7%	$51,056	9.0%
Families without children	$64,981	42.7%	$74,504	33.5%	$80,788	26.3%
Not in an economic family	$23,536	42.3%	$28,316	40.1%	$31,255	40.2%
All Households	**$47,795**	**100%**	**$62,349**	**100%**	**$69,995**	**100%**

Median household incomes for families on Gabriola Island have declined substantially in the period between the 2011 and 2016 Censuses, averaging -2.6% per year for families with children, and -3.1% per year for lone parent families. Meanwhile, the median income for families with children and those not in an economic family has remained static.

Table 4.11: Gabriola Island Changes 2011-2016 Median Household Income, 2015 (Statistics Canada 2017b)

Economic Family Composition	2011	2016	Change $	Change %	Avg. %/yr
Couple families with children	$86,632	$75,520	-$11,112	-12.8%	-2.6%
Lone parent families	$40,988	$34,688	-$6,300	-15.4%	-3.1%
Families without children	$64,772	$64,981	$209	0.3%	0.1%
Not in an economic family	$23,567	$23,536	-$31	-0.1%	0.0%

Household Income Distribution

Household income distribution can be used to determine an approximate numbers of affordable housing options for different income groups. While the median income of Gabriola Island is $47,795, there is also a significant proportion (17.2%) of high income households, with $100,000 in income and higher. This proportion of high income households is lower than the RDN (25.6%) and BC (32.3%).

Table 4.12: Gabriola Island Household Income Distribution, 2015 (Statistics Canada 2017b)

Total Income 2015	Gabriola	% Total	RDN	% Total	BC	% Total
Under $5,000	55	2.6%	1,160	1.7%	43,415	2.3%

Household Income Groups and Household Income Disparity

For ease of comparison with the 2015 SS HNA, this report uses the same income group definitions. **Table 4.14** provides the income range for each category, as defined in relation to Gabriola Island's

median income of $47,795. **Table 4.15** provides a comparison of the proportion of these household income groups between Gabriola, the RDN and BC as a whole.

Table 4.14: Gabriola Island Household Income Groups, 2015 (Statistics Canada 2017b)

Income Groups	Definition	Income Range	Gabriola	% Total
Little to no income	under $15,000	under $15,000	215	10.6%
Low income	$15,000 to 50% median	$15,000 to $24,999	295	14.6%
Low to moderate income	50% - 80% median	$25,000 to $39,999	350	17.3%
Moderate	80% - 100% median	$40,000 to $49,999	265	13.1%
Moderate to above moderate	100% - 120% median	$50,000 to $59,999	175	8.7%
Above moderate to high	120% - 150% median	$60,000 to $69,999	165	8.2%
High income	150% median +	$70,000 and over	555	27.5%
All Households	**$47,795**		**2,145**	**100%**

Income disparity on Gabriola Island is similar to the disparity found in the RDN and BC, although there are a greater proportion of little to no income households on Gabriola Island, at 10%, compared to the RDN (6.2%) and BC (6.7%).

Table 4.15: Gabriola Island Household Income Groups, 2015 (Gabriola, RDN, BC) (Statistics Canada 2017b)

Total Income 2015	Gabriola	% Total	RDN	% Total	BC	% Total
Median Income	**$47,795**		**$62,349**		**$69,995**	
Little to no income	215	10.0%	4,265	6.2%	126,300	6.7%
Low income	295	13.8%	9,550	13.9%	307,325	16.3%
Low to moderate income	350	16.3%	13,360	19.4%	374,505	19.9%
Moderate	265	12.4%	5,950	8.6%	132,845	7.1%

Above moderate to high	165	7.7%	4,300	6.2%	210,770	11.2%
High income	680	31.7%	21,340	31.0%	607,855	32.3%
Total	**2,145**	**100%**	**68,885**	**100%**	**1,881,950**	**100%**

4.3 Current Housing Supply

4.3.1 Existing Housing Stock

The housing supply on Gabriola Island is largely homogenous, dominated by single-detached dwellings, which form 93.4% of the total housing supply. This compares to the RDN proportion of single-detached homes at 65.2%, and BC at 44.1%. This lack of diversity in housing stock is a contributor to a lack of affordable rental and ownership options for a full range of income groups.

Gabriola Island's 2016 total of 2,135 private dwellings represents a 2.9% increase over the 2,075 reported in the 2011 Census.

Structure Type

Table 4.16: Gabriola Island Housing by Structure Type, 2016 (Statistics Canada 2017b)

Structure Type	Gabriola	% Total	RDN	% Total	BC	% Total
Single-detached house	1,995	93.4%	44,910	65.2%	830,660	44.1%
Apartment 5+ storeys	-	0.0%	1,320	1.9%	177,830	9.4%
Movable dwelling	55	2.6%	2,635	3.8%	49,290	2.6%
Semi-detached house	35	1.6%	2,985	4.3%	57,395	3.0%
Row house	-	0.0%	2,940	4.3%	147,830	7.9%
Apartment, duplex	15	0.7%	5,335	7.7%	230,075	12.2%
Apartment < 5 storeys	30	1.4%	8,640	12.5%	385,140	20.5%
Other single-attached house	5	0.2%	145	0.2%	3,755	0.2%
Total Private Dwellings	**2,135**	**100%**	**68,910**	**100%**	**1,881,975**	**100%**

It should be noted that these figures from the census are significantly different from the legally recognized numbers of duplexes and semi-detached houses. Gabriola Island Planners have confirmed that there are only two legally zoned duplexes based on grandfathering of the date of construction. The other semi-detached houses and other attached houses may reflect illegal housing units.

Housing Indicators and Tenure

Tables 4.17 and **4.18** show the total number and proportion of households in core housing need for renters and owners, respectively. A household is in core housing need if it falls below at least one of the three standards of adequacy, suitability or affordability. Adequacy refers to the condition of the home, and whether it requires major repairs according to residents. A suitable home is one that has enough bedrooms for the size and makeup of the household, and an affordable home is one that costs less than 30% of before-tax household income. (https://www.cmhc-chl.gc.ca/en/hoficlincl/observer/observer_044.cfm).

Table 4.17: Gabriola Island Housing Indicators - Renters (Statistics Canada 2017b)

Households in Rented Dwellings	Gabriola	% Total	RDN	% Total	BC	% Total
Adequacy: major repairs needed	35	9.6%	1,425	8.0%	44,120	7.4%
Suitability: not suitable	15	4.1%	1,105	6.2%	59,485	9.9%
Affordability: 30% or more of household income is spent on shelter costs	190	52.1%	8,550	47.8%	255,960	42.7%
Adequacy, suitability or affordability: major repairs needed, or not suitable, or 30% or more of household income is spent on shelter costs	210	57.5%	9,900	55.3%	315,465	52.6%

Lack of affordable rental housing appears to be a more significant issue on Gabriola Island than in the RDN or BC. The 2016 Census data shows that 52.1% of Gabriola Island households that rent are spending more than 30.0% of household income on shelter costs. This compares to 47.8% of households in the RDN, and 42.7% for BC.

Other indicators are similar or better than in the RDN or BC, with slightly more rental dwellings in need of major repairs, but a lower rate of un-suitable housing on Gabriola as compared to the RDN and BC.

Table 4.18: Gabriola Island Housing Indicators - Owners (Statistics Canada 2017b)

Households in Owned Dwellings	Gabriola	% Total	RDN	% Total	BC	% Total
Adequacy: major repairs needed	150	8.4%	2,510	4.9%	66,915	5.2%
Suitability: not suitable	15	0.8%	670	1.3%	37,540	2.9%
Affordability: 30% or more of household income is spent on shelter costs	355	19.9%	8,070	15.8%	256,250	20.0%
Adequacy, suitability or affordability: major repairs needed, or not suitable, or 30% or more of household income is spent on shelter costs	460	25.8%	10,365	20.4%	332,015	26.0%

Compared to rental households, the rate of households in owned dwellings in core housing need on Gabriola Island were universally lower. While 19.9% of owner households on Gabriola Island report spending 30% or more of household income on shelter, 52.1% of renter households report spending more than 30%. While Gabriola's core housing need rate is similar to that of the RDN and BC for suitability and affordability, the island has a higher rate of dwellings in need of major repairs, at 8.4%, compared to 4.9% in the RDN and 5.2% in BC.

Age of Housing Stock

Gabriola Island's housing stock is generally similar in age to that of the RDN and BC; although, there is a lesser proportion of homes built in 1960 or before, and a greater proportion of homes built between 1991 and 2000. Also notable is that the proportion of homes on the island built since 2011 is lower for Gabriola (4.7%) than the RDN (6.1%) or BC (7.2%).

Table 4.19: Gabriola Island Dwelling Age (Statistics Canada 2017b)

Construction Period	Gabriola	% Total	RDN	% Total	BC	% Total
1960 or before	85	4.0%	7,685	11.2%	267,560	14.2%
1961 to 1980	615	28.7%	19,585	28.4%	559,485	29.7%
1981 to 1990	360	16.8%	11,200	16.3%	289,565	15.4%
1991 to 2000	610	28.5%	14,905	21.6%	331,865	17.6%
2001 to 2005	155	7.2%	4,995	7.2%	125,335	6.7%
2006 to 2010	215	10.0%	6,335	9.2%	171,945	9.1%

2011 to 2016	100	4.7%	4,195	6.1%	136,210	7.2%
Total	**2,140**	**100%**	**68,900**	**100%**	**1,881,965**	**100%**

As noted above, much of the housing constructed in the 1950s and 1960s were cottages for summer vacation use only.

Non-Resident Ownership

At 71.7%, Gabriola Island's rate of dwellings occupied by usual residents is lower than that of the RDN (94.0%) and BC (91.0%). The percentage of dwellings occupied by the usual residents on Gabriola Island has decreased by 1.5% since 2006.

Table 4.20: Gabriola Island Dwellings Occupied by Usual Residents 2006-2016

Census Year	Gabriola	% Total	RDN	% Total	BC	% Total
2016	2143	71.7%	68,904	94%	1,881,969	91%
2011	2075	69.9%	64,463	91.2%	1,764,637	90.7%
2006	1998	72.8%	59,870	93.6%	1,642,715	91.9%
% Change 2006-2016		**-1.5%**		**0.0%**		**-0.7%**

4.3.5 Rental Availability and Affordability

Private Market Listings

The CMHC does not conduct rental market surveys for Gabriola Island, and there is no formal inventory of rental properties conducted on the island. The information provided here is not comprehensive, but provides a general 'snapshot' of rental availability and cost on Gabriola. A more complete rental market survey would provide a more accurate picture of rental availability and cost on the island. The information here has been gathered from a variety of sources, including the Gabriola Home Rentals Facebook group, Padmapper.com, and the Gabriola Sounder Classifieds.

Figure 4.2: What is your monthly rent?

A January 2018 search on Padmapper.com shows no long-term rental options for Gabriola Island, while 12 short-term/vacation (AirBnB) rental options are available. These listings range from $1,251 to $3,276 per month for a room, and $2,899 to $5,077 per month for a full home. Similarly, the Gabriola Home Rentals Facebook group has few homes available for rent, with a much greater number of members posting in search of homes to rent than offering.

The online survey asked respondents what their monthly rent was. While this information is far from a complete picture of the rental market on Gabriola Island, it paints a picture of a severe lack of affordable housing rental options. While many respondents to a survey conducted for this assessment reported that their rents were in the affordable ranges (provided in **Section 4.4.1**), there appears to be an overall lack of available units in these price ranges.

Social Housing

There is currently no social housing or assisted living on Gabriola Island. The Gabriola Retirement Village is a private development that provides cottages for rent or purchase at affordable rates. Gabriola Garden Homes is a three storey condominium building originally built by the Lions Club but in the absence of a Housing Agreement, it is a free market development geared to seniors. The Gabriola Housing Society advocates in support of affordable housing in many forms.

4.3.6 Homeowner Options

Current Listings

Table 4.21 provides MLS listings as of January 24, 2018 to provide an understanding of housing currently available for purchase on Gabriola Island. The table also includes the income required for ownership, based on an assumption that no more than 30% of income is used for shelter costs, $200/month in costs of ownership, 75% loan, 25 year amortization period, and 4% interest.

There were a total of 17 listings on this date, with an average price of $1,206,747 and median price of $525,000. A relatively small number of higher priced homes (above $1,000,000) skew the average substantially higher than the median price. While the number of available listings is relatively low, there is presently a range of home price categories available on the island. Also of note is the fact that all of the homes available for purchase on this date were single family dwellings.

Table 4.21: Gabriola Island MLS Listings, January 2018

Price Range	# Listed	Average Cost	Income Required
$0 - $149,999	-		
$150,000 - $199,999	-

Census Reported Dwelling Values

Dwelling values are self-reported by owners in census data and may be based on their tax assessed value. **Table 4.22** illustrates the median value of dwellings on Gabriola Island. The only structure type represented in this data is single-detached and single-attached houses, which reflects the predominance of single family homes on Gabriola Island. The median total dwelling value Gabriola Island ($375,448) is lower than that of the RDN ($390,750) and BC ($500,874).

Table 4.22: Gabriola Island Median Value by Structure Type, 2016 (Census 2016)

Median Value by Structure Type	Gabriola	RDN	BC
Single-detached House	$375,544	$400,980	$552,543
Apartment building 5+ storeys	$-	$348,641	$478,755
Moveable dwelling	$-	$85,469	$96,346
Semi-detached house	$-	$348,860	$465,907
Row house	$-	$254,185	$420,176
Apartment, duplex	$-	$399,780	$898,875
Apartment building, less than 5 storeys	$-	$230,070	$311,066
Other single-attached house	$300,512	$300,941	$469,666

Gabriola % Difference		**-4.1%**	**-33.4%**

4.4 Housing Affordability

4.4.1 Affordability Targets

Household Type

Housing affordability is defined in **Section 1.1** of this report. Housing is generally considered affordable if it meets suitability and adequacy standards, and does not cost more than 30% of total household income. Based on these assumptions, **Table 4.23** provides affordability for different household groups, based on median incomes of each group as provided in the 2016 Census. The percentage of the total population for each group is also provided, to indicate the ideal percentage of total available housing units available for each household type and income level.

Affordable purchase price was calculated based on an assumed 4% interest rate, 25 year amortization, and 75% loan-to-value ratio. To allow comparison with the SS HNA, the homeowner monthly shelter costs includes $200 for taxes, insurance and utilities.

Based on these assumptions, **Table 4.23** provides affordability for different household groups, based on median incomes of each group as provided in the 2016 Census. The percentage of the total population for each group is also provided, to indicate the ideal percentage of total available housing units available for each household type and income level.

Table 4.23: Gabriola Island Household Affordability Targets

Household Affordability Targets	Gabriola	% Population	Median Income	Affordable Rent	Affordable Purchase
Couple families with children	230	10.0%	$75,520	$1,888	$427,000
Lone parent families	110	4.8%	$34,688	$867	$169,000
Families without children	980	42.7%	$64,981	$1,625	$360,000
Not in an economic family	970	42.3%	$23,536	$588	$99,000
All Households (2015)	**2290**	**100%**	**$47,795**	**$1,195**	**$252,000**

Income Groups and Ideal Affordable Housing Supply

Table 4.24 provides a detailed breakdown of the ideal number of housing units available for each of the income groups identified in **Table 4.14** above, based on the percentage of the total households each group comprises. Affordable rent and purchase prices have been calculated using the same assumptions and benchmarks as previously identified in this report.

For example, for the "low to moderate" income group, there would ideally be 355 units available at a monthly rent of $813 or lower. As another example, for the "moderate to above moderate" income group, there would ideally be 175 housing units at a purchase price of $297,000 or less. This still requires that these low and moderate income households would need to provide a down payment in the range of $59,400 to $74,250.

As an illustration of how this table can be used, it indicates that 45% of households (all households below moderate income of $40,000) need rental housing $938/month or less. As another example, 11.2% of households can afford a home with a purchase price of $581,000.

Table 4.24: Gabriola Island Ideal Housing Supply - Rental and Purchase Prices

Income Groups	Income Range	#	% Households	Average Income	Affordable Rent	Affordable Purchase
Little to no income	Under $5,000	65	3.0%	$5,000	$125	n/a
	$5,000 to $9,999	50	2.3%	$7,500	$188	n/a
	$10,000 to $14,999	110	5.1%	$12,500	$313	$29,000

Income Groups	Income Range	#	% Households	Average Income	Affordable Rent	Affordable Purchase
Low income	$15,000 to $19,999	165	7.7%	$17,500	$438	$60,000
	$20,000 to $24,999	145	6.8%	$22,500	$563	$92,000
Low to moderate income	$25,000 to $29,999	145	6.8%	$27,500	$688	$124,000
	$30,000 to $34,999	135	6.3%	$32,500	$813	$155,000
	$35,000 to $39,999	150	7.0%	$37,500	$938	$187,000
Moderate	$40,000 to $44,999	155	7.2%	$42,500	$1,063	$218,000
	$45,000 to $49,999	105	4.9%	$47,500	$1,188	$250,000
Moderate to above moderate	$50,000 to $59,999	215	10.0%	$55,000	$1,375	$297,000
Above moderate to high	$60,000 to $69,999	150	7.0%	$65,000	$1,625	$360,000
High income	$70,000 to $79,999	125	5.8%	$75,000	$1,875	$424,000
	$80,000 to $89,999	115	5.4%	$85,000	$2,125	$487,000
	$90,000 to $99,999	75	3.5%	$95,000	$2,375	$550,000
	$100,000 +	240	11.2%	$100,000	$2,500	$581,000
Median Income		**2,145**	**100%**	**$47,795**	**$1,195**	**$252,000**

4.5 Community Perspectives

For a description of methods, please see **Section 1.2 - Approach and Methods**.

4.5.1 Stakeholder/Key Informants Interviews

During the course of this study, both Local Trustees (Heather O'Sullivan and Melanie Mamoser) and the Regional RDN Director (Howard Houle) were interviewed individually. In addition, there was a meeting with the Gabriola Housing Society representatives and a round table of key stakeholders held to capture comments and concerns regarding housing on Gabriola.

The stakeholder meeting included representatives from the Chamber of Commerce, local realtors, Sustainable Gabriola, employers and People for a Healthy Community. The group recognized that while seniors were a group in need and that this group would continue to grow for the next 20 years, there was a significant need for housing for the employees of the island businesses.

4.5.2 Online Survey

Islands Trust posted the survey on the website and hard copies were provided at People for a Healthy Community for clients to complete on a Food Bank Lunch Social day. There were a total of 404 responses to the Gabriola Island Housing Needs Assessment survey, representing approximately 10% of

the total population. The survey results illustrate the fact that housing is an ongoing topic of interest for Gabriola residents. This section provides a summary of input gathered from the community through the survey. Full survey results can be found in **Appendix B**. Of the respondents, 93% were usual residents and 77% of the respondents owned their own homes.

A majority of survey respondents stated that they live on Gabriola island full-time. This percentage (93%) is higher than the number of dwellings occupied by usual residents (71.7%), as indicated in the 2016 Census data.

Figure 4.3: Are you a full-time resident or a part-time / seasonal resident?

Survey respondents indicated that affordable rental was the top housing gap on Gabriola Island, followed by family rental housing and affordable rental housing. This mirrors the findings of the quantitative analysis above, which illustrated that a much greater proportion of renters on Gabriola Island are in housing that is unaffordable relative to income.

Figure 4.4: What housing supply gaps currently exist on your island? (check all that apply)

When asked what groups are not able to access housing on Gabriola, survey respondents indicated that housing is not accessible to young adults and families, although respondents indicated that affordability was an issue for many different groups on Gabriola Island.

Figure 4.5: What groups are not able to access housing on your island? (check all that apply)

Because rental accommodation is so scarce on Gabriola Island, the survey asked where people who need affordable housing live on Gabriola Island. The survey results indicated residents in need of affordable housing find it by a variety of means. Illegal suites and cottages were high among the responses, indicating that the current housing market is not providing sufficient 'legitimate' housing options. This is reflected in the responses to Question 20 of the survey: Are you aware of people living in illegal and inappropriate housing on your island? 74% of respondents said yes to this question.

Figure 4.6: Where do the people that need affordable housing currently live on your island?

Respondents were asked to select the top three housing challenges faced by people on Gabriola Island. Survey respondents felt that the most important housing challenges faced by Gabriola Island were unaffordability relative to income, lack of available options and insecure tenure or need for frequent moves. This lack of affordability and insecure tenure are reflected by the rental market data above, that indicated very few long-term rental homes available on the island. The majority of available rental homes appear to be targeted to seasonal or vacation rentals.

Figure 4.7: Please select the top three housing challenges faced by your island

4.6 Affordable Housing Gaps

It appears there are four main groups that are unable to access appropriate, affordable, accessible and secure rental housing. These groups are:

- Low income seniors;
- Young singles;
- Families; and
- Older singles.

Gabriola has a significant vulnerable population. With over 150 people each week being served by the Food Bank, many seniors receiving Meals on Wheels, and a number of residents currently on various social and welfare programs, it is evident that there are several vulnerable populations on Gabriola Island. The anecdotal information in the survey and from the stakeholder meetings identified many

people who live in tents, in their vehicles and in substandard housing (garden sheds with an extension cord for power with no cooking or bathroom facilities). Quantitative analysis shows 25% of people with low or no income.

Gabriola has never conducted a homelessness count but it would be valuable information to have to assist with the quantification of the housing needs.

There are approximately 650 seniors that currently live alone. One of the assumptions is that over the next 10 years, these people will age to the point where they are unable to live alone and will be in need of assisted living. Assuming that half of these seniors remain on Gabriola, over the next 10 years they will age and begin to need special housing needs. It is assumed that this would transition for the need of 32 seniors housing units per year over the next 10 years. With two 'seniors' developments (the Lions Seniors Facility and the Retirement Cottages) along with services that allow people to age in their own homes such as Meals on Wheels and Homecare services, seniors housing, and services on Gabriola Island have been partially addressed.

The Bylaw Enforcement Office has indicated that there are currently 17 open files of illegal residences. Because Bylaw enforcement is by complaint only, and complaints are approximately 10% of the actual illegal activity, it is assumed that there are an additional 170 illegal housing units on the island. Some of these people are assumed to have been counted in the census (55 semi-detached houses) while others are not captured in the census due to the owners and the tenants avoiding exposure. Many of these people are employed on Gabriola Island in the service industry and often have multiple part-time jobs. Many jobs on Gabriola are not full-time (so the employer does not have to provide benefits) and so people are forced to have multiple part-time jobs to earn a living wage. These people are also vulnerable and are often the people that are forced to move several times a year to accommodate the summer or seasonal rentals.

4.7 Conclusion and Recommendations

Should the population of Gabriola grow in relation to the Region to 5,295 by 2041, it will require an increase in residential units of 686 units or 28 units per year, and with 42.6% of these units needing to be "affordable", Gabriola would require 12 affordable housing units per year. This can be accomplished by a number of actions:

- Local not-for-profit organizations can acquire land through donation and apply for funding to construct affordable housing;

- The Local Trust Committee can strengthen their affordable housing policies and direction in the OCP to support various forms of affordable housing; and
- The Local Trust Committee could consider entering into Housing Agreements with individual owners of housing and not-for-profit organizations to ensure affordable housing stays affordable in the long-term.

5.0 Gambier and Keats Islands Housing Needs

Gambier, Keats and the other islands within the Local Trust Area are accessed by a BC Ferries contracted water taxi originating out of Langdale Terminal. Various private water taxis provide service to points around the community nodes closer to Horseshoe Bay and off the Sunshine Coast. There is no car ferry access to any of the islands in this area. In addition, they have very small populations; as such, much of the census material is not broken down by island. Gambier and Keats Islands are located within the Sunshine Coast Regional District (SCRD).

5.1 Demographics and Population

The following information provides a summary of the current population and demographic breakdown as well as the projections for the future. Gambier and Keats Islands are within the same DPL; therefore, grouped throughout this report.

5.1.1 Population 2016

Demographics and Age

The 2016 Census indicates that the combined population of Gambier and Keats Islands is 240. The population is older than the SCRD and the population of BC, with notably higher rates of those between 55 and 74 years of age. The median age for Gambier and Keats Islands is 61.4 compared to 54.9 for SCRD and 43.0 for BC. **Table 5.1** and **Figure 5.1** illustrate the population of Gambier Island, compared to the SCRD and BC.

Table 5.1: Gambier and Keats Islands Age Categories (Statistics Canada 2017c)

Ages - 2016	Gambier and Keats	% Total	SCRD	% Total	BC	% Total
0 to 4 years	-	0.0%	525	3.7%	220,625	4.7%
5 to 14 years	-	0.0%	1,215	8.5%	470,760	10.1%
15 to 19 years	5	2.1%	705	4.9%	258,980	5.6%
20 to 24 years	5	2.1%	555	3.9%	287,560	6.2%
25 to 44 years	30	12.5%	2,465	17.2%	1,208,030	26.0%
45 to 54 years	35	14.6%	1,885	13.1%	676,740	14.6%
55 to 64 years	65	27.1%	2,810	19.6%	679,020	14.6%

Median Age	**61.4**		**54.9**		**43.0**	

Figure 5.1: Gambier and Keats Islands Population Pyramid

Seniors and Retirees

Table 5.2 provides a more detailed breakdown of the senior population on Gambier and Keats Islands. Senior population is defined here as 55 and over. According to the 2016 Census, over 68.8% of Gambier and Keats Islands residents are over the age of 55, higher than the SCRD (48.8%) and BC (32.9%).

Further, when compared to the SCRD and BC, Gambier and Keats Islands has more residents aged 60 to 74 years of age. However, less of the proportion of residents are aged 75 years and above. This could indicate that seniors may be 'aging out' of the island due to a lack of suitable housing.

Table 5.2: Gambier and Keats Islands Seniors Ages (Statistics Canada 2017c)

Senior's Ages	Gambier and Keats	% Total	SCRD	% Total	BC	% Total
55 to 59 years	25	15.2%	1,285	18.3%	354,925	23.2%

Senior's Ages	Gambier and Keats	% Total	SCRD	% Total	BC	% Total
60 to 64 years	40	24.2%	1,525	21.8%	324,095	21.2%

% Total Population		**68.8%**		**48.8%**		**32.9%**

5.1.2 Household Characteristics

Household Composition

This report uses statistics for households as they better represent residential dwellings units rather than individuals. Gambier and Keats Islands have a much lower proportion of families with children (10.0%) than the SCRD (25.3%) and BC (35.5%). In the case of lone parent families, the composition is similar. **Table 5.3** shows the household composition for Gambier and Keats Islands, compared to SCRD and BC in more detail.

Table 5.3: Gambier and Keats Islands Household Composition (Statistics Canada 2017c)

Household Composition	Gambier and Keats	% Total	SCRD	% Total	BC	% Total
Families with children	15	10.0%	3,540	25.3%	668,035	35.5%
Lone parent families	5	3.3%	1,205	8.6%	197,940	10.5%
Families without children	65	43.3%	5,175	37.0%	527,700	28.0%
One person households	60	40.0%	4,615	33.0%	541,915	28.8%
Multiple census family households	5	3.3%	185	1.3%	55620	3.0%
Two or more person non-census family households	5	3.3%	480	3.4%	88,705	4.7%
Total Households	**150**	**100%**	**13,995**	**100%**	**1,881,975**	**100%**

Table 5.4 shows the trends in household composition on Gambier and Keats Islands over a five year period. There has been an increase of 15 households (11.1%) on Gambier and Keats Islands over this period. The total number of one person households and lone parent families has also increased over the same period. There has been a 33.3% decrease in the number of “other households” (multi-family and two or more person non-census family households) on Gambier and Keats Islands over a five year period. This could indicate a reduction of housing affordability to those not defined as census families, but living in the same household (roommates), as well as families sharing homes.

Table 5.4: Gambier and Keats Islands Household Composition (2011, 2016 Census)

Household Composition	2011	2016	5 Year Change	% Change
Families with children	15	15	0	0.0%
Families without children	5	5	0	0.0%
Lone parent families	55	65	10	18.2%
One person households	50	60	10	20.0%
Other households	15	10	-5	-33.3%
Total Households	**135**	**150**	**15**	**11.1%**
Average Household Size	**1.8**	**1.8**	**0.0**	**0.0%**

Tenure – Rental and Ownership

Table 5.5 shows the breakdown of home ownership compared to rental units on Gambier and Keats Islands, SCRD, and BC. Only 7.1% of all households are rented on Gambier and Keats Islands, compared to 22% in the SCRD and 31.9% in BC. This results in less rental opportunities on Gambier and Keats Islands.

Table 5.5: Gambier and Keats Islands Household Tenure (Statistics Canada 2017c)

Household Tenure	Gambier	% Total	SCRD	% Total	BC	% Total
Rented	10	7.1%	3,080	22.0%	599,360	31.9%
Owned	130	92.9%	10,890	78.0%	1,279,020	68.1%
Total Households	**140**	**100%**	**13,970**	**100%**	**1,878,380**	**100%**

Household tenure data was not available at the census level for 2006 and 2011 on Gambier and Keats Islands; therefore, household tenure over time could not be calculated.

Household Sizes

Table 5.6 shows household size on Gambier and Keats Islands compared to SCRD and BC. Reflective of the household composition, there is a higher proportion of one person (41.4%) and two person (48.3%) households on Gambier and Keats Islands when compared to the SCRD (33% and 42.7%) and BC (28.8% and 35.3%). 89.7% of residents on Gambier and Keats Islands live in one or two person households. The average number of persons per household on Gambier and Keats Islands is 1.7 which is lower than that of the SCRD (2.1) and BC (2.4).

Table 5.6: Gambier and Keats Islands Household Sizes (Statistics Canada 2017c)

Household Size	Gambier and Keats	% Total	SCRD	% Total	BC	% Total
1 person	60	41.4%	4,615	33.0%	541,910	28.8%
2 persons	70	48.3%	5,975	42.7%	663,770	35.3%
3 persons	5	3.4%	1,625	11.6%	277,690	14.8%
4 persons	5	3.4%	1,225	8.8%	243,125	12.9%

Household Size	Gambier and Keats	% Total	SCRD	% Total	BC	% Total
5 or more persons	-	0.0%	555	4.0%	155,470	8.3%
# Private households	145	97%	13,995	100%	1,881,970	100%
# Persons in private households	245		29,370		4,560,240	
Average # Persons	**1.7**		**2.1**		**2.4**	

5.2 Income 2015

The 2016 Census captures the income from the previous year, in this case, 2015. Detailed income information for Gambier and Keats Islands is not available. Statistics Canada is not able to provide this data due to a small population, as privacy issues may result. Only the median incomes were reported at the island level. **Table 5.7** shows the median income for Gambier and Keats Islands compared to SCRD and BC. The median reported income for Gambier and Keats Islands is lower than SCRD and BC.

Table 5.7: Gambier and Keats Islands Median Income (Statistics Canada 2017c)

Total Income 2015	Gambier	SCRD	BC
Median Income	$53,888	$60,279	$69,995

5.3 Current Housing Supply

5.3.1 Existing Housing Stock

Structure Type

The housing supply on Gambier and Keats Islands is 100% single-detached dwellings. This is higher than the SCRD (79.7%) and BC (44.1%). Lack of diversity in housing stock can be a contributor to a lack of affordable rental and ownership options for a full range of income groups and family compositions. This relationship is shown in **Table 5.8.**

Table 5.8: Gambier and Keats Islands Housing by Structure Type, 2016 (Statistics Canada 2017c)

Structure Type	Gambier	% Total	SCRD	% Total	BC	% Total
Single-detached house	140	100.0%	11,150	79.7%	830,660	44.1%
Apartment 5+ storeys	-	0.0%	100	0.7%	177,830	9.4%

Total Private Dwellings	**140**	**100%**	**13,995**	**100%**	**1,881,975**	**100%**

Housing Indicators and Tenure

Statistics Canada data for housing indicators was not available at the DPL geographic level for this report.

Age of Housing Stock

Table 5.9 shows the period of construction of dwellings on Gambier and Keats Islands, compared to SCRD and BC. Interestingly, construction on Gambier and Keats Islands prior to 2000 mirrored BC. Gambier and Keats Islands experienced five years of no growth between 2001 and 2005 but since has experienced 11.1% growth rates in consecutive census periods.

Table 5.9: Gambier and Keats Islands Dwelling Age (Statistics Canada 2017c)

Construction Period	Gambier	% Total	SCRD	% Total	BC	% Total
1960 or before	20	14.8%	1,360	9.7%	267,560	14.2%
1961 to 1980	35	25.9%	3,825	27.3%	559,485	29.7%
1981 to 1990	25	18.5%	2,375	17.0%	289,565	15.4%

Non Resident Ownership

Table 5.10 shows the portion of dwellings on Gambier and Keats Islands which are occupied by usual residents. Usual place of residence applies to those who own multiple properties. At 13.1%, Gambier and Keats Islands rate of dwellings occupied by usual residents is much lower than that of the SCRD (80.5%) and BC (91.2%). This indicates that there are a high proportion of vacation properties on Gambier and Keats Islands.

Table 5.10: Gambier and Keats Islands Dwellings Occupied by Usual Residents 2011-2016

Census Year	Gambier	% Total	SCRD	% Total	BC	% Total

% Change 2011-2016		**-1.1%**				**-0.7%**

5.3.2 Rental Availability and Affordability

Private Market Listings

The CMHC does not conduct rental market surveys for Gambier and Keats Islands, and there is no formal inventory of rental properties conducted on the Gambier and Keats Islands. The rental housing market is extremely limited for Gambier and Keats Islands. As of January 2018, there were no long-term homes available for rent in public listings on Craigslist, Padmapper, or Kijiji. A search on AirBnB found four vacation rental properties available.

While this information is far from a complete picture of the rental market on Gambier and Keats Islands, it begins to paint a picture of a lack of affordable housing rental options. The survey also discussed reported rents; however, there were no responses to the survey from renters on Gambier and Keats Islands.

Social Housing

There is no social housing or supported housing on either Gambier or Keats Islands.

5.3.3 Homeowner Options

Current Listings

Table 5.11 below provides MLS listings as of January 30, 2018 to provide a snapshot of housing currently available for purchase on Gambier and Keats Islands. The table also includes income required for ownership, based on an assumption that no more than 30% of income is used for shelter costs, $200/ month in costs of ownership, 75% loan over a 25 year amortization period, and 4% interest.

There were a total of six listings available on Gambier and Keats Islands, with an average price of $546,500 and a median price of $441,500. While the number of available listings is relatively low, there is presently a range of home price categories available on Gambier and Keats Islands. It is noted that all homes available for purchase on this date were single family dwellings.

Table 5.11: Gambier and Keats Islands MLS Listings, January 2018

Price Range	# Listed	Average Cost	Income Required
$0 - $149,999	-		
$150,000 - $199,999	-

Census Reported Dwelling Values

Data for median value of dwellings by structure type is not available at the geographic level provide data for Gambier and Keats Islands, specifically.

5.4 Housing Affordability

Sufficient Statistics Canada data was not available to complete an analysis of housing affordability by income range. The required statistics were unavailable because of suppression due to low population numbers and confidentiality concerns.

5.5 Community Perspectives

For a description of methods, please see **Section 1.2 - Approach and Methods**.

5.5.1 Stakeholder/Key Informants Interviews

No community or stakeholder meeting was held on either Gambier or Keats Islands, but the Local Trustee provided information about the islands, housing and employment.

5.5.2 Online Survey

There were a total of 38 responses from Gambier and Keats to the Islands Trust Online Survey. This represents just over 10% of the permanent population. No renters responded to the survey; only home owners. Of the respondents, 25% were full-time residents of the islands.

Figure 5.1: Are you a full-time or part-time / seasonal resident?

The survey asked people what the housing gaps were on Gambier and Keats Islands. The top two answers by the respondents were affordable home ownership and universally accessible housing. There were some "other" responses which generally stated that the respondent was not aware of any housing gaps. **Figure 5.2** depicts the identified gaps and response rates.

Figure 5.2: What housing supply gaps exist on your island?

The survey also asked responded to identify groups that might not be able to access housing on Gambier and Keats Islands. **Figure 5.3** illustrates the responses. The respondents clearly identified young adults as the main group unable to access housing.

Figure 5.3: What groups are not able to access housing on your island?

The survey asked where people who need affordable housing lived on Gambier and Keats Islands. The respondents indicated that rental housing, and trailers or mobile homes were the most likely location (**Figure 5.4**).

Figure 5.4: Where do the people that need affordable housing currently live on your island?

Illegal and inappropriate housing is an indicator that residents are unable to find legal, healthy and affordable dwellings units. Over half of the respondents were aware of people living in illegal and inappropriate housing on Gambier and Keats Islands (**Figure 5.5**).

Figure 5.5: Are you aware of people living in illegal and inappropriate housing on your island?

When asked what the top three housing challenges being faced by Gambier and Keats Islands residents, the responses were different from other islands. The top two responses were lack of physical accessibility and location relative to transportation. With dependence upon the ferry and connectivity to Vancouver and the lower mainland, transportation was a large issue. The third and fourth challenges were that housing was unaffordable relative to income and insecure tenure, and need for frequent moves. This reflects the seasonal nature of rentals and the short-term vacation rentals taking housing out of the market.

Figure 5.6: Please select the top three housing challenges faced by your island.

5.6 Affordable Housing Gaps

5.6.1 Gaps by Income Group

The online survey identified the primary gap of young adults who cannot access housing on Gambier and Keats Islands.

5.6.2 Vulnerable Populations

The survey and Local Trustee did not identify significant vulnerable populations.

5.7 Conclusion and Recommendations

Because of the lack of vehicle ferry to the islands, the lack of connecting roads and other amenities (ie schools, shops, power) and the very high percentage of vacation property ownership, affordable housing is not a high priority in this Local Trust Area at this time.

6.0 Hornby Island Housing Needs

Hornby Island is accessed by two ferries from Buckley Bay (crossing Denman Island) and has one of the highest seasonal resident populations of the Northern Region Islands; only 50.7% of dwellings are occupied by usual residents. The island has local commercial development including visitor accommodation, retail stores, restaurants, wineries and home businesses. There is a community school, and a medical clinic.

Thirty-five percent of the households on Hornby Island have an income of less than $24,999. This represents a less wealthy population than many of the Gulf Islands. There is limited employment on the island, much of it seasonal or part-time. The two ferry routes required to reach Vancouver Island are a barrier to commuting and make it costly to access goods and services not available on Hornby Island.

6.1 Demographics and Population

6.1.1 Population 2016

Demographics and Age

The 2016 Census indicates that the population of Hornby Island is 1,010. As with Gabriola and Denman Islands, the population on Hornby Island is generally older than the CVRD and the population of BC, with notably higher rates of those between 55 and 74 years than CVRD or BC, at 49.5% in this age group for Hornby, 32.6% for CVRD, and 25.1% for BC. The median age for Hornby Island is 61.4, compared to 50.8 for the CVRD and 43.0 for BC. **Table 6.1** illustrates the Hornby Island age characteristics compared to CVRD and BC.

Table 6.1: Hornby Island Age Categories, 2016 (Statistics Canada 2017d)

Ages - 2016	Hornby	% Total	CVRD	% Total	BC	% Total
0 to 4 years	30	3.0%	2,800	4.2%	220,625	4.7%

Figure 6.1: Hornby Island Population Pyramid

Seniors and Retirees

A more detailed breakdown of the population aged 55 and up indicates a current potential need for seniors housing that will be exacerbated as these cohorts continue to age. While Hornby Island has proportionally fewer residents aged 55 to 59 years compared to the CVRD and BC, it has a higher proportion of those in the 60 to 74 year age range.

Although Hornby Island has an overall greater proportion of residents aged 55 and above compared to the CVRD and BC, there are proportionally fewer Hornby Island residents aged 85 and above, similar to both Denman and Gabriola Islands. As with Denman and Gabriola Islands, this could indicate that seniors may be 'aging out' of Hornby Island due to a lack of suitable housing, and/or lack of required

health care and other services. For example, while Hornby Island's proportion of residents aged 55 and above is 62.9%, compared to CVRD's 43.2% and BC's 32.9%, in the over 85 year age group, Hornby Island has a 4.7% proportion, compared to 7.0% for CVRD and 7.1% for BC. **Table 6.2** shows the comparison of seniors' population in more detail.

Table 6.2: Hornby Island Seniors Ages (Statistics Canada 2017d)

Seniors Ages	Hornby	% Total	CVRD	% Total	BC	% Total

6.1.2 Household Characteristics

Household Composition

This report primarily uses census data gathered for household units, rather than individuals, as household income and composition give a clearer picture of housing affordability, suitability and needs.

Hornby Island has a much higher proportion of one person households (46.4%) than both the CVRD (29.5%) and BC (28.8%). The Hornby Island's proportion of families without children (32.1%) is higher than that of BC (28.0%); although, it is very close to that of the CVRD (35.8%). There are fewer of both families with children and lone parent families on the island, compared to both the CVRD and BC.

Table 6.3: Hornby Island Household Composition (Statistics Canada 2017d)

Household Composition	Hornby	% Total	CVRD	% Total	BC	% Total
Families with children	90	16.1%	8,710	29.5%	668,035	35.5%
Lone parent families	35	6.3%	2,835	9.6%	197,940	10.5%
Families without children	180	32.1%	10,580	35.8%	527,700	28.0%
One person households	260	46.4%	8,730	29.5%	541,915	28.8%
Multiple census family households	5	0.9%	375	1.3%	55620	3.0%
Two or more person non-census family households	25	4.5%	1,170	4.0%	88,705	4.7%
Total Households	**560**	**100%**	**29,565**	**100%**	**1,881,975**	**100%**

Over the last 10 years, there has been a total increase of 10 households on Hornby Island (a 1.8% increase). At the same time, average household size has been reduced from 1.9 to 1.8, a reduction of 5.3%. The greatest 10 year increase in household groups has been in one person households, which have increased by 26.8%, as well as families with children, which have increased by 20.0%. There was also a 50% increase in 'other households', but the relative number is small (10 additional households), and this could be due, in part, to changes in census categories that fall under this grouping (e.g., multiple census family households were not included in the 2011 census data).

Table 6.4: Hornby Island Household Composition (2006, 2011, 2016 Census)

Household Composition	2006	2011	2016	5 Year Change	% Change	10 Year Change	% Change

Average Household Size	**1.9**	**1.9**	**1.8**	**-0.1**	**-5.3%**	**-0.1**	**-5.3%**

Tenure - Rental and Ownership

Hornby Island has a 19.7% proportion of renters (80.3% owners), which is a lower proportion of renters than found in the CVRD and BC. Hornby Island's proportion compares to a 23.6%/76.4% renter owner split for the CVRD and a split of 31.9%/68.1% for BC.

It should be noted that the 2011 data used in **Tables 6.5 to 6.7** are taken from the 2011 National Household Survey, which had a non-return rate of approximately 55% for Hornby Island.

Table 6.5: Hornby Island Household Tenure (Statistics Canada 2017d)

Household Tenure	Hornby	% Total	CVRD	% Total	BC	% Total

Household Sizes

Nearly half of Hornby Island's households (46.4%) are one person households, compared to 29.5% for the CVRD and 28.8% for BC. The proportion of two person households on the Island (39.3%) is lower than that of the CVRD (42.5%), but higher than BC as a whole (35.3%). The average household size for Hornby Island is 1.8, compared to 2.2 for the CVRD and 2.4 for BC.

Table 6.8: Hornby Island Household Sizes (Statistics Canada 2017d)

6.2 Income 2015

6.2.1 Taxable Income Distribution

The 2016 Census provides information on the incomes of respondents for the previous year (2015). Average tax-filer income on Hornby Island is $47,006, which is 61.3% of the CVRD average income ($76,711) and 52% of BC's ($90,354). The median income for Hornby Island is also lower, at $35,328, which is 55.7% of the CVRD median income, and 50.5% of BC.

Table 6.9: Hornby Island Total Taxable Income (Statistics Canada 2017d)

Total Income 2015	Hornby	% Total	CVRD	% Total	BC	% Total
Without income	15	1.6%	1,710	3.0%	142,970	3.7%

6.2.2 Household Income

Household income is used as an indicator of housing affordability, as it includes every person in a dwelling who may be contributing to paying for the housing costs. Hornby Island has a lower median household income in all economic family compositions than both the CVRD and BC as a whole. For couple families with children on Hornby Island, the median income is $67,840, which compares to $103,797 for the CVRD and $111,736 for BC. Lone parent families on Hornby Island had a median income of $32,192, while the CVRD figure is $44,587 and BC is $51,056.

Table 6.10: Hornby Island Median Household Income, 2015 (Statistics Canada 2017d)

Economic Family Composition	Hornby	% Total	CVRD	% Total	BC	% Total
Couple families with children	$67,840	9.9%	$103,797	19.1%	$111,736	24.4%
Lone parent families	$32,192	5.8%	$44,587	8.6%	$51,056	9.0%
Families without children	$62,848	30.6%	$74,775	33.3%	$80,788	26.3%
Not in an economic family	$21,786	52.9%	$30,084	39.1%	$31,255	40.2%
All Households	**$35,328**	**100%**	**$63,397**	**100%**	**$69,995**	**100%**

Household Income Distribution

Household income distribution can be used to determine approximate numbers of affordable housing options for different income groups. While the median income of Hornby Island is $35,328, there is also a significant proportion (11.6%) of high income households, with $100,000 in income and higher.

Table 6.11: Household Income Distribution, 2015 (Statistics Canada 2017d)

Total Income 2015	Hornby	% Total	CVRD	%Total	BC	% Total

Average Income	**$47,006.00**		**$76,711.00**		**$90,354.00**	

Overall, there appears to be a general shift to higher household incomes on Hornby Island, which could be an indication that housing is becoming less affordable for those in middle and lower household income categories. There has been a combined decrease of 1.2% in the income categories $30,000 and below over the 2005 to 2015 period (approximately median income and lower), while there has been a subsequent increase of 214.8% in the combined categories $30,000 and above.

The greatest decline in household income groups on Hornby Island in the 2005 to 2015 period has been in the $40,000 to $49,999 group, which has declined by 55.6%. Households in the $10,000 to $19,999 range also declined by 37.9%. The greatest increase in the same time period has been in the $100,000 group, which has increased by 85.7%.

Household Income Groups and Household Income Disparity

For ease of comparison with the 2015 SS HNA, this report uses the same income group definitions. **Table 6.13** provides the income range for each category, as defined in relation to Hornby Island's median income of $35,328. **Table 6.14** provides a comparison of the proportion of these household income groups between Hornby Island, the CVRD and BC as a whole.

Table 6.13: Hornby Island Household Income Groups, 2015 (Statistics Canada 2017d)

Income Groups	Definition	Income Range	Hornby	% Total
Little to no income	under $15,000	under $15,000	85	15.2%
Low income	$15,000 to 50% median	$15,000 to $19,999	55	9.8%
Low to moderate income	50% - 80% median	$20,000 to $29,999	95	17.0%

Above moderate to high	120% - 150% median	$45,000 to $49,999	15	2.7%
High income	150% median +	$50,000 and over	195	34.8%
All Households	**$35,328**		**560**	**100%**

Hornby Island has a similar proportion of those in the high income category (34.8%) to BC (32.3%); although, it has a higher proportion than the CVRD (25.2%). Hornby Island also has a higher proportion of households earning under $15,000, at 15.2%, than both the CVRD (5.5%) and BC (6.7%).

6.3 Current Housing Supply

6.3.1 Existing Housing Stock

Structure Type

As with other islands in the Northern Region, the housing supply on Hornby Island is largely homogenous and dominated by single-detached dwellings, which form 91.0% of the total housing supply. This compares to the CVRD proportion of single-detached homes at 68.4% and BC at 44.1%. This lack of diversity in housing stock may contribute to a lack of affordable rental and ownership options for a full range of income groups. However, Hornby Island has a comparatively greater proportion of moveable dwellings than other islands in the Northern Region at 6.3%.

Table 6.15: Hornby Island Housing by Structure Type, 2016 (Statistics Canada 2017d)

Structure Type	Hornby	% Total	CVRD	% Total	BC	% Total
Single-detached house	505	91.0%	20,230	68.4%	830,660	44.1%

Housing Indicators and Tenure

Data for housing indicators was not available at the DPL geographic level for this report.

Age of Housing Stock

Hornby Island's housing stock generally follows the same pattern of construction periods as the CVRD and BC; although, there is a greater proportion of homes built in the 1981 to 1990 period (26.3%) than the CVRD (16.6%) and BC (15.4%). There are also fewer homes built before 1960 than the CVRD or BC.

Table 6.16: Hornby Island Dwelling Age (Statistics Canada 2017d)

Construction Period	Hornby	% Total	CVRD	% Total	BC	% Total
1960 or before	25	4.2%	3660	12.4%	267560	14.2%
1961 to 1980	200	33.9%	8070	27.3%	559485	29.7%
1981 to 1990	155	26.3%	4900	16.6%	289565	15.4%
1991 to 2000	80	13.6%	6330	21.4%	331865	17.6%

Total	**590**	**100%**	**29,565**	**100%**	**1,881,965**	**100%**

Non-Resident Ownership

Hornby Island's proportion of dwellings occupied by usual residents is significantly lower than both the CVRD and BC. There has been a decrease of 6.2% resident homeowners since 2011.

Table 6.17: Hornby Island Dwellings Occupied by Usual Residents 2011-2016

Census Year	Hornby	% Total	CVRD	% Total	BC	% Total

6.3.2 Rental Availability and Affordability

Private Market Listings

The CMHC does not conduct rental market surveys for Hornby Island and there is no formal inventory of rental properties conducted on Hornby Island. The rental housing market is extremely limited on Hornby Island. As of January 2018, there were some short-term rentals available for rent in public listings on Craigslist, Padmapper and Kijiji. A search on AirBnB found three vacation rental properties available. While this information is far from a complete picture of the rental market on Hornby Island, it paints a picture of a lack of affordable housing rental options. Anecdotal evidence and survey results for this assessment confirm this limited market for rental housing. While many respondents to a

Figure 6.2: What is your monthly rent?

survey conducted for this assessment reported that their rents were in the affordable ranges provided in **Section 6.4.1**, there appears to be an overall lack of available units in these price ranges.

Social Housing

Hornby Island Elder Housing Society operates 11 rental units for seniors' housing and has a waiting list of over 30 people. Islanders' Secure Land Association is working on a development of 20-30 affordable rental units and has received expressions of interest from over 40 people.

6.3.3 Homeowner Options

Current Listings

Table 6.18 provides MLS listings as of January 30, 2018 to provide an understanding of housing currently available for purchase on Hornby Island. The table also includes the income required for ownership, based on an assumption that no more than 30% of income is used for shelter costs, $200/month in costs of ownership, 75% loan, 25 year amortization period and 4% interest.

There were a total of six listings on this date, with an average price of $601,500 and median price of $514,000. While the number of available listings is relatively low, there is presently a range of home price categories available on the island. All homes available for purchase on this date were single family dwellings.

Table 6.18: Hornby Island MLS Listings, January 2018

Price Range	# Listed	Average Cost	Income Required
$0 - $149,999	-		$8,000
$150,000 - $199,999	-		$8,000

Census Reported Dwelling Values

Data for median value of dwellings by structure type is not available at the geographic level and so data for Hornby Island specifically is not available.

6.4 Housing Affordability

6.4.1 Affordability Targets

Housing affordability is defined in **Section 1.1** of this report. Housing is generally considered affordable if it meets suitability and adequacy standards, and does not cost more than 30% of total household income.

Based on these assumptions, **Table 6.19** provides affordability targets for different household groups, based on median incomes of each group as provided in the 2016 Census. The percentage of the total population for each group is also provided, to indicate the ideal percentage of total available housing units available for each household type and income level.

Affordable purchase price was calculated based on an assumed 4% interest rate, 25 year amortization, and 75% loan-to-value ratio. To allow comparison with the SS HNA, the homeowner monthly shelter costs includes $200 for taxes, insurance and utilities.

Household Type

Table 6.19: Hornby Island Household Affordability Targets

Household Affordability Targets	% Population	Median Income	Affordable Rent	Affordable Purchase
Couple families with children	9.9%	$67,840	$1,696	$378,000
Lone parent families	5.8%	$32,192	$805	$153,000
Families without children	30.6%	$62,848	$1,571	$347,000
Not in an economic family	52.9%	$21,786	$545	$88,000
All Households (2015)	**99%**	**$35,328**	**$883**	**$173,000**

Income Groups and Ideal Affordable Housing Supply

Table 6.20 provides a detailed breakdown of the ideal number of housing units available for each of the income groups identified in **Table 6.14** above, based on the percentage of the total households each group comprises. Affordable rent and purchase prices have been calculated using the same assumptions and benchmarks as previously identified in this report.

As an illustration of how this table can be used, it indicates that 45.6% of households (all households below moderate income of $30,000) need rental housing $688/month or less. As another example, 8.8% of households ($100,000 annual household income and above) can afford a home with a purchase price of $581,000.

Table 6.20: Hornby Island Ideal Housing Supply - Rental and Purchase Prices

Income Groups	Income Range	#	% Households	Average Income	Affordable Rent	Affordable Purchase
Little to no income	Under $5,000	25	4.4%	$5,000	$125	n/a
	$5,000 to $9,999	25	4.4%	$7,500	$188	n/a

Median Income		**570**	**100%**	**$35,328**	**$883**	**$173,000**

6.5 Community Perspectives

For a description of methods, please see **Section 1.2 - Approach and Methods**.

6.5.1 Stakeholder/Key Informants Interviews

On November 10, 2017, a stakeholder meeting was held on Hornby Island with members of the Hornby Island Elder Housing Board, the Local Trustee, the Housing Committee, the Arts Committee and a realtor. The discussion identified the need for more affordable secure rental accommodation and more family housing.

6.5.2 Online Survey

A total of 37 responses were received from the Hornby Island residents to the Islands Trust Housing Needs Survey. This was the lowest response rate by island for the survey. This represents 3.8% of the population of Hornby Island. Of the 37 responses, 78.4% of respondents indicated that they were full-time residents on Hornby Island and 21.6% of respondents are part-time residents (**Figure 6.3**).

Figure 6.3: Do you live on the island part-time or full-time?

Over 86% of respondents indicated that they own their homes. Of the 14% of renters (five survey responses) the median rent paid on Hornby is $667 per month. Twenty percent of the population reporting in the survey indicated that they pay less than $400 per month. This may reflect the fact that seniors in Hornby Elder Housing may receive subsidies, and other people are living in illegal and/or inappropriate housing.

The survey also asked respondents about what the housing gaps may be present on Hornby Island. The top three responses were affordable rental, affordable home ownership and family rental housing. This indicates that respondents feel affordability, both ownership and rental, is a problem on Hornby Island.

Figure 6.4: What housing supply gaps exist on your island?

Respondents were asked to identify which demographic groups may not be able to access housing on Hornby Island. Over 90% of respondents indicated that families and young adults were the top two groups that might not be able to access housing on Hornby Island. Other responses included low-income earners.

Figure 6.5: What groups are not able to access housing on your island?

In both survey questions (**Figure 6.4** and **Figure 6.5**), seniors were ranked lower. This could be the result of a perception that there are already adequate seniors housing in Hornby Island. Diving into this deeper, the survey asked respondents if they were aware of any programs to assist seniors living on Hornby Island. Over 70% of respondents indicated that they were aware of programs to assist seniors. The majority of respondents indicated that the Home Assist, Home Support and Better at Home programs helped seniors on Hornby Island.

Figure 6.6: Are you aware of programs to assist seniors?

Respondents were asked to identify where people who need affordable housing live on Hornby Island (**Figure 6.7**). Over 80% of respondents indicated that those in need of affordable housing live in trailers or mobile homes, and illegal cottages. Illegal suites represented 45% of the responses, but it is not clear if this indicates that there are fewer illegal suites on Hornby Island. Also, when asked if there was enough affordable housing available on Hornby Island, overwhelmingly, respondents indicated that there was not enough.

Figure 6.7: Where do the people that need affordable housing currently live on your island?

Finally, the survey asked people to select the top three housing challenges faced by their Island. The Hornby Island responses identified the following three challenges:

1. Unaffordable relative to income – particularly since there is a large percentage of households that earn under $25,000 per year.
2. Uncertain tenure forcing people to move seasonally – often forcing people to share accommodation in the summer months and/or live in tents and campgrounds.
3. Lack of housing options – while Hornby Island has seniors housing, there are no options for other secure rental options.

Figure 6.8: Please select the top three housing challenges faced by your island.

6.6 Affordable Housing Gaps

It appears from the online survey and the census data that the gaps in housing are for the young adults, families and employees. This reflects the lack of affordable, secure, rental accommodation. There has not been a homelessness count on Hornby Island, but 41% of the population have no income or are in the low/moderate income levels.

6.7 Conclusion and Recommendations

Based on the population projections, there could be a need for potentially 158 residential units in the next 25 years. Based on the 2016 Census, 41% of the total population falls within the no, low and low-moderate income levels. The 2008 Housing Needs Assessment on Hornby and Denman Island identified a total housing need of 97 units for renters and seniors. Based on the population growth projected for 158 units and 41% need for affordable rental, Hornby Island now requires between 65 and 97 affordable housing units. This would require between three and four affordable rental housing units to be constructed each year.

7.0 Lasqueti Island Housing Needs

Due to the small total population of Lasqueti Island, there are many statistics that are not tabulated or are not considered reliable for Lasqueti Island. We are not aware of what the median age is because they do not record the data by age category. The important data was gathered from the local Trustee and the stakeholder meeting. The community is supportive and the island does appear to attract young families. The community spirit on Lasqueti Island is strong as demonstrated by the fundraising and construction of a medical clinic. They have one not-for-profit seniors' cottage with plans for more. Lasqueti Island is part of the Powell River Regional District (PRRD).

7.1 Demographics and Population

The population of Lasqueti Island is 399; the population has decreased 6.3% from the previous census period. **Table 7.1** illustrates the population changes over time. Note that detailed population information is not available for Lasqueti Island through Statistics Canada as it is too unreliable to be published.

7.2 Current Housing Supply

7.2.1 Non-Resident Ownership

Table 7.2 shows the portion of dwellings on Lasqueti Island which is occupied by usual residents. Usual place of residence applies to those who own multiple properties. At 59.0%, Lasqueti Island's rate of dwellings occupied by usual residents is lower than that of the PRRD (82.6%) and BC (91.2%). The percentage of dwellings occupied by usual residents on Lasqueti Island has decreased by 25.5% since 2011.

Table 7.2: Lasqueti Island Dwellings Occupied by Usual Residents 2011-2016 (Statistics Canada 2012e, 2017e)

Census Year	Lasqueti	% Total	PRRD	% Total	BC	% Total
2016	560	50.7%	9,412	92.2%	1,881,969	91%
2011	504	56.9%			1,764,637	90.7%
% Change 2011-2016		**-6.2%**				**-0.7%**

7.2.2 Rental Availability and Affordability

The CMHC does not conduct rental market surveys for Lasqueti Island, and there is no formal inventory of rental properties conducted on Lasqueti Island. The rental housing market is extremely limited on Lasqueti Island. As of January 2018, there were no rental properties available for rent in public listings on Craigslist, Padmapper or Kijiji. A search on AirBnB found three vacation rental properties available. While this information is far from a complete picture of the rental market on Lasqueti Island, it paints a picture of a lack of affordable rental housing options. Anecdotal evidence and survey results from this assessment confirm this limited market for rental housing.

7.2.3 Social Housing

There are currently no social housing programs on Lasqueti Island. However, there is currently one supported single detached cottage currently inhabited by a senior. Lasqueti Island has plans for additional cottages should funding be made available.

7.2.4 Homeowner Options

Table 7.3 provides MLS listings as of January 30, 2018 to provide a snapshot of housing currently available for purchase on Lasqueti Island. The table also includes income required for ownership, which is based on multiple assumptions including: no more than 30% of income is used for shelter costs, $200/ month in costs of ownership, 75% loan over a 25 year amortization period, and 4% interest.

There were a total of seven listings available on Lasqueti Island, with an average price of $841,285 and a median price of $649,900. While the number of listings is relatively low, there is presently a range of home price categories available on Lasqueti Island. It is also important to note that the average listing prices are inflated due to two homes listed at over $1,000,000.

Table 7.3: Lasqueti Island MLS Listings, January 2018

Price Range	# Listed	Average Cost	Income Required
$0 - $149,999	-

7.3 Community Perspectives

For a description of methods, please see **Section 1.2 - Approach and Methods**.

7.3.1 Stakeholder/Key Informants Interviews

A stakeholder meeting was held on Lasqueti Island in addition to an extensive interview with Timothy Peterson, Local Trustee.

Lasqueti Island is not serviced by BC ferries but through a private passenger ferry from French Creek. It was noted during the meetings that Lasqueti Island is the only island that has employee housing for the ferry workers. Years ago, the company purchased a house at the ferry terminal and it has been used as a shared accommodation for ferry workers for years.

The stakeholders indicated that young families who want a rustic rural lifestyle are attracted to Lasqueti Island. They want to farm and raise their children in a natural environment. However, housing is

expensive and not available. They try and rent or look at cooperative situations or share accommodations, but that is not what they want to do.

Lasqueti Island has the smallest number of older people. This could be related to the fact that elderly people chose to leave the island, with limited resources as they age.

7.3.2 Online Survey

The online survey received 64 responses, almost 20% of Lasqueti Island population. Almost 83% of the responses were from full-time residents and 17.2% from part-time residents. Of the 64 respondents, 86% owned their home and 14% rented.

The survey asked respondents to identify existing gaps in the housing supply on Lasqueti Island. Both affordable rental housing and affordable home ownership were the top housing supply gaps identified by respondents. Other responses identified a need for more entry level housing and rental housing.

Figure 7.1: What housing supply gaps exist on your island?

Respondents were asked to identify which groups of people might not be able to access housing on Lasqueti Island. Over 75% of respondents indicated that young adults might not be able to access housing. Second to young adults, it was also identified that families might not be able to access housing on Lasqueti Island. Other responses included low income earners and young families.

Figure 7.2: What groups are not able to access housing on your island?

The survey also asked respondents to identify where people who need affordable housing tend to live on Lasqueti Island. Illegal cottages, rental housing and shared housing were identified as places where people in need of affordable housing live. **Figure 7.3** highlights the responses per housing solution on Lasqueti Island.

Figure 7.3: Where do the people that need affordable housing currently live on your island?

Sixty-four percent of the respondents acknowledged knowing people who were living in illegal accommodations. During the stakeholder meeting, the participants identified a number of people who were currently looking for housing and were living in tents or “couch surfing” until they could find something more permanent.

Recognizing the lack of rental accommodation and the number of people who are currently living in illegal accommodations, when asked what the top three housing challenges facing Lasqueti Island, the respondents identified lack of available housing options, unaffordable relative to income and insecure tenure (and the need to move frequently). **Figure 7.4** shows the response breakdown.

Figure 7.4: Please select the top three housing challenges faced by your island.

7.4 Affordable Housing Gaps

Based on the stakeholder meeting and the online survey, it appears that the housing gaps on Lasqueti Island are secure, appropriate rental accommodation for young adults and families. The three main challenges for housing are affordability, secure rental and accessibility.

7.5 Conclusion and Recommendations

Because the census data is not reliable, this study must depend on the anecdotal and qualitative evidence. It appears that there is a need for more affordable housing. With currently one affordable unit constructed, the community would like to develop more affordable housing. The estimate of affordable housing units required is between four and six for seniors. The other area of housing in demand is larger lots for family and small farm operations. There are limited parcels of land (and limited agricultural land) on the island. Some form of cooperative housing would facilitate young families to live and work on Lasqueti Island.

8.0 Thetis Island Housing Needs

Thetis Island is accessed by ferry from Chemainus. With a permanent population of 400, Thetis Island is serviced by a marina, pubs and restaurants, and three Christian camps. The camps provide some staff accommodation. Employment is seasonal.

8.1 Demographics and Population

The following information provides a summary of the current population and demographic breakdown as well as the projections for the future.

8.1.1 Population 2016

Demographics and Age

The 2016 Census indicates that the population of Thetis Island is 400. The population is generally older than the Cowichan Valley Regional District (CVRD) and the population of BC. The demographic cohort of 65 to 74 years for Thetis Island makes up 31.3% of the total population. This is significantly higher than the CVRD (14.7%) and BC (10.5%). The median age for Thetis Island is 62.9, compared to 49.9 for CVRD and 43.0 for BC. **Table 8.1** and **Figure 8.1** illustrate the demographic comparison in more detail.

Table 8.1: Thetis Island Age Categories, 2016 (Statistics Canada 2017f)

Ages - 2016	Thetis	% Total	CVRD	% Total	BC	% Total
0 to 4 years	10	2.5%	1,900	4.6%	220,625	4.7%
5 to 14 years	20	5.0%	4,390	10.7%	470,760	10.1%

Figure 8.1: Thetis Island Population Pyramid (Statistics Canada 2017f)

Seniors and Retirees

Table 8.2 provides a more detailed breakdown of the senior population, defined here as 55 and over. According to the 2016 Census, over 62.5% of Thetis Island residents are over the age of 55, compared to 41% for the CVRD and 33% for BC.

Compared to the CVRD and BC, Thetis Island has more residents aged 60 to 74 years. However, 55 to 60 and 75 and above, Thetis Island have fewer residents. This could indicate that seniors may be 'aging out' of the island due to a lack of suitable housing.

Table 8.2: Thetis Island Seniors Ages (Statistics Canada 2017f)

Senior's Ages	Thetis	% Total	CVRD	% Total	BC	% Total
55 to 59 years	35	14.0%	3,505	20.7%	354,925	23.2%

% Total Population		**62.5%**		**41.3%**		**32.8%**

8.1.2 Household Characteristics

Household Composition

This report uses statistics for households as they better represent residential dwelling units rather than individuals. Thetis Island has a much lower proportion of families with children (14.3%) than the CVRD (31.4%) and BC (35.5%). In the case of lone parent families, the comparison is similar. **Table 8.3** shows the household composition in more detail.

Table 8.3: Thetis Island Household Composition (Statistics Canada 2017f)

Household Composition	Thetis	% Total	CVRD	% Total	BC	% Total
Families with children	25	14.3%	11,060	31.4%	668,035	35.5%
Lone parent families	10	5.7%	3,820	10.8%	197,940	10.5%
Families without children	90	51.4%	12,730	36.1%	527,700	28.0%
One person households	55	31.4%	9,560	27.1%	541,915	28.8%
Multiple census family households	0	0.0%	725	2.1%	55620	3.0%
Two or more person non-census family households	5	2.9%	1,200	3.4%	88,705	4.7%
Total Households	**175**	**100%**	**35,275**	**100%**	**1,881,975**	**100%**

Table 8.4 shows the trends in household composition on Thetis Island. There has been a 10 year increase of families with children. Additionally, since the 2006 Census, there has been a 20% increase in lone parent families on the Thetis Island.

Over the last 10 years, there has only been an increase of five households on Thetis Island. Over the same timeframe, the average household size has also remained relatively stable.

Finally, there has been a significant decrease (50%) in the number of “other households” (multi-family and two or more person non-census family households) on Thetis Island over a 10 year period. This could indicate a reduction of housing affordability to those not defined as census families, but living in the same household (roommates), as well as families sharing homes.

Table 8.4: Thetis Island Household Composition (2006, 2011, 2016 Census)

Household Composition	2006	2011	2016	5 Year Change	% Change	10 Year Change	% Change
Families with children	10	25	25	0	0.0%	15	150.0%
Families without children	10	5	10	5	100.0%	0	0.0%

Average Household Size	**2.0**	**1.9**	**2.0**	**0.1**	**5.3%**	**0.0**	**0.0%**

Tenure – Rental and Ownership

Table 8.5 shows the breakdown of home ownership compared to rental units on Thetis Island, CVRD and BC. The percentage of households that are rented on Thetis Island (13.5%) is lower than the CVRD (22.3%) and BC (31.9%), resulting in less opportunities for rental units on Thetis Island.

Table 8.5: Thetis Island Household Tenure (Statistics Canada 2017f)

Household Tenure	Thetis	% Total	CVRD	% Total	BC	% Total
Rented	25	13.5%	7,805	22.3%	599,360	31.9%
Owned	160	86.5%	27,250	77.7%	1,279,020	68.1%
Total Households	**185**	**100%**	**35,055**	**100%**	**1,878,380**	**100%**

Over a 10 year period, the proportion of rented homes on Thetis Island has grown from 6.1% of the household stock rented to 13.5% in 2016. Over the same period, the number of owned households has decreased from 93.9% to 86.5%. There was no household tenure information available from the 2011 National Household Survey.

Table 8.6: Thetis Island Household Tenure (Rental/Ownership) 2006-2016 (Statistics Canada 2006, 2012f, 2017f)

Household Tenure	2006	% total	2011	% total	2016	% total

Total Households	**165**	**100%**	**-**	**-**	**185**	**100%**

Household Sizes

Reflective of the household composition on Thetis Island, there is a higher proportion of one person (30.6%) and two person households (52.8%) than the CVRD (27.1% and 42.1%) and BC (28.8% and

35.3%). 83.4% of residents on Thetis Island live in one or two person households. The average number of persons per household on Thetis Island (2.0) is lower than that of CVRD (2.3) and BC (2.4).

Table 8.7: Thetis Island Household Sizes (Statistics Canada 2017f)

Household Size	Thetis	% Total	CVRD	% Total	BC	% Total
1 person	55	30.6%	9,555	27.1%	541,910	28.8%

8.2 Income 2015

8.2.1 Taxable Income Distribution- Individuals

The 2016 Census provides information on the incomes of respondents for the previous year (2015). **Table 8.8** depicts the total reported income for Thetis Island, CVRD and BC in 2016. Average tax-filer income on Thetis Island is $61,201, which is 29.7% lower than CVRD and 47.6% lower than BC. The median income for Thetis Island is $57,216 which is also lower than the median for CVRD (13.9%) and BC (22.3%).

Table 8.8: Thetis Island Total Taxable Income (Statistics Canada 2017f)

Total Income 2015	Thetis	% Total	CVRD	% Total	BC	% Total
Without income	10	3.0%	2,495	3.6%	142,970	3.7%

Average Income	**$61,201.00**		**$79,411.00**		**$90,354.00**	

8.2.2 Household Income

Household income is used as an indicator of housing affordability, as it includes every person in a dwelling who may be contributing to paying for the housing costs. **Table 8.9** shows the median household income for Thetis Island. The island has a lower household income than both CVRD and BC in all economic family compositions. The disparity between median household incomes on Thetis Island with those in the CVRD and BC is most pronounced for couple families with children. Smaller disparities exist for families without children and those not in an economic family.

Table 8.9: Thetis Island Median Household Income, 2015 (Statistics Canada 2017f)

Economic Family Composition	Thetis	% Total	CVRD	% Total	BC	% Total
Couple families with children	$66,304	12.5%	$105,679	20.3%	$111,736	24.4%
Lone parent families	-	5.0%	$45,605	9.6%	$51,056	9.0%
Families without children	$72,704	47.5%	$75,945	33.5%	$80,788	26.3%
Not in an economic family	$22,208	37.5%	$29,393	36.7%	$31,255	40.2%
All Households	**$57,216**	**100%**	**$65,191**	**100%**	**$69,995**	**100%**

Household Income Distribution

Household income distribution can be used to determine an approximate number of housing options for different income groups. While the median income of Thetis Island is $57,216, over 20% of households report over $100,000 in income. Compared to the CVRD and BC, Thetis Island has a lower median income. CVRD reports a median income of $65,191 and BC $69,995.

Table 8.10: Thetis Island Household Income Distribution, 2015 (Statistics Canada 2017f)

Average Income	**$61,201.00**		**$79,411.00**		**$90,354.00**	

Table 8.11 highlights household income distribution from 2005 to 2015. Over the 10 year period, the proportion of households reporting less than $39,999 has declined, which the income group $20,000 to $29,999 remaining constant. Reported incomes of $40,000 and higher have increased over 10 years by 50% to 100%. This indicates that the household income on Thetis Island has risen over the 10 year period. Note that no income information was available from the 2011 National Household Survey for Thetis Island.

Table 8.11: Thetis Household Income Distribution, 2005-2015 (Statistics Canada 2006, 2012f, 2017f)

Household Income	2005	% Total	2015	% Total	2005-2015	% Change
Under $9,999	15	8.8%	10	5.7%	-5	-33.3%
$10,000 to $19,999	25	14.7%	15	8.6%	-10	-40.0%

Average Income	**$49,063**		**$61,201**		**$12,138**	**24.7%**

Household Income Groups and Household Income Disparity

As previously mentioned, for ease of comparison with the 2015 SS HNA, this report is using the same income group definitions. **Table 8.12** provides the income range for each category, as defined in relation to the median income for Thetis Island ($57,216). **Table 8.13** provides a comparison of the proportion of these household income groups between Thetis Island, CVRD and BC as a whole.

Table 8.12: Thetis Island Household Income Groups, 2015 (Statistics Canada 2017f)

Income Groups	Definition	Income Range	Thetis	% Total
Little to no income	under $15,000	under $15,000	15	8.1%
Low income	$15,000 to 50% median	$15,000 to $29,999	30	16.2%
Low to moderate income	50% - 80% median	$30,000 to $44,999	25	13.5%
Moderate	80% - 100% median	$45,000 to $59,999	30	16.2%

Income Groups	Definition	Income Range	Thetis	% Total
Moderate to above moderate	100% - 120% median	$60,000 to $69,999	15	8.1%
Above moderate to high	120% - 150% median	$70,000 to $89,999	30	16.2%
High income	150% median +	$90,000 and over	40	21.6%
All Households	**$57,216**		**185**	**100%**

Income disparity on Thetis Island is similar to that found in the CVRD and across BC as a whole, although there are a greater proportion of little to no income households and a smaller percentage of high income household income groups on Thetis Island compared to CVRD and BC.

Table 8.13: Thetis Island Household Income Groups, 2015 (Thetis, CVRD, BC) (Statistics Canada 2017f)

Total Income 2015	Thetis	% Total	CVRD	% Total	BC	% Total

8.3 Current Housing Supply

8.3.1 Existing Housing Stock

Structure Type

The housing supply on Thetis Island is predominately single-detached dwellings, which form 94.3% percent of the total housing supply. This is higher than the CVRD (73.4%) and BC (44.1%). Lack of diversity in housing stock can be a contributor to a lack of affordable rental and ownership options for a full range of income groups and family compositions. This relationship is shown in **Table 8.14.**

Table 8.14: Thetis Island Housing by Structure Type, 2016 (Statistics Canada 2017f)

Structure Type	Thetis	% Total	CVRD	% Total	BC	% Total
Single-detached house	165	94.3%	25,905	73.4%	830,660	44.1%

Apartment < 5 storeys	-	0.0%	3,275	9.3%	385,140	20.5%
Other single-attached house	-	0.0%	140	0.4%	3,755	0.2%
Total Private Dwellings	**175**	**100%**	**35,270**	**100%**	**1,881,975**	**100%**

Age of Housing Stock

Table 8.15 shows the construction period of dwellings on Thetis Island, compared to CVRD and BC. In general Thetis has fewer dwellings that were constructed prior to 1960 when compared to the CVRD and BC. Similar to other islands in the Islands Trust, Thetis Island experienced increased construction from 1991 to 2000. Construction rates have remained slightly higher on Thetis Island compared to CVRD and BC.

Table 8.15: Thetis Island Dwelling Age, 2016 (Statistics Canada 2017f)

Construction Period	Thetis	% Total	CVRD	% Total	BC	% Total
1960 or before	15	7.7%	6,050	17.2%	267,560	14.2%
1961 to 1980	45	23.1%	10,025	28.4%	559,485	29.7%
1981 to 1990	20	10.3%	5,090	14.4%	289,565	15.4%
1991 to 2000	70	35.9%	7,030	19.9%	331,865	17.6%
2001 to 2005	15	7.7%	1,950	5.5%	125,335	6.7%
2006 to 2010	20	10.3%	3,195	9.1%	171,945	9.1%
2011 to 2016	10	5.1%	1,925	5.5%	136,210	7.2%
Total	**195**	**100%**	**35,265**	**100%**	**1,881,965**	**100%**

Non-Resident Ownership

Table 8.16 shows the portion of dwellings on Thetis Island which are occupied by usual residents. Usual place of residence applies to those who own multiple properties. At 46.4%, Thetis Island's rate of dwellings occupied by usual residents is much lower than that of the CVRD (93.0%) and BC (91.2%). However, the percentage of dwellings occupied by usual residents on Thetis Island has increased by 5.7% since 2011.

Table 8.16: Thetis Island Dwellings Occupied by Usual Residents 2011-2016 (Statistics Canada 2012f, 2017f)

Census Year	Thetis	% Total	CVRD	% Total	BC	% Total
2016	178	46.4%	35,272	93%	1,881,969	91%
2011	166	40.7%			1,764,637	90.7%
% Change 2011-2016		**-1.1%**				**-0.7%**

8.3.2 Rental Availability and Affordability

Private Market Listings

The CMHC does not conduct rental market surveys for Thetis Island, and there is no formal inventory of rental properties conducted on Thetis Island. The rental housing market is extremely limited on Thetis Island. As of January 2018, there were no rentals available for rent in public listings on Craigslist, Padmapper, Kijiji or AirBnB. While this information is far from a complete picture of the rental market on Thetis Island, it paints a picture of a lack of affordable rental housing options. Anecdotal evidence and survey results for this assessment confirm this limited market for rental housing. The majority of respondents indicated that they pay between $400 and $750 for rent on Thetis Island.

Figure 8.2: What is your monthly rent?

Social Housing

There is currently no social or supported housing on Thetis Island.

8.3.3 Homeowner Options

Current Listings

Table 8.17 provides MLS listings as of January 30, 2018 to provide a snapshot of housing currently available for purchase on Thetis Island. The table also includes income required for ownership, based on an assumption that no more than 30% of income is used for shelter costs, $200/ month in costs of ownership, 75% loan over a 25 year amortization period, and 4% interest.

There were a total of seven listings available on Thetis Island, with an average price of $736,957 and a median price $649,900. While the number of available listings is relatively low, there is presently a range of home price categories available on Thetis Island. However, all homes available for purchase on this date were single family dwellings.

Table 8.17: Thetis Island MLS Listings, January 2018

Price Range	# Listed	Average Cost	Income Required
$0 - $149,999	-		
$150,000 - $199,999	-

Median $		**$649,900.00**	**$110,912**

8.4 Housing Affordability

8.4.1 Affordability Targets

Housing affordability is defined in **Section 1.1** of this report. Housing is generally considered affordable if it meets suitability and adequacy standards, and does not cost more than 30% of total household income.

Based on these assumptions, **Table 8.18** provides affordability for different household groups, based on median incomes of each group as provided in the 2016 Census. The percentage of the total population for each group is also provided, to indicate the ideal percentage of total available housing units available for each household type and income level.

To allow comparison with the SS HNA affordable purchase price was calculated based on an assumed 4% interest rate, 25 year amortization, and 75% loan-to-value ratio. The homeowner monthly shelter costs are also included at $200 for taxes, insurance and utilities.

Household Type

Table 8.18: Thetis Island Household Affordability Targets

Household Affordability Targets	% Population	Median Income	Affordable Rent	Affordable Purchase
Couple families with children	12.5%	$66,304	$1,658	$369,000
Lone parent families	5.0%	$-	$-	$(51,000)
Families without children	47.5%	$72,704	$1,818	$409,000
Not in an economic family	37.5%	$22,208	$555	$90,000
All Households (2015)	**100%**	**$57,216**	**$1,430**	**$311,000**

Income Groups and Ideal Affordable Housing Supply

Table 8.19 provides a detailed breakdown of the number of housing units available for each of the income groups previously identified in **Table 8.12**, based on the percentage of the total households within each group. Affordable rent and purchase prices have been calculated using the same assumptions and benchmarks previously used in this report.

It is also important to note that welfare clients received $375 for monthly rent.

As an illustration of how this table can be used, it indicates that 34.2% of households (all households below moderate income of $40,000) need rental housing $938/month or less. Similarly, 13.2% of households can afford a home with a purchase price of $581,000. However, home ownership is not feasible for everyone even if the house itself seems to be affordable. The new mortgage regulations require a down payment of 20% to 25% with a risk assessment of the interest rate to ensure the buyer can afford an interest rate 2% higher than their approved rate. Service industry employees working minimum wage or even more would find it very difficult to save the down payment while renting.

Table 8.19: Thetis Island Ideal Housing Supply - Rental and Purchase Prices (Statistics Canada 2017f)

Income Groups	Income Range	#	% Households	Average Income	Affordable Rent	Affordable Purchase
Little to no income	Under $5,000	5	2.6%	$5,000	$125	n/a
	$5,000 to $9,999	-	0.0%	$7,500	$188	n/a
	$10,000 to $14,999	5	2.6%	$12,500	$313	$29,000
Low income	$15,000 to $19,999	10	5.3%	$17,500	$438	$60,000
	$20,000 to $24,999	15	7.9%	$22,500	$563	$92,000

	$80,000 to $89,999	10	5.3%	$85,000	$2,125	$487,000
	$90,000 to $99,999	10	5.3%	$95,000	$2,375	$550,000
	$100,000 +	25	13.2%	$100,000	$2,500	$581,000
Median Income		**190**	**100%**	**$57,216**	**$1,430**	**$311,000**

8.5 Community Perspectives

For a description of methods, please see **Section 1.2 - Approach and Methods**.

8.5.1 Stakeholder/Key Informants Interviews

On November 24, 2017, a stakeholder meeting was held with 15 representatives from the community. The attendees discussed the characteristics of the island. While some of the camps provide some staff accommodation for the seasonal workers, other employers do not. There was significant concern from BC Ferries representative. There is no secure, affordable accommodations for the ferry workers who need to remain/reside on Thetis Island, who are on the first ferry (the ferry overnights on Thetis Island). There are 25 BC ferry employees that work the Thetis Ferry. It was estimated that half of the workers would live on Thetis Island if there was affordable and secure rental accommodation. It was also acknowledged that in future, seniors would require either more social services or supported housing if they are to stay on the island. Finally it was noted that as the population ages (current median age is 62.9 years), there will be more demand for maintenance and support services such as yard maintenance and home repair. However, without affordable, appropriate housing, these people will not be attracted to the island.

8.5.2 Online Survey

Eighty-one people (20.8% of the island population) completed the online survey. Interestingly, the responses were fairly evenly split between permanent and non-permanent residents (55% and 45%, respectively). Seventy-nine percent of the respondents owned their homes.

The survey asked respondents to identify gaps in housing supply on Thetis Island. Almost 70% of respondents identified a gap in affordable housing supply. Over 45% of respondents also identified a gap in supply of seniors housing on Thetis Island. Other responses were that there were gaps for low income workers and a need for more rentals. **Figure 8.3** shows the categories and responses.

Figure 8.3: What housing supply gaps exist on your island?

Figure 8.4: What groups are not able to access housing on your island?

From the results of the survey, it appears that the people who need affordable housing live in trailers or mobile homes (assumedly parked on private land), and rental housing and an assortment of illegal solutions including suites and cottages. Sixty percent of the respondents were aware of people living in illegal situations.

Respondents were also asked to identify groups that may not be able to access appropriate housing on Thetis Island. Over 60% of people indicated that young adults may not be able to access adequate housing. The other group identified was employees. Other responses included vulnerable people and new immigrants. **Figure 8.4** shows the categories and responses.

Figure 8.5: Where do the people that need affordable housing currently live on your island?

When asked what the top housing challenges for housing on Thetis Island were, 73% of survey respondents indicated that was a lack of available housing options available, 55% stated that housing was unaffordable relative to income, and 45% indicated a lack of employee housing.

Figure 8.6: Please select the top three housing challenges faced by your island.

8.6 Affordable Housing Gaps

The people who cannot currently access housing are the young adults, families and employees. The vulnerable population is primarily the employees who take seasonal jobs but cannot find appropriate, affordable housing.

8.7 Conclusion and Recommendations

The population projections for Thetis range from 420 to 477 in the next 25 years. This is an increase of between 20 and 77 people. Using the high projection and assuming the average household size remains at 2.0, this means that the island will require 15 new affordable housing units over the next 25years. This would seem to require units that would accommodate singles and families.

9.0 Summary and Recommendations

The comments received over and over in the surveys, and during the stakeholder meetings were that the top four challenges of the islands in the Northern Region are:

1. Unaffordable relative to income – based on limited employment on the islands, seniors with fixed income and the number of artists and craftspeople, the required rent is more than 30% of the gross income of the potential tenant.
2. Unhealthy conditions – mould, inadequate heat, no potable water, use of outhouses all lead to unhealthy conditions for the tenants.
3. Insecure tenure – because many people rent out their homes when they are not on the islands. These rentals are either for three to six months, or give the tenant a lease for a year and then "evict" the tenant for reasons of family in the late spring. This often requires the tenants to move often more than once a year. These tenants often have service jobs on the islands and have to spend significant time looking for another place to live.
4. Lack of housing options – most rentals on the islands are full houses, portions of a house, or a cottage or an illegal suite in a house. Often a housing option is an individual placing a mobile home or trailer on someone's property. This raises concerns of water and sanitary servicing.

It is recognized that the Islands Trust cannot own property nor can the Local Trust Committee's fetter their decision making by becoming "hands-on" involved with the actual provision of affordable housing. However, the Local Trust Commitees can provide direction and set goals for affordable housing through the OCP's and ensure a clear process and timelines in the Zoning Bylaws for any required rezoning applications.

The recommendations provided here will give direction to any future housing needs strategies. Based on the housing needs identified in this report, it is recommended:

- That each island review their OCP to ensure that there are supportive policies for the development of safe, secure, appropriate, and affordable rental housing.
- That the Islands Trust promote the ability to enter into Housing Agreements with property owners and not-for-profit organizations to ensure housing remains affordable.
- That the Local Trust Committees support the efforts of not-for-profit organizations to increase the amount of safe, secure, appropriate, affordable housing on their islands.
- The Islands Trust and/or the individual Local Trust Committees can consider conducting a local "municipal" census for each island mid-way between federal census years to provide up to date information.
