P'HWULHP (GARRY OAK) MEADOWS: UNDERSTANDING A LIVING CULTURAL LANDSCAPE

RESCHEDULED!

May 4, 2023

from 1:00pm - 2:00pm

SPEAKER

MAIYA MODESTE - P'HWULHP (GARRY OAK) RESTORATION COORDINATOR, STQEEYE' LEARNING SOCIETY

I work for Stqeeye' Learning society, a non-profit, indigenous led organization that focuses on land restoration and education guided by traditional teachings and indigenous ways of knowing and being. My role within the society is P'hwulhp (Garry Oak) Restoration coordinator and I have had the privilege of stewarding these heavily degraded ecosystems for the past year and have recently been granted funding for my project until 2026. My goal for my project is to have the ability and capacity to teach indigenous youth about our native food gardens but to also teach them how to prepare, harvest, preserve and serve our traditional foods, such as camas, with the hope and priority of feeding elder's traditional meals. Garry Oak ecosystems are the most biodiverse of all ecosystems in Canada and Quw'utsun people have relied on these ecosystems since time immemorial yet there are only 5% left in near natural condition, making them my utmost priority for restoration.
