Subject: What We Heard Summary Report Available

Hello,

You are receiving this email because you participated in information sessions related to the Private Managed Forest Land (PMFL) Program Review public engagement process, and/or provided, or supported, a written submission.

I would like to thank you again for your participation and I'm pleased to notify you that the "What We Heard" summary report is now posted for public viewing on the govTogetherBC results webpage for this public engagement:

<https://engage.gov.bc.ca/govtogetherbc/impact/private-managed-forest-land-program-results/>

A posting of Written Submissions whose authors have not requested confidentiality can be found at: <https://engage.gov.bc.ca/privatemanagedforest/written-submissions-private-managed-forest-land-program-review/>

I hope that you will find the report a comprehensive representation of all of the points of view that were submitted to government. There are diverse range of interests and ideas presented in the report, but it should be noted that the information and opinions are solely those of the individual participants who responded online or through written submissions during the engagement. The summary report is not a representation of potential policy directions by the government, but all information will be taken into consideration. We are looking ahead to ongoing conversations and dialogue with communities and First Nations, in order to formulate an official policy intentions paper for the minister to consider.

Regards,
The Private Managed Forest land Program Review Team
