For Information	

June 7, 2022

Islands Trust
Attention: Daniela Murphy

By email dmurphy@islandstrust.bc.ca

Dear Daniela Murphy,

Thank you for the opportunity to join the June 14, 2022 at the Regular Meeting of the Saltspring Island Local Trust Committee. Rogers is unable to attend, but would like to share an update with the LTC.

With respect to Rogers approved wireless telecommunication site at Channel Ridge (W2716 - North Saltspring Island) on North Saltspring Island, we have sought clarification from ISED Canada, the federal regulator for wireless telecommunication and it has confirmed we have met requirements of Land Use Authority and Public Consultation processes detailed in CPC 2-0-03. As a result, we are commencing construction of the proposed site later this month.

We want to deliver a reliable, consistent wireless experience to provide more seamless coverage for residents, visitors, and emergency responders on Salt Spring Island and we value the input of Islands Trust LTC and community members. We look forward to working with LTC, Staff and the local community on any future proposed wireless installations.

Should Islands Trust wish to review their antenna tower consultation process in the future, Rogers would welcome the opportunity to provide input.

Please contact Michael Krenz at 672-515-9534 or Michael.Krenz@rci.rogers.ca for further information.

Regards,

Michael Krenz
