

I have been a Hornby Islands Trustee since 2019 and like the opportunity to be able explain to Hornby Islanders how to get the information they need to get Development and Use permits and subdivide their property and how their local government works. I have over 40 years experience in land use planning and working with First Nations and various levels of government that i bring to the job. As well the local Trustee i have been chair of Conservancy Hornby Island for the ten years.

I think there are very serious and complex issues such as how the Trust functions, the revised Trust policy Statement, budget, housing and short term vacation rental that need to be addressed in the next term. STVRs are an essential part of our local economy. The big question is how they should be regulated.

If re-elected i look forward to working with Hornby Islanders, Trust Staff and Trustees from other islands on these important issues.
