

I am running for Trustee because I want to protect property owners' rights as well as the environment.

I believe that decisions that affect our way of life should not be rushed nor should they be driven from outside of our South Pender community. My commitment to our community is to make sure that all voices are heard and considered and to allow open and inclusive discussions. Where consensus is not easily achieved, I will encourage different perspectives and alternative solutions so that we maintain a cohesive and united community. I will work on your behalf to assure that the voice of our community is listened to and understood at

the Islands Trust Council level. I will assure there is a balance between the need to protect our unique rural environment and the social and economic needs of our community.

I have been living full time on South Pender since 2020 with my husband Marty. I have two grown daughters and two young grand-daughters. My career required that I be proficient at working collaboratively with others to find solutions to complex problems. I have training and experience in conflict resolution, negotiation, public speaking and process streamlining.

I love South Pender and I am very proud to be able to call this beautiful island home. I wish to serve this community and contribute to protecting this way of life for my children and grand-children and your future generations as well. I would be happy to discuss any questions you may have.
